SUBJECT: CHANGE IN PROJECT COORDINATOR FOR THE OLYMPIA DRY CLEANERS SITE
606 Union Street
Olympia, Washington

Dear Steve:

The purpose of this letter is to inform you of a change in the designated project coordinator for this project. Beginning on January 15, 2018, the new project coordinator will be Mr. Steve Marshall. Mr. Marshall, along with Greg Burleson, is one of the recently appointed personal representatives of the Frank and Katherine Burleson estate following the death of Gary Burleson on July 7, 2017. As before, all geologic and hydrologic work will still be performed under the supervision of a Washington-State licensed geologist or hydrogeologist as required by the consent decree. I will be performing that role for the foreseeable future and therefore all reports concerning the Site will still be prepared by Floyd|Snider. Should there be a change in the licensed geologist used in carrying out the work required by the consent decree, then you will be notified in advance of their involvement.

Steve Marshall and I are also requesting an in person meeting with you to go over the project as a whole and to discuss the path forward for the estate. We will be in contact regarding dates for that meeting. Mr. Marshall's contact information is below:

Steve Marshall
