RE: Permit #DEM17-00008
Project No. 080109 Casey's Car Care Facility

Dear Valerie,

After considering your request to include the construction of the carwash in our existing SEPA review application we have decided to not include it in the current application. Our intent is to complete the SEPA so we can remove the existing structures, excavate and remove the existing USTs and remediate the contamination. After completing demolition and remediation we will submit a new application for the construction of a carwash facility.

Please confirm Development Services will complete the current SEPA application and issue the permits necessary to begin the project.

Thank you,

Jim Hansen, Project Manager
Car Wash Enterprises, Inc.
