Young-Do

Thank you for your email.

Ecology is currently in the process of the selection of the Engineering Firm.
I have attached a schedule for the selection process.

The next step of that process is due on November 5th, when the Engineering Firms must submit their 'Statement of Qualifications' if they are interested.

The plan is to have the Engineering Contract in place by February 28, 2020.

After the contract is in place, the selected Engineering Firm will develop the "Engineering Design" and "Plans & Specifications" reports.

With a Capital Budget, this is a tedious process that must be followed under State Law concerning contracting.

I hope this answers your question Young-Do

Respectfully
Dale Myers
Department of Ecology

Hello Dale,

I am just following up with you to see if we have any updates regarding Circle K Site 1461? Last we spoke you mentioned that mid-October 2019 an engineering firm would be chosen and work would begin after design work was completed. We want to make sure that we can be as helpful as possible going forward with respect to parking lot access, site coordination efforts, etc. Please keep us posted.

I look forward to hearing from you.

Thanks,

Young-Do Choung

Good afternoon Young-Do

Ecology has the budget to proceed with the cleanup at the former Circle K Site (your property) Currently Ecology is getting ready to begin the process of selecting an Engineering Firm, this process is scheduled to be finished by mid-October.

Once that is done the selected Engineering Firm will begin the Construction design and prepare for field work.

Respectfully

Dale Myers

Subject: Circle K Site 1461

Dale,

Hello this is Young-Do Choung (KukJin Choung's son) and I am emailing you to see if there are any developments on our site (Circle K Site 1461) with respect to funding, timing etc. We are trying to make some decisions regarding our existing tenant's lease terms so a recap on the timing of any future cleanup efforts would be appreciated.

Thanks,

Young-Do Choung
