1.0 INTRODUCTION

AEI Consultants (AEI) was retained by McRoberts & Associates PC to conduct a Phase I Environmental Site Assessment (ESA), in conformance with the scope and limitations of ASTM Standard Practice E1527-05 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 837 North 34th Street in the City of Seattle, King County, Washington. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

1.1 EXECUTIVE SUMMARY

PROPERTY DESCRIPTION

The subject property, which consists of one multi-tenant commercial office building, identified as the Lake View Building, is located south of North 34th Street and west of Aurora Avenue North/SR 99 (elevated bridge) in a commercial area of Seattle, Washington. The property totals 1.79-acres and is improved with one multi-tenant commercial office building, identified as the Lake View Building and associated sub-grade parking garage. The substantial majority of the office space at the property is underlain by parking areas. An access ramp located under the SR 99 Bridge provides access from North 34th Street.

The following table presents additional property size and occupancy information:

	Lake View Building 837 North 34th Street
Parcel Number	197320-0389
Parcel Area	1.79 Acres
Square Feet	111,304 SF
Stories	4
Tenants	Suite 100 and 300: Ubermind Suite 200 and 4th floor: Tableau Software Suite 210: X2 IMPACT Suite 220: Anytime Fitness Suite 300: Groundspeak
Sub-grade Parking	Parking Levels 1, 2 and 3 (P1, P2, & P3)

On-site operations include primarily corporate office functions. Ubermind, Tableau Software, and Groundspeak are computer and/or software based companies, X2 Impact provides wireless head impact monitoring systems for athletes, and Anytime Fitness is a gym. A common concrete plaza area is located on the west side of the building, a common exterior walkway with landscaping is located on the south side of the building, and a single loading dock provides service access on the east side of the building.

The property was developed with the current improvements in 2008. Prior to the current site improvements, the subject property was identified to consist of a portion of a larger commercial/industrial office park which included a General Store and warehouses for plumbing supplies and roofing materials. These businesses operated onsite from the late 1950s to the late 1990s. The property was developed as a lumberyard from 1919 through 1957 and as a

Magnesium Asbestos Supply Company and Pacific Iron and Steel Works from at least 1905 through 1918. Lake Union occupied the property from 1893 thru 1904 and also still occupied a section on the south side of the property in 1905. Over the years of site use, fill materials, consisting of spoils from the dredging and construction of the Lake Washington Ship Canal were placed on the property. Substantial excavation activities were conducted prior to the current development. Additionally, investigation and remediation activities occurred prior to the current development, as further detailed in Section 4.2.2 and in appropriate sections of this report.

The subject property was identified in the regulatory database as a Confirmed and Suspected Contaminated Sites Listing – No Further Action (CSCSL-NFA), Facility Index System (FINDS), ALLSITES site, and is further discussed in Section 4.4.1.

The immediately surrounding properties consist of the following:

Direction from Site	Address-Tenant/Use
North	North 34th Street, followed by Carquest Auto Parts (744 North 34th Street), A Dance Studio, Istanbul Imports, Holistic Healing Center, Coffee Shop, History House, and Sculpture Garden (754-770 North 34th Street)
South	Canal Street followed by Fremont Lake Union Center, Waterfront Building (801 North 34th Street)
East	Burke Gilman Trail, a parking lot, North Northlake Way, followed by Lake Washington Rowing Club and Lake Union
West	Freemont Lake Union Center, Plaza Building (701-703 North 34th Street)

The adjacent site to the north, 744 N 34th Street, was identified in the regulatory database as a Historical Auto Station, RCRA-NonGen, FINDS, and ALLSITES site. The adjacent site to the north, 742 N 34th Street, was identified in the regulatory database as a Historical Auto Station site. The adjacent site to the north, 736 N 34th Street, was identified in the regulatory database as a Historical Cleaners site. The adjacent site to the south, 735 N Northlake Way, was identified in the regulatory database as a FINDS, ALLSITES, and RCRA-NonGen site. The adjoining site to the south, 711 N Northlake Way, was identified in the regulatory database as a RCRA-NonGen, FINDS, and ALLSITES site. As further discussed in Section 4.4.1, these sites are not expected to represent an environmental concern.

Based upon prior subsurface investigations and local topography, the direction of groundwater flow beneath the subject property is inferred to be to the south toward the Lake Union Ship Channel which is located to the south beyond the south adjacent Waterfront Building. Groundwater is present at depths ranging from 10 to 20 feet below ground surface (bgs).

FINDINGS

Recognized Environmental Conditions (RECs) are defined by the ASTM Standard Practice E1527-05 as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. AEI's investigation has revealed the following recognized environmental conditions associated with the subject property or nearby properties:

- No on-site RECs were identified during the course of this assessment.

Historical Recognized Environmental Conditions (HRECs) are defined by the ASTM Standard Practice E1527-05 as an environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently. AEI's investigation has revealed the following historical recognized environmental conditions associated with the subject property or nearby properties:

- Historical operations of concern at the subject property included the former presence of railway spurs and fuel tanks. Historically, the subject property was part of a larger commercial area that also included the south and west adjacent properties which are currently redeveloped as the Plaza and Waterfront Buildings with underground parking garages. Independent remedial actions were conducted prior to the development of these buildings and the future subject property building in order to address any impacted soil that might be encountered during redevelopment.

  As part of the site investigation process which included the subject property, eight test pits were excavated on the subject property in the area of the northern rail spur, in the location of the current subject property building, ranging from depths from 7 to 9.5 feet bgs. Soil samples were selectively collected from each of the eight test pits at various depths. All soil samples were analyzed for total petroleum hydrocarbons as gasoline (TPH-G), and benzene, toluene, ethylbenzene and total xylenes (BTEX), halogenated volatile organic compounds (HVOCs), and poly-aromatic hydrocarbons (PAHs).

  Laboratory results indicated that most of the analytes, when detected, were present at low concentrations, typically below applicable Model Toxics Control Act (MTCA) cleanup levels. Only one sample (DTP-36-6.5) contained TPH-D at a concentration (232 mg/kg) slightly above the MTCA Method A cleanup level. BTEX and HVOCs were not detected in any of the samples analyzed. AEI notes that the current MTCA Method A cleanup level for TPH-D is 2,000 mg/kg and therefore, no samples would be above the MTCA Method A cleanup levels. The consultant concluded that although some concentrations slightly exceeded MTCA Method A cleanup levels, the materials do not pose a threat to human health or the environment.

  In summary, soil investigation was conducted at the subject property prior to development of the Lake View Building. Soil sampling results were below the current Model Toxics Control Act (MTCA) Method A concentrations for industrial soil cleanup. After completion of the above investigations and remedial activities, the property was evaluated under a Site Hazard Assessment (SHA) and granted No Further Action status (NFA-SHA) by the Seattle King County Health Department (SKCHD) under an interagency agreement with the Washington Department of Ecology (Ecology) in 1998.

  As part of the current development, 20 to 30 feet of materials were excavated for the construction of the three-level parking garage that underlies the office space on the property. Based on the extent of prior sampling activities, extent of subsequent excavation activities, presence of ventilated parking areas beneath occupied areas of the building, and the No Further Action Status of the property, no further investigation appears warranted at this time.

De Minimis Environmental Conditions include environmental concerns identified by AEI that warrant discussion but do not qualify as RECs, as defined by the ASTM Standard Practice E1527-05. AEI's assessment has revealed the following de minimis environmental conditions associated with the subject property or nearby properties:

- With the exception of residual concentrations discussed in the HREC section above, no on-site de minimis environmental conditions were identified during the course of this assessment.

Business Environmental Risks (BERs) include risks which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the subject property, not necessarily limited to those environmental issues required to be investigated in the standard ASTM scope. BERs may affect the liabilities and financial obligations of the client, the health & safety of site occupants, and the value and marketability of the subject property. AEI's investigation has revealed the following BERs associated with the subject property or nearby properties:

- No BERs were identified during the course of this assessment.

CONCLUSIONS, OPINIONS AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment for the property located at 837 North 34th Street in the City of Seattle, King County, Washington, in general conformance with the scope and limitations of ASTM Standard Practice E1527-05 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312). Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report. This assessment has revealed no evidence of RECs in connection with the property. AEI recommends no further investigations for the subject property at this time.

1.2 PURPOSE

The purposes of this Phase I Environmental Site Assessment ("ESA") are: To identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E-1527-05, hereinafter defined) affecting the Site that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the Site or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the Site under any applicable environmental law; 4) may affect the value of the Site, and; 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing, 2) evaluate the Site's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the Site, and or; 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the Site.

1.3 SCOPE OF WORK

The goal of AEI Consultants in conducting the environmental site assessment was to identify the presence or likely presence of any hazardous substances or petroleum products on the property that may indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum product into the soil, groundwater, or surface water of the property.

The following assumptions are made by AEI Consultants in this report. AEI Consultants relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI Consultants has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this investigation is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow and depth to groundwater, unless otherwise specified by on-site well data, or well data from adjacent sites are assumed based on contours depicted on the United States Geological Survey topographic maps. AEI Consultants assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

Property conditions, as well as local, state, tribal and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this study apply strictly to the environmental regulations and property conditions existing at the time the study was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI Consultants makes no warranty, expressed or implied,

except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the study.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, vapor intrusion, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-05.

If requested by the client, these non-scope issues are discussed in Sections 5.2.4-5.2.7. Otherwise, the purpose of this investigation is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). ASTM Standard Practice E1527-05 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1) 42 U.S.C § 9601(35)(B), referenced in the ASTM Standard Practice E1527-05.

2) Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).

3) 42 U.S.C. 9601(40) and 42 U.S.C. 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of investigation into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, and observations and conditions that existed on the date and time of the property visit.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

1.4 INVESTIGATION REQUIREMENTS NOT SATISFIED

LIMITING CONDITIONS

The performance of this Phase I Environmental Site Assessment was limited by the following condition(s):

- Due to the size of the property, a representative sample of interior spaces was inspected by AEI. Due to the commercial nature of occupancy, this limited inspection method is expected to be adequate for the purposes of this assessment.

DATA GAPS AND DATA FAILURE

According to ASTM E1527-05, data gaps occur when the Environmental Professional is unable to obtain information required, despite good faith efforts to gather such information.

Data failure is one type of data gap. According to ASTM E1527-05 "data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met". Pursuant to ASTM Standards, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier.

The following data gap was identified during the course of this assessment:

Data Gap:	Site use prior to 1893 not identified				
Does this data gap affect the EP's ability to identify RECs?		Yes		No	X
Rationale	The use of the subject property prior to 1893 (the oldest Sanborn Fire Insurance Map obtained) identified the presence of a railway located on the northern section of the property. Based on the remainder of historical use information obtained, and historical site investigations and remedial actions, this data gap does not appear to be significant.				
Information/ sources consulted	Building Department Records, Assessor's Office records, Previous Reports.				

2.0 USER PROVIDED INFORMATION

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-05 and EPA's AAI Rule, certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the environmental professional. The responsibility for qualifying for Landowner Liability Protections (LLPs) by conducting the inquiries ultimately rests with the User, and providing the information to the environmental professional would be prudent if such information is available.

2.1 TITLE RECORDS

General title records were provided for review. A Chain of Title was not requested as part of this assessment.

2.2 ENVIRONMENTAL LIENS & ACTIVITY AND LAND USE LIMITATIONS

AEI was not informed by the User of any environmental cleanup liens encumbering the subject property that are filed or recorded under federal, tribal, state or local law.

AEI was not informed by the User of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state or local law.

2.3 SPECIALIZED KNOWLEDGE

AEI was not informed by the User of any specialized knowledge or experience related to the subject property or nearby properties.

2.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

The User did not indicate to AEI any information to suggest that the valuation of the subject property is significantly less than the valuation for comparable properties due to environmental factors.

2.5 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

The User did not inform AEI of any commonly known or reasonably ascertainable information about the subject property which aided AEI in identifying conditions indicative of a release or threatened release.

2.6 KNOWLEDGE OF PRESENCE OR LIKELY PRESENCE OF CONTAMINATION

The User did not inform AEI of any obvious indicators that pointed to the presence or likely presence of contamination at the subject property.

2.7 IDENTIFICATION OF KEY SITE MANAGER

Mr. Steve Mace, Property Manager with Colliers International was identified as the key site manager. Mr. Mace was interviewed as discussed in Section 5.3.

3.0 SITE INFORMATION

3.1 SITE NAME AND ADDRESS

The subject property, identified as Lake View Building, is located at 837 North 34th Street in the City of Seattle, King County, Washington.

3.2 LEGAL DESCRIPTION

The subject property is identified with the address 837 North 34th Street in the City of Seattle, King County, Washington. The legal description for the property is obtained from the King County Department of Assessments eReal Property website. The subject property is identified by the Assessor Parcel Number (APN): 197320-0389.

3.3 SITE DESCRIPTION

The subject property consists of one parcel located south of North 34th Street and west of Aurora Avenue North/SR 99 (elevated bridge) in a commercial area of Seattle, Washington. The property totals approximately 1.79-acres and is improved with one multi-tenant commercial building totaling approximately 111,304 square feet and associated sub-grade parking. In addition to the subject property building, the property is improved with open asphalt-paved parking areas on the east side of the building and associated landscaping. A common concrete plaza area is located on the west side of the building, a common exterior walkway with landscaping is located on the south side of the building, and a single loading dock provides service access on the east side of the building. An access ramp located under the SR 99 Bridge provides access from North 34th Street. The property was developed with the current improvements in 2008. Refer to Appendix 8.1.2: Site Map and Figure 8.1.3: for site location. Note that a temporary tent-like structure is visible in the Site Map aerial photograph, and this feature is no longer present on the property.

The following table presents additional property size and occupancy information:

	Lake View Building 837 North 34th Street
Parcel Number	197320-0389

Parcel Area	1.79 Acres
Square Feet	111,304 SF
Stories	4
Tenants	Suite 100 and 300: Ubermind Suite 200 and 4th floor: Tableau Software Suite 210: X2 IMPACT Suite 220: Anytime Fitness Suite 300: Groundspeak
Sub-grade Parking	Parking Levels 1, 2 and 3 (P1, P2, & P3)

3.4 CURRENT USES OF SITE

The subject property is currently utilized for multi-tenant commercial office space. On-site operations include primarily corporate office functions. Tenants Ubermind, Tableau Software, and Groundspeak are computer/software based companies, X2 Impact provides wireless head impact monitoring systems for athletes, and Anytime Fitness is a gym.

3.5 OWNERS AND OCCUPANTS OF SITE

The subject property is currently owned by BBK Lake View LLC. Refer to the table for a listing of the current tenants of the subject property. The building was 100% occupied.

3.6 RECORDED LAND TITLE INFORMATION

General title records were provided for review. A Chain of Title was not requested as part of this assessment.

4.0 RECORDS REVIEW

4.1 PHYSICAL SETTING SOURCES

4.1.1 TOPOGRAPHY

Based on the review of the USGS Seattle North Quadrangle Topographic Map and site observations, the area of the subject property is characterized as terraced land sloping to the south. The elevation of the property is approximately 30 feet above mean sea level (msl).

4.1.2 SOILS

Based on a review of the United States Department of Agriculture (USDA) Soil Survey for the area of the subject property, the soils in the vicinity of the subject property were not classified. Based on a review of previous reports for the subject property, fill materials consisting of spoils from the dredging and construction of the Lake Washington Ship Canal was placed on the site. EMCON indicated that this latter fill material was clean, having been obtained from other construction sites in the Seattle area. According to a 1996 Geotechnical Engineering Study conducted in preparation for the current development, dense to very dense native soil was noted at depths ranging from near the ground surface at the site's northern portion to about 35 feet elsewhere.

4.1.3 GEOLOGY

According to information obtained from the US Geological Survey (USGS), the area surrounding the subject property is underlain by glacial drift deposits of the Pleistocene-era.

4.1.4 HYDROLOGY

Based upon prior subsurface investigations and local topography, the direction of groundwater flow beneath the subject property is inferred to be to the south toward the Lake Union Ship Channel which is located approximately 325 feet south of the property. Groundwater is present at depths ranging from less than 10 to 20 feet below ground surface (bgs).

4.2 HISTORICAL USE INFORMATION

4.2.1 PRIOR USES OF SITE

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-05 were used to determine previous uses and occupancies of the subject property that are likely to have led to recognized environmental conditions in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historic city directories and Sanborn fire insurance maps and building department records is as follows:

Date Range	Subject Property Description/Use	Source(s)
Pre-1893-1904	Railway, Lake Union	Previous Reports, Sanborn Fire Insurance Maps

Date Range	Subject Property Description/Use	Source(s)
1905-1918	Railway, Magnesium Asbestos Supply Company, Pacific Iron and Steel Works	Previous Reports, Sanborn Fire Insurance Maps
1919-1950	Lumberyard	Previous Reports, Sanborn Fire Insurance Maps, Aerial Photograph
1950-1998	Portion of a larger commercial/industrial office park which included a general store and warehouses for plumbing supplies and roofing materials	Previous Reports, Building Department Records, Sanborn Fire Insurance Maps, Historical Aerial Photographs, City Directories
1998-2007	Vacant lot, parking for adjacent buildings	Previous Reports, Building Department Records, Historical Aerial Photographs, City Directories
2008-present	Multi-tenant office building	Site Inspection, Building Department Records, Previous Reports, Historical Aerial Photographs, City Directories

The property was developed with the current improvements in 2008. Prior to the current site improvements, the subject property was identified to consist of a portion of a larger commercial/industrial office park which included a general store and warehouses for plumbing supplies and roofing materials. These businesses operated onsite from the late 1950s to the late 1990s. The property was developed as a lumberyard from 1919 through 1957 and as a Magnesium Asbestos Supply Company and Pacific Iron and Steel Works from at least 1905 through 1918. Lake Union occupied the property from 1893 thru 1904 and also still occupied a section on the south side of the property in 1905. Over the years of site use, fill materials, consisting of spoils from the dredging and construction of the Lake Washington Ship Canal were placed on the site. Substantial excavation activities were conducted prior to the current development. Additionally, investigation and remediation activities occurred prior to the current development, as further detailed in Section 4.2.2 and in appropriate sections of this report.

Based on a review of historical sources, the following historical addresses were associated with the subject property: 3201 and 3301 North Fremont Avenue. These addresses were also researched as part of this assessment.

If available, copies of historical sources are provided in the report appendices.

4.2.2 PREVIOUS REPORTS AND OTHER CLIENT PROVIDED DOCUMENTATION

Documentation was provided to AEI by the client during this investigation. A summary of this information follows:

Revised Independent Remedial Action Interim Report, Adobe Development, Quadrant Lake Union Center, Seattle, WA, prepared by EMCON, dated March 30, 1998

The report was prepared by EMCON on behalf of Bedford Property Investors and summarizes the results of the independent remedial actions conducted at the Adobe

Development at Quadrant's Lake Union Center and updates EMCON's August 11, 1997 report. The Adobe property is described as the east half of the Lake Union Center and is bounded by the Fremont Avenue Bridge to the west, North 34th Street on the north, the Aurora Avenue Bridge on the east and Lake Union on the south. It is noted that this assessment appears to include property at the northwest corner of North 34th Street and Fremont Avenue North and south of the subject property, bordering Lake Union which is not part of the subject property included in this Phase I assessment.

Independent remedial actions were conducted by EMCON on behalf of Quadrant Corporation to address impacted soil associated with two former rail spurs and three underground storage tanks (USTs) present at the site. This report also summarizes actions taken to remove impacted soil encountered during excavation for site redevelopment. Independent remedial action performed to address impacted soil within the former Burlington Northern Railroad (BNR) right of way was presented in a separate report.

Prior to redevelopment, EMCON describes the Adobe Development to have consisted of three buildings used for commercial purposes and warehousing. There were visible indications of two inactive rail spurs present in the northern and southern portions of the Adobe Development. The northern spur was described as approximately 600 feet long and the southern spur was approximately 400 feet long. The former right of way for the BNR tracks is located south adjacent to North 34th Street. The railway tracks and ties were removed from the right of way between 1980 and 1990.

EMCON described the current redevelopment of the site as two new buildings with basement parking on the northwest corner and south section of the site. These two buildings are the west and south adjacent properties of the subject site (not part of this assessment). The northeast corner of site was to be developed for a third building, which is the currently the subject property. Additionally, a new privately owned access drive to North 34th Street (the Aurora ramp) was described for construction beneath the northern end of the Aurora Bridge.

Construction of the planned basement parking areas required the removal of 6 to 8 feet of soil beneath the new buildings. It is noted that a limited number of Figures believed to be associated with this EMCON report were separately provided AEI.

The Lake Union Center was described by EMCON as having been used for commercial purposes dating back to at least 1893. A portion of the site was used as a lumber mill from 1893 until 1929 when the mill was closed. The mill was reopened as a door and sash company in 1939 until 1957. The site was reportedly then used as an industrial/commercial park until the current development. Over the years of site use, fill materials, consisting of spoils from the dredging and construction of the Lake Washington Ship Canal was placed on the south end of the site. Additional fill was placed on and adjacent to the north end of the site. EMCON indicated that this latter fill material was clean, having been obtained from other construction sites in the Seattle area.

Quadrant commissioned a soil investigation of the two rail spurs located on the site, which encountered construction and demolition debris in several test pits. Additional investigation was requested within the limits of the Adobe Development Buildings 1 and 2 general excavations (the excavation necessary for the basement parking garage). An investigation of the future Building 3 (current on-site building) area was performed after Buildings 1 and 2 general area (adjacent buildings) was completed. A summary of these investigations follows:

Former Rail Spurs:

- Eleven (11) test pits were excavated on or adjacent to the northern and southern rail spurs to depths of 4 to 5 feet bgs. The northern spur appeared to be situated on the subject property.

- Soil samples were selectively collected from eight of the test pits for laboratory analysis based on field screening using a photoionization detector (PID) and other field screening techniques.

- All soil samples were analyzed for TPH-D and TPH-O by Ecology method WTPH-D extended. Selected samples were also analyzed for halogenated volatile organic compounds (HVOCs) by EPA 8010B, PAHs by EPA 8310, PCBs by EPA method 8080, and RCRA metals.

- For the northern spur (onsite), TPH-D and TPH-O concentrations exceeded MTCA Method A cleanup levels (200 mg/kg) in two of the four samples collected at depths of 1 to 2 ft bgs. Two of these samples contained carcinogenic PAHs (CPAHs) at concentrations of 0.08 and 3.1 mg/kg. This latter concentration is significantly below the MTCA Method A industrial soil cleanup level but slightly above the MTCA Method A residential cleanup level of 1 mg/kg. Non-carcinogenic PAHs were well below their respective cleanup levels. PCBs and HVOCS were not detected in any samples analyzed from the northern spur. Concentrations of metals detected in these samples were below their respective MTCA cleanup levels. None of the deeper (>2ft bgs) samples collected from the northern spur contained TPH at concentrations exceeding MTCA levels.

- For the southern spur (adjacent to the south), all of the samples analyzed contained TPH-O and/TPH-D at concentrations exceeding MTCA cleanup levels; ranging from 202 to 1,190 mg/kg and 20 to 379 mg/kg respectively. CPAHs were detected in both of the samples analyzed at concentrations of 0.1 and 3.64 mg/kg; the latter concentration significantly below the MTCA Method A industrial soil cleanup level but slightly above the MTCA Method A residential cleanup level of 1 mg/kg. PCBs and HVOCs were not detected in any of the samples analyzed from the southern spur. With one exception, all of the metals detected in samples from the southern spur were well below their respective MTCA cleanup levels. One sample (SP-9-Comp A) contained lead at 267 mg/kg, only slightly higher than the MTCA Method A cleanup level of 250 mg/kg.

Buildings 1 and 2 General Excavation Area Investigation (Adjacent):

- The Adobe Development required that a large portion of the site be excavated to allow the construction of the basement level parking garage.

- Twenty-one (21) test pits were excavated to depths of approximately 10 feet bgs throughout the general excavation area to evaluate the physical characteristics of the soil/fill and to assess potential for impacted soil. The test pits were also excavated concurrent with the demolition of the previous buildings at the site which allowed the test pits to be located within the former building limits.

- The greatest amount of buried wood debris and construction debris was encountered beneath former Buildings A and B and in the eastern end of Building E and D. Former pilings were encountered beneath Buildings D, E, and F.

- Soil samples were selectively collected from 19 of the test pits for laboratory analysis based on field screening using a photoionization detector (PID) and other field screening techniques. Soil samples were also collected from stockpiled soil from test pits in former Buildings B and C and soil excavated from the western end of former Building F.

- All soil samples were analyzed for TPH-G, and benzene, toluene, ethylbenzene and total xylenes (BTEX), HVOCs, and PAHs. Selected soil samples were also analyzed for PCBs and RCRA metals.

- Samples of water that accumulated in three of the test pits were also analyzed for the same parameters except for RCRA metals.

- Laboratory results indicated that most of the analytes, when detected, were present at low concentrations, typically below applicable MTCA cleanup levels. TPH-G was detected in two of the 47 samples analyzed at concentrations of 72.3 mg/kg and 4,660 mg/kg. Benzene, toluene, and ethylbenzene were not detected in any of the samples and total xylenes were detected in three samples at concentrations ranging from 0.16 mg/kg to 14.1 mg/kg; below the MTCA Method A cleanup level of 20 mg/kg. TPH-D and TPH-O were detected in 24 of the 47 and 26 of 47 samples, respectively. TPH-D and TPH-O concentrations ranged from 10.2 mg/kg to 258 mg/kg and 26.9 mg/kg to 818 mg/kg, respectively. One TPH-D sample and one two TPH-O samples were reported at a concentrations above their respective Method A cleanup levels. HVOCs and PCBs were not detected in any of the samples analyzed. Metals concentrations, when detected, were below their respective MTCA cleanup levels.

- The most prevalent of analytes detected was PAHs; detected in 34 of the 47 samples analyzed. Concentrations of non-carcinogenic PAHs were below respective MTCA cleanup levels. When detected, concentrations of CPAHs were typically less than 0.50 mg/kg, which is less than the MTCA Method A residential cleanup level of 1 mg/kg. Seven samples were reported with concentrations of CPAHs exceeding 1 mg/kg, although one sample contained CPAHs at a concentration exceeding the

MTCA Method A Industrial cleanup level of 20 mg/kg. EMCON noted that the seven samples containing elevated CPAHs concentrations were obtained from locations with noticeable amounts of wood debris, including possible creosote treated timbers and pilings.

- Laboratory results for the three pit water and two dewatering sump water samples indicated that TPH-G, TPH-D, and/or TPH-O were detected in at least three of the samples at concentrations ranging from 0.0513 to 13.8 mg/L. Benzene and toluene were not detected in any of the samples and ethylbenzene and total xylenes were detected in one sample at a concentration of 0.0123 mg/L and 0.0735 mg/L, respectively.

- HVOCs were not detected in any of the water samples. CPAHs were detected in four of the samples at concentrations of 0.000377 mg/L to 0.1159 mg/L. EMCON noted that these samples were obtained from open excavations or a dewatering sump, and were extremely turbid, and should not be considered representative of groundwater conditions.

Future Building 3 Area (subject property):

- The current building (known as Building 3) was to be situated in approximately the location of former Building A. Excavation of the test pits was completed after the former Buildings A and B were demolished and the foundations and floor slabs had been completely removed.

- Eight test pits (DTP 30 through DPT 37) were excavated to depths ranging from 7 to 9.5 feet bgs in the area of the current building. The test pits were excavated after the former Buildings A and B were demolished.

- Test pits DTP-30 through DTP-32 were located north of building A, north of the railroad spur. Soil conditions identified an organic layer with wood at 4 to 8 feet bgs in DEP-30 and from 2 to 2.5 feet in DTP-31. Wood waste, bricks, and concrete were also identified within 4 feet of the surface. No detectable PID readings were identified in any of the pits.

- Test pits DEP-33 through DP-37 were located within the footprint of the former building A. Soil conditions described fine to medium sand with occasional concrete and brick debris. Uncharacteristic organic odor (non-petroleum) was detected in DTP-35 and DTP-37. No detectable PID readings were identified in any of the pits.

- Soil samples were selectively collected from each of the eight test pits at various depths. In test pits where relatively consistent soil types were encountered, a composite soil sample was collected. If a soil type was encountered that was not consistent with the sands typically found at the site, a composite sample representing that interval was collected.

- All soil samples were analyzed for TPH-G, and benzene, toluene, ethylbenzene and total xylenes (BTEX), HVOCs, and PAHs. Metals and PCBs were not analyzed

because the results from Buildings 1 and 2 soil samples indicated that these compounds were not of concern at the site.

- Laboratory results indicated that most of the analytes, when detected, were present at low concentrations, typically below applicable MTCA cleanup levels. TPH-D and TPH-O were both detected in six of the seven samples at concentrations ranging from 12.4 to 232 mg/kg and 31.6 to 178 mg/kg, respectively. Only one sample (DTP-36-6.5) contained TPH-D at a concentration (232 mg/kg) slightly above the MTCA Method A cleanup level of 200 mg/kg. BTEX and HVOCs were not detected in any of the samples analyzed. AEI notes that the current MTCA Method A cleanup level for TPH-D is 2,000 mg/kg and therefore, no samples would be above the MTCA Method A cleanup levels.

- PAHs were detected at low concentrations in all of the samples analyzed. Concentrations of non-carcinogenic PAHs were well below the MTCA Method A Industrial level (20 mg/kg); however, one sample (DTP-37-8) contained CPAHs at a concentration of 1.4387 mg/kg, slightly above the MTCA Method A residential cleanup level of 1 mg/kg. AEI notes that the current MTCA Method A cleanup level for CPAHs is 2 mg/kg for industrial properties.

Independent Remedial Actions:

- Independent remedial actions at the former rail spurs and within the Building 1 and 2 general excavation area limits was conducted prior to the soil excavation for site development to ensure that impacted soils were handled appropriately and disposed of at an approved facility. An EMCON field geologist/technician was onsite during the excavation activities to monitor soil quality.

- Following rail soil excavation, a confirmation sample was conducted to confirm underlying soils were not impacted. Five soil samples were collected from the excavation bottom or side walls along the northern rail spur. The samples were analyzed for TPH-D and TPH-O. Results indicated concentrations of TPH-D (non-detect to 26.9 mg/kg) and TPH-O (non-detect to 68 mg/kg) beneath the areas excavated were below their respective Method A cleanup levels of 200 mg/kg.

- Eleven confirmation soil samples were collected from the southern rail spur (adjacent to the south) after excavation. The samples were also analyzed for TPH-D and TPH-O. Laboratory results indicated that samples from the central portion of the southern spur contained TPH at concentrations above Method A levels. As such, an additional two feet was excavated and additional confirmation samples collected. The base of the excavation in this area was completed in a layer of sawdust and other wood-waste with little amounts of soil. Follow up confirmation soil sampling also identified TPH concentrations above the MTCA Method A cleanup level. EMCON noted that these samples were composed primarily of sawdust and wood debris and attributed the elevated TPH concentrations to biogenic effects of the sawdust/wood debris and not related to petroleum hydrocarbons. The excavation filled with water before additional excavation could be accomplished or additional samples obtained.

- The bottom of the southern rail spur excavation was approximately the final grade of the general area excavation, so no further soil was planned for removed. EMCO noted that this area would be covered by the concrete floor slab of the parking garage beneath the building.

- Three areas were identified within the Building 1 and 2 General Excavation Area (adjacent to the subject property) were identified with elevated concentrations of either TPH and/or CPAHs. These areas were identified as DTP-4, DTP-12, and DTP-15/DTP-19. Each of these areas was excavated to depths of 5 to 7 ft bgs and the soil hauled off site for disposal.

- Following excavation, confirmation sampling was conducted to assess underlying soil conditions. Three confirmation soil samples were collected from DTP-4 and analyzed for TPH-G and BTEX. One sample contained TPH-G (8.30 mg/kg) below Method A levels. BTEX was not detected. No further excavation was deemed necessary for this area. Four confirmation soil samples were collected from DTP-12 and analyzed for PAHs. Results indicated CPAH concentrations significantly less than MTCA Method A industrial levels and only slightly higher than residential cleanup levels. No further excavation was deemed necessary for this area. Thirteen confirmation soil samples were collected from DTP-15/DTP-19, and with one exception analyzed for TPH, BTEX, and PAHs. Analysis identified two samples with TPH-G concentrations (249 mg/kg and 2,550 mg/kg respectively) above MTCA Method A cleanup levels. Concentrations of all other analytes, when detected, were below their respective cleanup levels. Over excavation of the area of elevated TPH-G was attempted although groundwater inflow prevented further excavation and sampling. Substantial additional excavation was conducted further east of this location and along the west boundary as part of installing the pile camp for the foundation system. Confirmation soil sampling could not be conducted due to water inflow into these excavations. The area with TPH-G above cleanup levels is located beneath the parking garage concrete floor slab.

- Because of the presence of elevated TPH-G in soil near DTP-15/DTP-19 (adjacent to the subject property), five temporary monitoring wells were installed and water samples collected for TPH and BTEX analysis. TPH-G and TPH-D, when detected, were below the MTCA Method A cleanup level. TPH-O, benzene, and ethylbenzene were not detected in any of the groundwater samples collected. Toluene and/or total xylenes were detected in three water samples in very low concentrations and below their respective MTCA Method A cleanup levels. EMCON found that these data indicate although there appears to be an isolated area of soil containing TPH-G above cleanup levels, this residual impacted soil has not caused groundwater to exceed cleanup levels.

- During the course of the general area excavation, two previously unknown USTs and a third UST known to be present were removed. All of the USTs were believed used for the storage of fuel oil, and appeared to be of steel construction with capacities of 550 to 1,100 gallons. After the USTs were removed and obvious impacted soil excavated, soil confirmation samples were collected from each tank basin. Confirmation soil sample laboratory results indicated residual TPH concentrations in

soil below MTCA Method A cleanup levels for two of the three USTs. Additional excavation was required at the third UST basin. Final confirmation sampling of the third UST basin identified a TPH-D concentration of 249 mg/kg, slightly higher than the cleanup level of 200 mg/kg, but lower than the current cleanup level. EMCON concluded that this concentration was protective of human health and the environment and that no further excavation was necessary.

Conclusions and Recommendations:

- EMCON summarized the work conducted and residual concentrations of TPH and CPAHs on the subject property, and concluded that although some concentrations slightly exceeded MTCA Method A cleanup levels, the materials do not pose a threat to human health or the environment.

- Rail spur stockpiled soil was placed in the Aurora ramp as fill. EMCON found this an acceptable use of the material because the soil will be encapsulated by the street pavement and retaining walls on the sides.

EMCON recommended that if soils are to be removed from the Building 3 area (the subject property) that verification be made with the intended disposal site that the detected concentrations were acceptable.

Report of Phase I Environmental Site Assessment, Lake View at Fremont, 837 North 34th Street, Seattle, WA, prepared by CODA Consulting Group, LLC, dated October 22, 2010

The report was prepared by Coda Consulting Group (CODA) on behalf of Stockbridge Real Estate Funds. The tenants at the time of the assessment included the Institute for Science and Biology and Tableau Software. Coda did not identify the presence of RECs in connection with the subject property with the exception of the following:

- Historically a "tank farm" was identified on a portion of the subject property in the 1905 Sanborn map. The "tank farm" occupied a footprint area of approximately 20' x 20' and was situated between a foundry and an asbestos grinding mill. Based on the redevelopment of the subject property in 2008 that included a three-level subterranean parking garage that covers the entire footprint of the subject property, Coda concluded that any residual impacted soil from former operations would have been discovered and excavated during the construction of the garage. No further assessment was warranted. AEI did not observe the area labeled "tank farm" in the 1905 Sanborn map.

- While there is evidence of historic use of the subject property that may have lead to past impacts of the property, based on construction of the subject building with ventilated subsurface garage parking and the soil removal that took place during construction of this subsurface parking area, residual impacts to the property, if present, would not present a significant risk to the subject property structure. No further assessment was recommended.

The following prior reports were for the adjacent properties; however, they are included in this assessment based on similar historical background relating to the subject property.

Phase I Environmental Site Assessment of Adobe Systems, 701, 703, and 801 North 34th Street, Seattle, WA; prepared by EMG, dated November 8, 2004

This report is for the south and west adjacent properties. EMG's findings relative to the prior and current use of the subject property were similar to those identified during AEI's assessment.

EMG reviewed a prior report, identified as Preliminary Environmental Audit of Burke Industrial Park, prepared by Earth Consultants (EC) from 1987 which was not made available to AEI as part of this assessment. The EC report did not reveal any evidence of recent or on-going contamination of the site as a result of current tenant activities, although some use of hazardous materials was observed. Additionally, EC reported that there were three septic tanks and associated drain fields on the property, in addition to two USTs. A total of five USTs were identified in the Burke Industrial Park. All the tanks had reportedly been removed, except one which was closed in place. The location of the septic tanks was not detailed. The EMCON report (reviewed by AEI) indicated that three fuel oil USTs were removed prior to the construction of the Adobe Systems buildings.

EMG did not identify the presence of RECs or HRECs in connection with the subject property with the exception of the following:

- *"Based on a review of the previous reports, impacted soils exceeding MTCA cleanup levels remain at the Project and at the adjacent property to the east. The impacted areas at the Project are reportedly located beneath areas that have subsequently been developed with the Project buildings and the underground parking garages. As a result, Emcon concluded that any impacted soil would be isolated from direct contact and leaching from the infiltration of precipitation and therefore do not pose a threat to human health or the environment under these conditions. Given this historical use of the Project, the possibility that additional areas of impacted soil and/or groundwater from former operations (and/or the placement of dredge fill) are located at the Project cannot be completely dismissed. However, no additional specific areas of concern associated with the historic tenant operations have been identified, other than what was previously investigated. EMG contacted the Washington Department of Ecology to obtain additional information regarding this site. According to Mr. Joe Hickey, this site was referred to as the Quadrant Lake Union Center Fremont Avenue site (Ecology ID 2299) and was previously listed on the CSCSL database. Mr. Hickey indicated that the site was removed from the CSCSL database after a site hazard assessment was completed and the site was issued a no further action status on December 29, 1998. Based on the above information, no further action or investigation appears warranted at this time."*

- *"Soils beneath the future subject property Building 3 (the adjacent parcel to the east of the 701 building) were also assessed and based on the concentrations detected in*

the soil samples collected (one of which was found to exceed MTCA cleanup levels) and the existing use of the site, it was determined that these materials do not pose a threat to human health or the environment; however, it was recommended that if soils in the area beneath the adjacent parcel are to be removed as part of future development that the intended disposal facility be contacted to verify and ensure that the detected concentration levels are acceptable. Based on the above information, no further action or investigation is recommended at this time regarding adjacent properties."

The sole recommendation provided by EMG was that the source of moisture observed in Building 701 (off-site) be addressed to prevent future mold problems.

Phase I Environmental Site Assessment, Fremont Lake Union Center, 701, 703, and 801 North 34th Street, Seattle, WA; Prepared by Golder Associates Inc. (Golder), dated November 21, 2011

This report is for the south and west adjacent properties.

Golder did not identify the presence of RECs in connection with the subject property. An HREC was identified in connection with an independent remedial action that was conducted on the subject property prior to development of the existing improvements, consistent with information previously detailed in this report.

4.2.3 AERIAL PHOTOGRAPH REVIEW

AEI Consultants reviewed aerial photographs of the subject property and surrounding area. Aerial photographs were reviewed for the following years: 1956, 1965, 1977, 1985, 1990, 2006, and 2010.

Date(s)	Scale	Subject Property Description	Surrounding Area Descriptions
1956	1:750	A railway is present on the north section of the property. Two rectangular buildings, that correlate to the dry kilns noted in the 1950 Sanborn map, extending out from a building perpendicular to North 34th Street.	**North:** North 34th Street with apparent commercial structures beyond **South:** Undeveloped with floating docks beyond **East:** Aurora Bridge (suspended), undeveloped areas, Lake Union, with commercial/industrial buildings and floating docks beyond **West:** Undeveloped to the northwest and commercial structure to the southwest

1965	1:500	The railway is not visible in this photograph. Portions of three commercial buildings occupy the property: a rectangular building on the east, a long rectangular building in the center and a building that parallels North 34th Street on the northwest. The buildings overlap onto the south and west adjacent property.	**North:** North 34th Street with apparent commercial structures beyond **South:** Drive thru lane with commercial buildings beyond **East:** Aurora Bridge (suspended) with a roadway that appears to go under the bridge, with Lake Union and marinas beyond **West:** Commercial buildings that adjoining the subject property building with an open area beyond
1977	1:500	The property appears essentially the same as observed in the 1965 photograph.	**North:** North 34th Street with apparent commercial structures beyond **South:** Drive thru lane with commercial buildings beyond **East:** Aurora Bridge (suspended) with a roadway that appears to go under the bridge, with Lake Union and marinas beyond **West:** Commercial buildings that adjoining the subject property buildings with an additional building added to the west
1985	1:500	The property appears essentially the same as observed in the 1977 photograph.	**North:** North 34th Street with apparent commercial structures beyond **South:** Drive thru lane with commercial buildings beyond **East:** Aurora Bridge (suspended) with a roadway that appears to go under the bridge, with Lake Union and marinas beyond **West:** Commercial buildings that adjoining the subject property buildings
1990	1:500	The property appears essentially the same as observed in the 1985 photograph.	**North:** North 34th Street with apparent commercial structures beyond **South:** Drive thru lane with commercial buildings beyond **East:** Aurora Bridge (suspended) with a roadway that appears to go under the bridge, with Lake Union and marinas beyond **West:** Commercial buildings that adjoining the subject property buildings

2006	1:500	The property appears used for parking on the northern section and is a vacant lot on the southern section.	**North:** North 34th Street with apparent commercial structures beyond **South:** Commercial U-shaped building with Lake Washington Ship Channel beyond **East:** Aurora Bridge (suspended) with a roadway that appears to go under the bridge, a trail, a parking lot, with Lake Union, a commercial building and marinas beyond **West:** Commercial building
2010	1:500	The property appears similar to that observed during the site reconnaissance. The property is developed with a commercial building.	**North:** North 34th Street with apparent commercial structures beyond **South:** Commercial U-shaped building with Lake Washington Ship Channel beyond **East:** Aurora Bridge (suspended) with a roadway that appears to go under the bridge, a trail, a parking lot, with Lake Union, a commercial building and marinas beyond **West:** Commercial building

If available, copies of reviewed aerial photographs are included in the appendices.

4.2.4 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of EDR's collection of Sanborn Fire Insurance maps.

Sanborn maps were available and reviewed for the years 1893, 1905, 1919, 1950, and 1968.

Date(s)	Subject Property Description	Surrounding Area Descriptions
1893	The subject property is primarily occupied by Lake Union with a railway located on the northern section of the property.	**North:** Ewing Street with dwellings and a commercial structure beyond. **South:** Lake Union **East:** Lake Union to the southeast. **West:** Railroad Depot Platform to the northwest and Fremont Milling Company Saw Mill to the southwest with associated outbuildings present. Buildings are labeled as Planing Mill, Saw Mill, Machine Shop Woodwork, Steam Dry Kiln, and a sawdust bunker.

1905	The railway is still present on the north section of the property and the southeast section is still occupied by Lake Union. Magnesium Asbestos Supply Company occupies the central part of the property and is labeled as powered by Steam. Associated buildings include a maintenance shop and warehouse. Pacific Iron and Steel Works occupy the northwest section of the property.	**North:** Ewing Street with dwellings and a commercial structure beyond **South:** Lake Union and an area marked platform on piles over water line **East:** Lake Union to the southeast **West:** Railroad Depot Platform to the northwest and Bryant Lumber and Shingle Mill Company Saw Planing and Lathe Mill to the southwest
1919	The railway is still present on the north section of the property. All buildings have been demolished and the site is utilized for lumber storage for the southwest adjacent, lumber and shingle mill.	**North:** Ewing Street with one dwelling beyond **South:** Lumber storage with Lake Union beyond **East:** Lumber storage with Lake Union beyond **West:** Railroad Depot Platform to the northwest and Bryant Lumber and Shingle Mill Company Saw Planing and Lathe Mill to the southwest
1950	A railway is still present on the north section of the property. Two dry kilns and a lumber shed occupy the central section of the property. A steel bridge continuing Aurora Avenue North is present over North 34th Street.	**North:** North 34th Street (formerly Ewing Street with commercial structures beyond. **South:** Undeveloped with Lake Union beyond **East:** Undeveloped and a steel bridge over Aurora Avenue North **West:** No structures to the northwest and a structure labeled planning, sorting, and re-saw to the southwest
1968	A railway is still present on the north section of the property. A roofing warehouse is located immediately south of the railway at the northwest section of the property. Two buildings labeled Plumbing Supplies Warehouse and General Store and one unlabeled building are south of the railway.	**North:** North 34th Street with commercial structures beyond **South:** Undeveloped with buildings labeled Wholesale Drugs (711 North Northlake Way, Tile Warehouse beyond **East:** Bridge over Aurora Avenue North and beyond not shown on map **West:** Buildings labeled General Store (730 North Northlake Way with a parts warehouse beyond

4.2.5 CITY DIRECTORIES

A search of historic city directories as provided by EDR was conducted for the subject property and adjoining properties. Directories were available and reviewed for the years 1925, 1930, 1935, 1940, 1944, 1951, 1955, 1960, 1966, 1970, 1975, 1980, 1986, 1990, 1996, and 2005. The following table summarizes the results of the city directory search.

City Directory Search Results

Date(s)	Occupant Listed (Subject Property)	Occupant Listed (Adjacent Sites)
1925	No listing	**742-744 N 34h Street –** Fremont Auto Service Fremont Electric Co

The subject property and surrounding areas were predominantly occupied for commercial and industrial purposes, as previously discussed.

4.2.6 OTHER MAPS AND DATA

No other maps or data were utilized during this assessment.

4.2.7 CHAIN OF TITLE

In accordance with our approved scope of services, a Chain of Title search was not performed as part of this assessment.

4.3 PROPERTIES AND AREAS SURROUNDING THE SITE

4.3.1 CURRENT USES OF ADJACENT PROPERTIES

The subject property is located in a commercial area of Seattle. The immediately surrounding properties consist of the following:

The immediately surrounding properties consist of the following:

Direction from Site	Address-Tenant/Use
North	North 34th Street, followed by Carquest Auto Parts (744 North 34th Street), A Dance Studio, Istanbul Imports, Holistic Healing Center, Coffee Shop, History House, and Sculpture Garden (754-770 North 34th Street)
South	Canal Street followed by Fremont Lake Union Center Water Front Building (801 North 34th Street)
East	Burke Gilman Trail, a parking lot, North Northlake Way, followed by Lake Washington Rowing Club and Lake Union
West	Freemont Lake Union Center, Plaza Building (701-703 North 34th Street)

The adjacent site to the north, 744 N 34th Street, was identified in the regulatory database as a Historical Auto Station, RCRA-NonGen, FINDS, and ALLSITES site. The adjacent site to the north, 742 N 34th Street, was identified in the regulatory database as a Historical Auto Station site. The adjacent site to the north, 736 N 34th Street, was identified in the regulatory database as a Historical Cleaners site. The adjacent site to the south, 735 N Northlake Way, was identified in the regulatory database as a FINDS, ALLSITES, and RCRA-NonGen site. The adjoining site to the south, 711 N Northlake

Way, was identified in the regulatory database as a RCRA-NonGen, FINDS, and ALLSITES site. As further discussed in Section 4.4.1, these sites are not expected to represent an environmental concern.

4.3.2 PAST USES OF ADJACENT PROPERTIES

Reasonably ascertainable standard historical sources were used to determine previous uses and occupancies of the properties located adjacent to the subject property. A chronological summary of historical data found is as follows:

Date Range	Source(s)	Adjacent Properties Use
1895-1905	Sanborn Maps	**North:** Ewing Street with dwellings and a commercial structures beyond **South:** Lake Union and an area marked platform on piles over water **East:** Lake Union to the southeast **West:** Railroad Depot Platform to the northwest and Bryant Lumber and Shingle Mill Company Saw Planing and Lathe Mill
1919	Sanborn Map	**North:** Ewing Street with one dwelling beyond **South:** Lumber storage with Lake Union beyond **East:** Lumber storage with Lake Union beyond **West:** Railroad Depot Platform to the northwest and Bryant Lumber and Shingle Mill Company Saw Planing and Lathe Mill
1950-1956	Sanborn Map, Aerial Photograph, City Directories	**North:** Ewing Street with commercial structures beyond. Ewing Street has been renamed North 34th Street **South:** Undeveloped with Lake Union beyond **East:** Undeveloped and a steel bridge over Aurora Avenue North **West:** No structures to the northwest and a structure labeled planning and sorting to the southwest.
1965-1968	Aerial Photographs, Sanborn Map, City Directories	**North:** North 34th Street with apparent commercial structures beyond **South:** Drive thru lane with commercial buildings beyond **East:** Aurora Bridge (Suspended) with a roadway that appears to go under the bridge with marinas beyond. **West:** Commercial buildings adjoining the subject property building with an open area beyond

Date Range	Source(s)	Adjacent Properties Use
1977	Aerial Photograph, City Directories	**North:** North 34th Street with apparent commercial structures beyond **South:** Drive thru lane with commercial buildings beyond **East:** Aurora Bridge (suspended) with a roadway that appears to go under the bridge, with Lake Union and marinas beyond **West:** Commercial buildings adjoining the subject property buildings with an additional building added to the west
1985	Aerial Photograph, City Directories	**North:** North 34th Street with apparent commercial structures beyond **South:** Drive thru lane with commercial buildings beyond **East:** Aurora Bridge (suspended) with a roadway that appears to go under the bridge, with Lake Union and marinas beyond **West:** Commercial buildings adjoining the subject property buildings
1990	Aerial Photograph, City Directories	**North:** North 34th Street with apparent commercial structures beyond **South:** Drive thru lane with commercial buildings beyond **East:** Aurora Bridge (suspended) with a roadway that appears to go under the bridge, with Lake Union and marinas beyond **West:** Commercial buildings adjoining the subject property buildings
2006	Aerial Photograph, City Directories	**North:** North 34th Street with apparent commercial structures beyond **South:** Commercial U-shaped building with Lake Washington Ship Channel beyond **East:** Aurora Bridge (suspended) with a roadway that appears to go under the bridge, a trail, a parking lot, with Lake Union, a commercial building and marinas beyond **West:** Commercial building
2010-present	Aerial Photographs, City Directories, Site Reconnaissance	**North:** North 34th Street with apparent commercial structures beyond **South:** Commercial U-shaped building with Lake Washington Ship Channel beyond **East:** Aurora Bridge (suspended) with a roadway that appears to go under the bridge, a trail, a parking lot, with Lake Union, a commercial building and marinas beyond **West:** Commercial building

4.3.3 CURRENT USES OF SURROUNDING AREAS

The surrounding areas within 0.25-mile of the subject property consist of commercial/retail properties, lake-front properties, moorage, boat houses, Lake Union, and the Lake Washington Ship Canal.

4.3.4 PAST USES OF SURROUNDING AREAS

Historically, the surrounding areas within 0.25-mile of the subject property consisted of commercial and lumberyard properties from the late-1800s until the 1950s. From the 1950s through the 1990s the surrounding areas included commercial, lumberyard, and warehouse storage structures and waterfront properties. From the 1990s until the present, the surrounding areas have largely been commercial properties.

4.4 ENVIRONMENTAL RECORDS REVIEW AND INTERVIEWS

4.4.1 MAPPED DATABASE RECORDS REVIEW

AEI contracted Environmental Data Resources (EDR) to conduct a search of federal, state, tribal, and local databases containing known and suspected sites of environmental contamination. The number of listed sites identified within the approximate minimum search distance (AMSD) from the Federal and State environmental records database listings specified in ASTM Standard E 1527-05 are summarized in the following table. A copy of the regulatory database report is included in Appendix B of this report.

The subject property was identified in the regulatory database as a Confirmed and Suspected Contaminated Sites Listing – No Further Action (CSCSL-NFA), Facility Index System (FINDS), ALLSITES site, and is further discussed below.

In determining if a site is a potential environmental concern to the subject property in the records summary table below, AEI has applied the following criteria to classify the site(s) as low concern: 1) the site(s) only hold an operating permit (which does not imply a release), 2) the site(s) have been granted "No Further Action" by the appropriate regulatory agency, and/or 3) based upon AEI's review, the distance and/or topographic position relative to the subject property reduce the level of risk associated with the site(s).

Database	Search Distance (Miles)	Subject Property Listed	Adjacent Property Listed	Total Number of Listings	Potential Environmental Concern to the Subject Property (Yes/No)
NPL	1	No	No	0	
DELISTED NPL	0.5	No	No	0	
CERCLIS	0.5	No	No	1	No. This site is located over 2,000 feet to the east southeast of the subject property in a topographically crossgradient location.
CERCLIS NFRAP	0.5	No	No	3	No. These sites are located over 900 feet from the subject property in topographically cross-gradient locations.

Database	Search Distance (Miles)	Subject Property Listed	Adjacent Property Listed	Total Number of Listings	Potential Environmental Concern to the Subject Property (Yes/No)
RCRA CORRACTS	1	No	No	0	
RCRA-TSD	0.5	No	No	0	
RCRA LG-GEN, SM-GEN, CESQGs, VGN, NLR	TP/ADJ	No	Yes	3	No. Three adjacent properties are listed as non-generators and are discussed below.
US ENG CONTROLS	TP	No	No	0	
US INST CONTROLS	TP	No	No	0	
ERNS	TP	No	No	0	
STATE/TRIBAL HWS (includes HSL and CSCSL)	1	Yes	Yes	44	The subject property is listed as a CSCSL NFA site and is discussed below. The remaining listings are located in topographically cross or down gradient locations relative to the subject property and are not expected to represent a concern.
STATE/TRIBAL SWLF	0.5	No	No	1	No. The landfill is located over 0.25 miles from the subject property in a cross gradient location.
STATE/TRIBAL REGISTERED STORAGE TANKS	TP/ADJ	No	No	0	
STATE/TRIBAL LUST	0.5	No	No	8	No. These sites are not considered potential environmental concerns based on their relative distance and/or hydrologic location to the subject property.
STATE/TRIBAL ENG-INST CONTROLS	TP	No	No	0	

Database	Search Distance (Miles)	Subject Property Listed	Adjacent Property Listed	Total Number of Listings	Potential Environmental Concern to the Subject Property (Yes/No)
STATE/TRIBAL VCP	0.5	No	No	9	No. These sites are not considered potential environmental concerns based on their relative distance and/or hydrologic location to the subject property.
STATE/TRIBAL BROWNFIELD	0.5	No	No	0	
ORPHAN	N/A	No	No	0	No. None of the identified orphan sites are located in the immediate vicinity (500-feet) of the subject property, and therefore, these sites are not expected to represent an environmental concern.
NON-ASTM DATABASES	TP/ADJ	Yes	Yes	5	No. The subject property and adjacent properties to the north are discussed below.

Site Name: Quadrant Lake Union Center Fremont Ave Database(s): CSCSL-NFA, ALLSITES, FINDS Address: 3307 Fremont Avenue N, Seattle, WA Distance: Subject Property & Adjacent Direction: Subject Property & Adjacent
Comments: This listing is related to the remedial action which occurred on the property in 1998. The listing is described as undergoing an independent cleanup and receiving no further action under a site hazard assessment (NFA-SHA) on 12-29-98. The remedial action is further discussed in Section 4.2.2.

Site Name: Lake View Building Database(s): Allsites, FINDS Address: North 34th Street & Fremont Avenue Distance: Subject Property Direction: Subject Property
Comments: This listing is described as a Non-Enforcement final action (NONENFNL) and according to online records occurred in 2007. According to Ecology, this signifies a non-enforcement action (i.e. permit, notice of construction etc.) issued to the respective party indicating the non-enforcement action was taken. This listing may have been related to storm water permit obtained for the purposes of site redevelopment. Based on the available information, this listing does not present an environmental concern.

Site Name: Fremont Electric Co. Database(s): EDR Historical Auto Stations, RCRA Non-Gen, FINDS, and ALLSITES Address: 744 N 34th Distance: Adjacent Property Direction: North
Comments: This listing is for a former company which reportedly had automobile repairing activities in 1935 and 1940. The facility was listed as a RCRA non-generator of hazardous waste in 1996. No violations or releases are reported in the listing. Based on the lack of reported releases, this listing does not present an environmental concern to the subject property.

Site Name: Fremont Auto Service Database(s): EDR Historical Auto Stations Address: 742 N 34th Distance: 100 feet Direction: North
Comments: This listing is for a former company which reportedly had automobile repairing activities in 1925. No violations or releases are reported in the listing. Based on the age of the listing and lack of reported release, this listing does not present an environmental concern to the subject property.

Site Name: Imperial Linen Supply Database(s): EDR Historical Cleaners Address: 736 N 34th Distance: 100 feet Direction: North
Comments: This listing is for a former company which reportedly had potential dry cleaning activities in 1930 through 1944. No violations or releases are reported in the listing. Based on the age of the listing, the lack of reported release, and the prior remedial investigation conducted on the subject property, this listing does not present an environmental concern to the subject property.

Site Name: Speakerlab Database(s): FINDS, ALLSITES, RCRA-NonGen Address: 735 N Northlake Way, Seattle Distance: Adjacent (Former structure) Direction: South (Former structure)
Comments: This listing is for a former occupant of the south adjacent property. The listing is from 1991. No violations are reported in the listing. Due to the lack of violations associated with this listing and subsequent remediation and redevelopment of the adjacent and subject properties with a NFA-SHA, this listing does not present an environmental concern.

Site Name: Sun Cleaners Database(s): EDR Historical Cleaners Address: 720 N 34th Distance: 100 feet Direction: West-northwest

Comments: This listing is for a former company which reportedly had potential dry cleaning activities in 1951. No violations or releases are reported in the listing. Based on the age of the listing, the lack of reported release, and the prior remedial investigation conducted on the subject property, this listing does not present an environmental concern to the subject property.

Site Name: Growing Green Gardens Database(s): FINDS, ALLSITES, RCRA-NonGen Address: 711 N Northlake Way Distance: Adjacent Property (Former structure) Direction: South (Former structure)
Comments: This listing is for a garden supply company that was previously present on the south adjacent property. The listing is from 1988. No violations are reported in the listing. Due to the lack of violations associated with this listing and subsequent remediation and redevelopment of the subject property with a NFA-SHA, this listing does not present an environmental concern.

Site Name: Fremont Bridge Approach Database(s): FINDS, CSCSL, ALLSITES Address: 4th Avenue and Fremont Street Distance: 547 feet Direction: Southwest
Comments: This listing is for a bridge approach at Fremont Avenue and 4th Avenue. This location is on the south side of the Lake Washington Shipping Canal and is therefore separated from the subject property by a hydrologic barrier. Based on its location, this listing does not present an environmental concern to the subject property.

Based on the relative distance from the subject property, inferred direction of groundwater flow, and/or regulatory status, the remaining listed sites are not expected to represent an environmental concern.

4.4.2 REGULATORY AGENCY INFORMATION

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous materials use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to Activity and Use Limitations (AULs), defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

HEALTH DEPARTMENT

AEI contacted the Seattle King County Health Department (SKCHD) for information on the subject property and nearby sites of concern. Files at this agency may contain information regarding hazardous materials storage, as well as information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area.

No information indicating current or prior use or storage of hazardous materials, or the existence of AULs was on file for the subject property with the SKCHD.

Mr. Carsten Thomsen of the SKCHD was contacted by telephone on April 23, 2012 in regards to a No Further Action Letter he had written for the Quadrant Lake Union Center site (subject property, west, and south adjacent properties) in 1999. According to Mr. Thomsen, the SKCHD discontinued their Site Hazard Assessments in 2011, and all documents had been shipped to the Washington Department of Ecology.

In a letter dated January 28, 1999, Mr. Thomsen states that after a site hazard assessment (SHA) of the Quadrant Lake Union Center site was completed by the SKCHD, the Washington Department of Ecology made a determination of no further action (NFA) at the site. A copy of the letter is included in the appendices.

FIRE DEPARTMENT

AEI contacted the Seattle Fire Department (SFD) for information on the subject property and/or nearby sites of concern to identify any evidence of previous or current hazardous material usage.

No information indicating current use or storage of hazardous materials, or the existence of AULs was on file for the subject property with the SFD.

BUILDING DEPARTMENT

AEI visited the Seattle Department of Planning and Development (DPD) for information on the subject property in order to identify historical tenants and property use. Please refer to the following table for a listing of permits reviewed:

Building Permits Reviewed

Year(s)	Owner/Applicant	Description of Permit/Building Use
3201 – 3301 Fremont Avenue North		
1957	N/A	Install 1-6,000-gallon U.G. tank (no location provided)
1960	N/A	Install underground storage tank (no location provided)
1964	N/A	Install U.L. gas storage tank (no location provided)
3201 Fremont Avenue North		
1954	Fremont Dock Company	Plot Plan of Subject Property and adjoining properties to the west prepared for alteration of Machinery Storage Shed. Poor Quality. No hazardous materials depicted.
3301 Fremont Avenue North		
1973	Fremont Dock Company	Plot Plan of Subject Property and adjoining properties to the west. Underground Storage Tanks are described associated with "Unit B" and "Unit D" in the approximate areas where tank removals were depicted in the remedial action report reviewed.
1987	Quadrant Corporation	Plot Plan for Shoreline Permit

Year(s)	Owner / Applicant	Description of Permit / Building Use
		Application.
837 North 34th Street		
2009	Institute for Systems Biology	Tenant Improvements 2nd floor
2009	Tableau Software	Tenant Improvements 4th floor
2011	Ubermind	Tenant Improvements 1st floor
2011	Groundspeak	Tenant Improvements 3rd floor
2011	X2 Impact	Tenant Improvements 2nd floor
2012	Anytime Fitness	Tenant Improvement

Underground storage tanks (USTs) were described in the 1973 Plot Plan for 3201 N Fremont. The structures associated with the tanks were shown in the approximate locations where tank removals reportedly occurred on the Quadrant Lake Union Center site which included the subject property and the west and south adjacent properties. On-site investigation and remedial actions were previously discussed.

PLANNING DEPARTMENT

AEI visited the Department of Planning and Development (DPD) for information on the subject property in order to identify AULs associated with the subject property.

No information indicating the existence of AULs was on file for the subject property with the DPD.

DEPARTMENT OF OIL AND GAS

The Washington State Department of Natural Resources Earth Resources Permit Locations (ERPL) map was reviewed for oil and gas development concerning the Subject Property and nearby properties.

According to the ERPL map, there are no oil or gas wells within 500 feet of the Subject Property. No environmental concerns were noted during the ERPL map review.

OTHER AGENCIES SEARCHED

AEI contacted the Washington Department of Ecology for information on the subject property and nearby sites of concern. Files at this agency may contain information regarding hazardous materials storage, as well as information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area.

Records reviewed at the WDOE were previously discussed.

5.0 SITE RECONNAISSANCE AND INVESTIGATION

On April 17, 2012 a site reconnaissance of the subject property and adjacent properties was conducted by Ms. Adele Brandl of AEI in order to obtain information indicating the likelihood of RECs at the subject property and adjacent properties as specified in ASTM Standard Practice E1527-05 §8.4.2, 8.4.3 and 8.4.4. The weather at the time of the inspection was cloudy and 50 degrees. During the onsite reconnaissance, AEI was accompanied by Mr. Brian Herzog, Head of Security. During the onsite reconnaissance, AEI inspected 100% of the total units and all common areas. However, due to the size of the buildings, not all interior areas of the buildings were visually inspected.

5.1 GENERAL SITE CHARACTERISTICS

5.1.1 SOLID WASTE DISPOSAL

The subject property is serviced by Waste Management.

5.1.2 SEWAGE DISCHARGE & DISPOSAL

Potable water and sewage disposal are provided by the Seattle Public Utilities.

5.1.3 SURFACE WATER DRAINAGE

The subject property slopes predominantly to the south toward the Lake Washington Ship Canal. Site surface water drainage occurs via several storm drains observed throughout the subject property which flow to the municipal system. A storm drain on the east side of the building was labeled “drains to stream”. Storm drains in the garage area reportedly flow to P3 where the storm water is connected to the storm water collection system for the overall complex via sump pumps and discharged to the sanitary sewer. No hazardous substances or petroleum products were noted in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent an environmental concern.

5.1.4 HEATING AND COOLING

Heating and cooling systems on the subject property are fueled by gas by Puget Sound Energy and electricity provided by Seattle City Light.

5.1.5 WELLS AND CISTERNS

No records of wells or cisterns were identified during this assessment. Additionally, no signs of these features were observed during the site reconnaissance.

5.1.6 WASTEWATER

With the exception of sanitary waste, wastewater is not generated from on-site operations.

5.1.7 ADDITIONAL SITE OBSERVATIONS

No other site observations were noted.

5.2 ENVIRONMENTAL HAZARDS

5.2.1 HAZARDOUS/REGULATED SUBSTANCES/WASTES AND PETROLEUM PRODUCTS USED OR STORED AT SITE

No hazardous or regulated substances, hazardous wastes, or petroleum products were observed on the property during the site reconnaissance, with the following exceptions:

Parking Garage Level P-2
- Janitorial Supply Room with a 2.5-gallon container of gasoline (used for a blower) stored on the concrete floor.

Small retail (quart size) janitorial supplies and cleansers were observed in various Janitorial Supply Room and office storage rooms.

No staining or evidence of releases was identified in connection with any of the above-listed materials, and therefore, these materials are not expected to represent an environmental concern.

5.2.1.1 LABELED CONTAINERS AND DRUMS

Labeled containers observed on the property are described above in Section 5.2.1.

5.2.1.2 UNLABELED CONTAINERS AND DRUMS

No unlabeled containers or drums were observed on the property during the site reconnaissance.

5.2.1.3 DISPOSAL LOCATIONS OF REGULATED/HAZARDOUS WASTES

The subject property does not generate hazardous waste.

5.2.2 EVIDENCE OF RELEASES

No evidence of any releases was observed during AEI's site reconnaissance.

5.2.3 POLYCHLORINATED BIPHENYLS (PCBS)

Toxic polychlorinated biphenyls (PCBs) were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

One pad-mounted transformer was observed on the subject property during the site inspection. The transformer is owned and operated by Seattle City Light, and based on the presumed date of installation, is not expected to be PCB containing. Federal Regulations (40 CFR 761. Subpart G) require any release of material containing greater than 50 ppm PCB and occurring after May 4, 1987, be cleaned up by the Owner (Seattle City Light) following the United States Environmental Protection Agency's (USEPA) PCB spill cleanup policy. Since the subject property was developed in 2008, PCB-containing transformers should be of low concern. No spills, staining or leaks were observed on or around the transformer. Based on the good condition of the equipment, the transformer is not expected to represent an environmental concern.

5.2.4 ASBESTOS CONTAINING MATERIALS (ACM)

Based on the construction date of the subject property building, an assessment for suspect asbestos-containing materials (ACMs) was beyond the scope of work for this investigation.

5.2.5 RADON

Based on the non-residential use of the subject property building, a radon assessment was beyond the scope of work for this investigation.

5.2.6 LEAD-BASED PAINT

Based on the construction date and/or non-residential use of the subject property building, a lead-based paint assessment was beyond the scope of work of this investigation. Based solely on the age of the building, lead-based paint is not expected to be present.

5.2.7 LEAD IN DRINKING WATER

The Seattle Public Utilities supplies potable water to the subject property. The most recent water quality report states that lead levels in the areas water supply did not exceed action levels and therefore are well within standards established by the USEPA. Based on the non-residential use of the subject property and since potable water for the subject property is supplied by the local municipality, an assessment for lead in drinking water was beyond the scope of this investigation.

5.2.8 LANDFILLS

No evidence of on-site land filling activities was noted. No evidence of the former presence of landfills onsite was discovered during the research performed for this assessment.

5.2.9 PITS, PONDS, LAGOONS, DRYWELLS, SUMPS, AND CATCH BASINS

No evidence of any pits, ponds, lagoons, drywells, sumps or catch basins was noted onsite.

5.2.10 ON-SITE ABOVEGROUND OR UNDERGROUND STORAGE TANKS (ASTS/USTS)

No evidence of any on-site ASTs or USTs was observed during AEI's site reconnaissance.

5.2.11 RADIOLOGICAL HAZARDS

No indication of the presence of any radiological hazards was noted onsite.

5.2.12 LIMITED MOLD INSPECTION

Molds are simple, microscopic organisms, which can often be seen in the form of discoloration, frequently green, gray, white, brown or black. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problem remains undiscovered or is not addressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting often play host to such growth. Mold spores primarily cause health problems through the inhalation of mold spores or the toxins they emit when they are present in large numbers. This can occur primarily when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

AEI Consultants observed interior areas of the subject building in order to identify the significant presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to mold appears to be warranted at this time.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Additional areas of mold not observed as part of this limited assessment, possibly in pipe chases, HVAC systems and behind enclosed walls and ceilings, may be present on the subject property.

5.2.13 ADDITIONAL HAZARD OBSERVATIONS

No additional hazards were observed during the site reconnaissance.

5.3 INTERVIEWS

Pursuant to ASTM E1527-05, the following interviews were performed during this investigation in order to obtain information indicating RECs in connection with the subject property.

INTERVIEW WITH OWNER

The property owner referred AEI to the key site manager, identified below.

INTERVIEW WITH KEY SITE MANAGER

The key site manager Mr. Steve Mace, Property Manager with Colliers International, was interviewed on April 18, 2012. Mr. Mace has been associated with the subject property since approximately late 2011. Mr. Mace provided general information regarding current operations at the subject property and was unaware of any prior environmental conditions associated with the subject property.

Mr. Mace was asked if he was aware of any of the following:

Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property.		Yes	**X**	No
Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.		Yes	**X**	No
Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.		Yes	**X**	No
Any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality.		Yes	**X**	No

PAST OWNERS, OPERATORS AND OCCUPANTS

Interviews with past owners and occupants regarding historical onsite operations were not reasonably ascertainable. However, based on information obtained from other sources including previous reports and historical city directories, it is likely that the information provided by past owners and operators would have been duplicative.

INTERVIEW WITH OTHERS

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this section.

INTERVIEW WITH ADJOINING OR HYDROLOGICALLY UPGRADIENT PROPERTY OWNERS

Interviews with adjoining or hydrologically upgradient property owners were not deemed necessary based on the other resources obtained for this assessment.

5.4 ADDITIONAL SERVICES

No additional services were performed as part of this assessment.

6.0 SUMMARY AND RECOMMENDATIONS

6.1 FINDINGS AND CONCLUSIONS

6.1.1 ON-SITE ENVIRONMENTAL CONCERNS

Recognized Environmental Conditions (RECs) are defined by the ASTM Standard Practice E1527-05 as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. AEI's investigation has revealed the following recognized environmental conditions associated with the subject property or nearby properties:

- No on-site RECs were identified during the course of this assessment.

De Minimis Environmental Conditions include environmental concerns identified by AEI that warrant discussion but do not qualify as RECs, as defined by the ASTM Standard Practice E1528-05. AEI's assessment has revealed the following de minimis environmental conditions associated with the subject property or nearby properties:

- With the exception of residual concentrations discussed in the HREC section below, no on-site de minimis environmental conditions were identified during the course of this assessment.

Business Environmental Risks (BERs) include risks which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the subject property, not necessarily limited to those environmental issues required to be investigated in the standard ASTM scope. BERs may affect the liabilities and financial obligations of the client, the health & safety of site occupants, and the value and marketability of the subject property. AEI's investigation has revealed the following BERs associated with the subject property or nearby properties:

- No BERs were identified during the course of this assessment.

6.1.2 OFF-SITE ENVIRONMENTAL CONCERNS

- No off-site environmental concerns were identified during the course of this assessment.

6.1.3 PREVIOUSLY RESOLVED ENVIRONMENTAL CONCERNS

Historical Recognized Environmental Conditions (HRECs) are defined by the ASTM Standard Practice E1527-05 as an environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently. AEI's investigation has

revealed the following historical recognized environmental conditions associated with the subject property or nearby properties:

- Historical operations of concern at the subject property included the former presence of railway spurs and fuel tanks. Historically, the subject property was part of a larger commercial area that also included the south and west adjacent properties which are currently redeveloped as the Plaza and Waterfront Buildings with underground parking garages. Independent remedial actions were conducted prior to the development of these buildings and the future subject property building in order to address any impacted soil that might be encountered during redevelopment.

  As part of the site investigation process which included the subject property, eight test pits were excavated on the subject property in the area of the northern rail spur, in the location of the current subject property building, ranging from depths from 7 to 9.5 feet bgs. Soil samples were selectively collected from each of the eight test pits at various depths. All soil samples were analyzed for total petroleum hydrocarbons as gasoline (TPH-G), and benzene, toluene, ethylbenzene and total xylenes (BTEX), halogenated volatile organic compounds (HVOCs), and poly-aromatic hydrocarbons (PAHs).

  Laboratory results indicated that most of the analytes, when detected, were present at low concentrations, typically below applicable Model Toxics Control Act (MTCA) cleanup levels. Only one sample (DTP-36-6.5) contained TPH-D at a concentration (232 mg/kg) slightly above the MTCA Method A cleanup level. BTEX and HVOCs were not detected in any of the samples analyzed. AEI notes that the current MTCA Method A cleanup level for TPH-D is 2,000 mg/kg and therefore, no samples would be above the MTCA Method A cleanup levels. The consultant concluded that although some concentrations slightly exceeded MTCA Method A cleanup levels, the materials do not pose a threat to human health or the environment.

  In summary, soil investigation was conducted at the subject property prior to development of the Lake View Building. Soil sampling results were below the current Model Toxics Control Act (MTCA) Method A concentrations for industrial soil cleanup. After completion of the above investigations and remedial activities, the property was evaluated under a Site Hazard Assessment (SHA) and granted No Further Action status (NFA-SHA) by the Seattle King County Health Department (SKCHD) under an interagency agreement with the Washington Department of Ecology (Ecology) in 1998.

  As part of the current development, 20 to 30 feet of materials were excavated for the construction of the three-level parking garage that underlies the office space on the property. Based on the extent of prior sampling activities, extent of subsequent excavation activities, presence of ventilated parking areas beneath occupied areas of the building, and the No Further Action Status of the property, no further investigation appears warranted at this time.

6.2 RECOMMENDATIONS

6.2.1 RECOMMENDATIONS FOR FURTHER INVESTIGATION

AEI's investigation has revealed no evidence of recognized environmental conditions associated with the subject property or nearby properties. AEI recommends no further investigations for the subject property at this time.

6.2.2 RECOMMENDATIONS FOR REGULATORY REPORTING

AEI recommends no further action in connection with regulatory reporting requirements.

6.2.3 RECOMMENDATIONS FOR ANY OTHER ACTIONS

AEI recommends no further investigation or any other actions in connection with the subject property.

7.1 PROJECT PERSONNEL

Adele Brandl, Project Manager

D. Howe Gates, Senior Author

Holly Neber, Senior Author

7.2 REPORT CERTIFICATION

AEI Consultants has performed a Phase I Environmental Site Assessment for the property located at 837 North 34th Street in the City of Seattle, King County, Washington, in conformance with the scope and limitations of ASTM Standard Practice E1527-05 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312). Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report.

By signing this report, the senior author declares that, to the best of his or her professional knowledge and belief, he or she meets the definition of *Environmental Professional* as defined in §312.10 of 40 CFR Part 312.

The senior author has the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. The senior author has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40CFR Part 312.

7.3 CERTIFICATION AND LICENSING

AEI hereby certifies that it is properly licensed and/or certified to perform the work presented in this assessment.

7.4 REPORT RELIANCE

This assessment was performed at the request of McRoberts & Associates, PC ("Client") utilizing methods and procedures consistent with good commercial or customary practices designed to conform with acceptable industry standards. This report may be distributed to and relied upon by Client, its successors and assigns, affiliates and subsidiaries, and together with any rating agency or any issuer or purchaser of any security collateralized or otherwise backed up by a loan upon the project. The independent conclusions represent AEI Consultant's best professional judgment based on the conditions that existed and the information and data

available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided to Client, owner, or their representative has been assumed to be correct and complete.

APPENDIX A

SECTION 8.1: SITE BACKGROUND

8.1.1

PHOTOGRAPHS

1. View of signage on the southeast corner of the property building.

2. View of north elevation facing east.

3. View of north elevation facing southwest across N. 34th Street.

4. View of east elevation facing northwest.

AEI Consultants

5. Vehicular entrance to parking garage and loading dock on the east elevation facing south.

6. View of south elevation facing northwest.

7. View of west elevation and plaza area facing east.

8. View of utility owned transformer located on the northeast building corner.

AEI Consultants

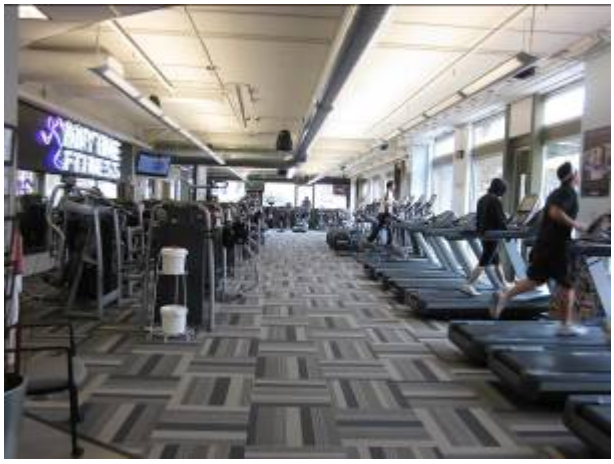

9. View of solid waste dumpsters located in the loading dock area.

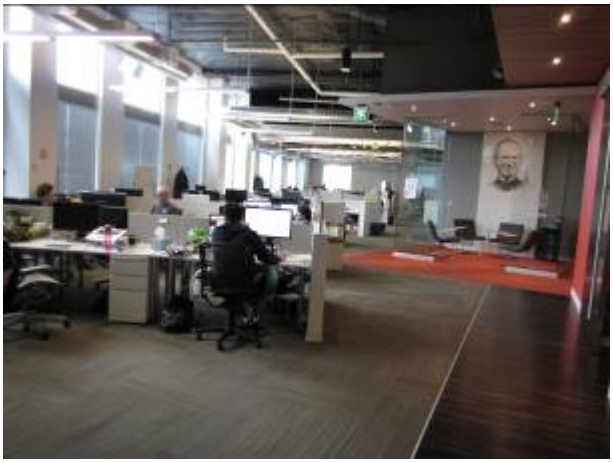

10. View of property vehicular entrance via a ramp off N. 34th Street facing southeast.

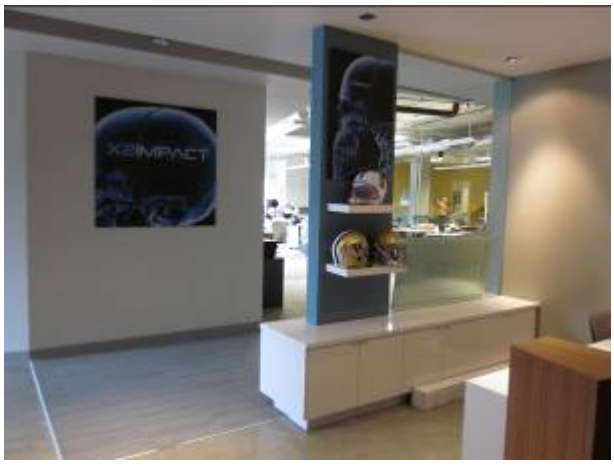

11. View of first floor entrance hallway.

12. View of first floor Anytime Fitness.

13. View of P2 office space occupied by Ubermind.

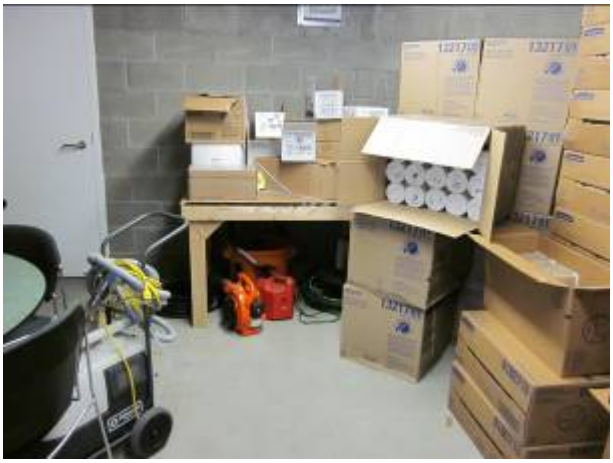

14. View of reception area of second floor tenant X-2 Impact.

15. View of third floor tenant Groundspeak's lunch room.

16. View of fourth floor office space of Tableau software.

17. View of gasoline container in a janitorial room on level P2.

18. View of parking garage level P3.

19. View of roof.

20. View of rooftop traction elevator equipment.

21. View from property facing north.

22. View from property facing east.

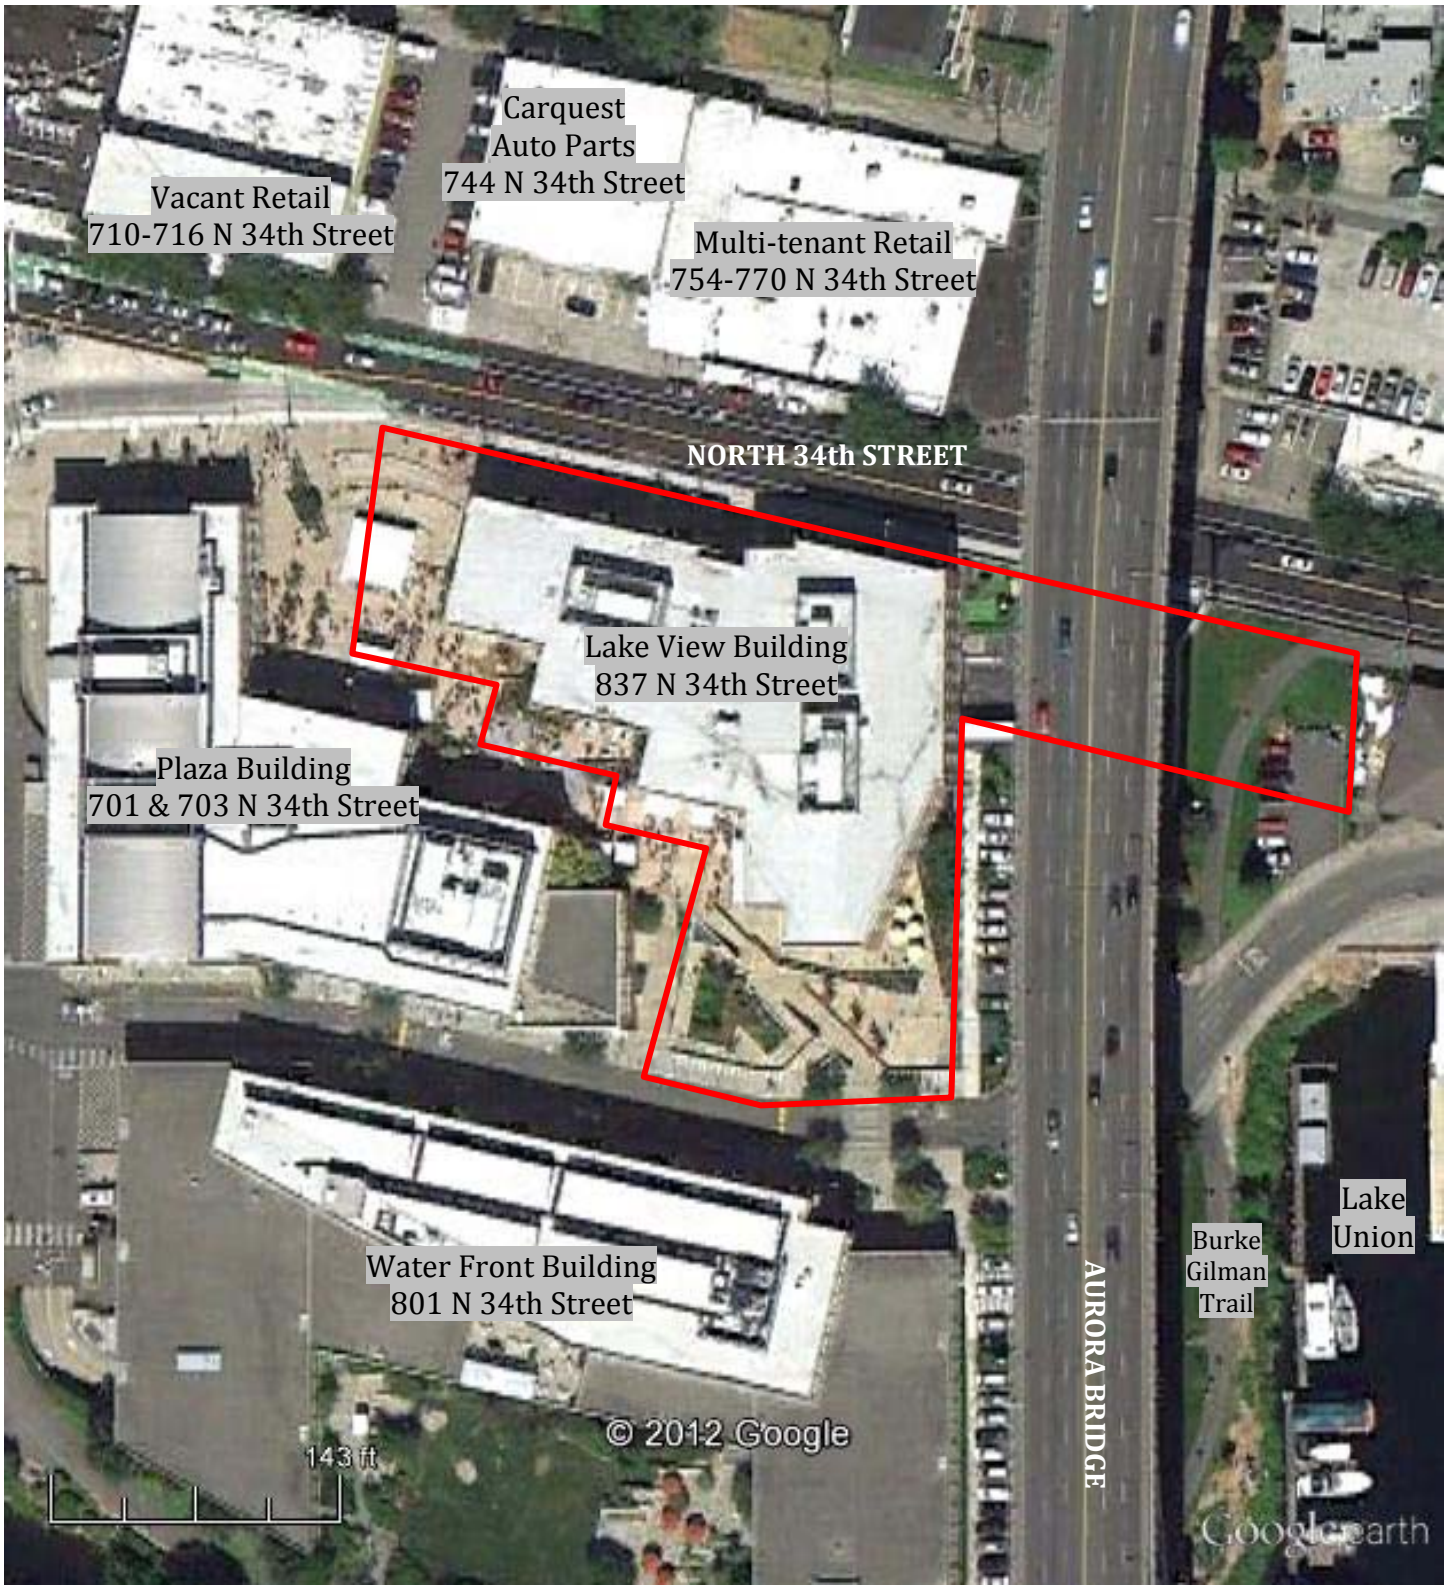

23. View from property facing south toward Water Front Building.

24. View of west and southwest adjoining Plaza Building facing west.

EXECUTIVE SUMMARY

DESCRIPTION

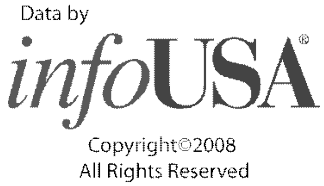

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2005. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR is licensed to reproduce certain City Directory works. Reproduction of City Directories without permission of the publisher may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

TITLE RECORD

COMMITMENT FOR TITLE INSURANCE

Issued by

FIRST AMERICAN TITLE INSURANCE COMPANY

First American Title Insurance Company, herein called the Company, for valuable consideration, hereby commits to issue its policy or policies of title insurance, as identified in Schedule A, in favor of the proposed Insured named in Schedule A, as owner or mortgagor of the estate or interest covered hereby in the land described or referred to in Schedule A, upon payment of the premiums and charges therefor; all subject to the provisions of Schedules A and B and to the Conditions and Stipulations hereof.

This Commitment shall be effective only when the identity of the proposed Insured and the amount of the policy or policies committed for have been inserted in Schedule A hereof by the Company, either at the time of the issuance of the Commitment or by subsequent endorsement.

This Commitment if preliminary to the issuance of such policy or policies of title insurance and all liability and obligations hereunder shall cease and terminate six (6) months after the effective date hereof or when the policy or policies committed for shall issue, whichever first occurs, provided that the failure to issue such policy or policies is not the fault of the Company. This Commitment shall not be valid or binding until countersigned by an authorized officer or agent.

IN WITNESS WHEREOF, the Company has caused this commitment to be signed and sealed, to become valid when countersigned by an authorized officer or agent of the Company, all in accordance with its By-Laws. This Commitment is effective as of the date shown in Schedule A as "Effective Date."

First American Title Insurance Company

(ALSO KNOWN AS LOT C, CITY OF SEATTLE LOT BOUNDARY ADJUSTMENT, MASTER USE PERMIT APPLICATION NO. 9700157, RECORDED UNDER RECORDING NUMBER 9706050452).

SCHEDULE B - SECTION 1
REQUIREMENTS

The following are the Requirements to be complied with:

Item (A) Payment to or for the account of the Grantors or Mortgagors of the full consideration for the estate or interest to be insured.

Item (B) Proper instrument(s) creating the estate or interest to be insured must be executed and duly filed for record.

Item (C) Pay us the premiums, fees and charges for the policy.

Item (D) You must tell us in writing the name of anyone not referred to in this Commitment who will get an interest in the land or who will make a loan on the land. We may then make additional requirements or exceptions

SCHEDULE B - SECTION 2
GENERAL EXCEPTIONS

The Policy or Policies to be issued will contain Exceptions to the following unless the same are disposed of to the satisfaction of the Company.

A. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.

B. Any facts, rights, interest, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of person in possession thereof.

C. Easements, claims of easement or encumbrances which are not shown by the public records.

D. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.

E. (1) Unpatented mining claims; (2) reservations or exceptions in patents or in acts authorizing the issuance thereof; (3) Water rights, claims or title to water; whether or not the matters excepted under (1), (2) or (3) are shown by the public records; (4) Indian Tribal Codes or Regulations, Indian Treaty or Aboriginal Rights, including easements or equitable servitudes.

F. Any lien, or right to a lien, for services, labor, materials or medical assistance theretofore or hereafter furnished, imposed by law and not shown by the public records.

G. Any service, installation, connection, maintenance, construction, tap or reimbursement charges/costs for sewer, water, garbage or electricity.

H. Defects, liens, encumbrances, adverse claims or other matters, if any, created, first appearing in the public records or attaching subsequent to the effective date hereof but prior to the date the proposed insured acquires of record for value the estate or interest or mortgages thereon covered by this Commitment.

SCHEDULE B - SECTION 2
(continued)
SPECIAL EXCEPTIONS

1. Lien of the Real Estate Excise Sales Tax and Surcharge upon any sale of said premises, if unpaid. As of the date herein, the excise tax rate for the **City of Seattle** is at **1.78**%. Levy/Area Code: 0010

   For all transactions recorded on or after July 1, 2005:
   - **A fee of $10.00 will be charged on all exempt transactions;**
   - **A fee of $5.00 will be charged on all taxable transactions in addition to the excise tax due.**

2. General Taxes for the year 2012.

Tax Account No.:		197320-0389-08
Amount Billed:	$	204,575,38
Amount Paid:	$	0.00
Amount Due:	$	204,575,38
Assessed Land Value:	$	8,199,900.00
Assessed Improvement Value:	$	11,556,100.00

3. City liens if any of the City of Seattle.

4. Right and interest of the State of Washington over said premises for the Aurora Avenue Bridge.

5. Release of damages from all liability to adjacent property and property owners for the improvement, enlargement, construction, maintenance and controlling of the waterway and ship canal connecting the waters of Puget Sound by Salmon Bay with Lakes Union and Lake Washington, and for such other general purposes as may be incident thereto; as contained in Final Decree for Condemnation:

Entered:	November 25, 1898
King County Superior Court Case No.:	21942
In Favor of:	King County and the United States of America

6. Right of King County to make necessary slopes for cuts or fills upon said premises for road, acquired by condemnation decree entered in King County Superior Court Cause No. 108136.

7. Reservations contained in Deed from the State of Washington recorded under Recording No. 1423670, reserving all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same.

8. The terms and provisions contained in the document entitled "Grade Release" recorded November 2, 1987 as Recording No. 8711020942 of Official Records.

9. The terms and provisions contained in the document entitled "Release of Damages" recorded November 2, 1987 as Recording No. 8711020943 of Official Records.

10. Side sewer easement, including terms and provisions contained therein:

Location:	Along the line as constructed
Width:	6 feet
Recording Information:	November 2, 1987 under Recording No. 8711020944

11. Reservations and exceptions, including the terms and conditions thereof:

Reserving:	Minerals
Reserved By:	Burlington Northern Railroad Company (formerly named Burlington Northern Inc.,), a Delaware corporation
Recorded:	January 24, 1989
Recording Information:	8901240577

12. The terms, provisions and easement(s) contained in the document entitled "Easement Agreement" recorded March 17, 1992 as Recording No. 9203172094 of Official Records.

13. The terms and provisions contained in the document entitled "Memorandum of Agreement Regarding Building 3:" recorded January 30, 1997 as Recording No. 9701300934 of Official Records.

14. The terms and provisions contained in the document entitled "Memorandum of Agreement" recorded January 30, 1997 as Recording No. 9701300935 of Official Records.

    The terms and provisions contained in the document entitled "Partial Release of Rights" recorded December 14, 1999 as Recording No. 19991214000692 of Official Records.

15. The terms and provisions contained in the document entitled "Memorandum of Agreement" recorded January 30, 1997 as Recording No. 9701300936 of Official Records.

    The terms and provisions contained in the document entitled "Partial Release of Rights" recorded December 14, 1999 as Recording No. 19991214000692 of Official Records.

16. The terms and provisions contained in the document entitled "Memorandum of Drainage Control Plan" recorded April 24, 1997 as Recording No. 9704240619 of Official Records.

17. Terms, covenants, conditions and restrictions as contained in recorded Lot Line Adjustment (Boundary Line Revision) 9700157 :

Recorded:	June 5, 1997
Recording Information:	9706050452

18. The terms and provisions contained in the document entitled "Owner's Covenant" recorded May 14, 1999 as Recording No. 9905141925 of Official Records.

19. Easement, including terms and provisions contained therein:

Recording Information:	October 5, 1999 under Recording No. 19991005000121
In Favor of:	City of Seattle, a municipal corporation
For:	Electric distribution system
Affects:	As described therein

20. Lease made by Fremont Dock Company, a Washington corporation, lessor, to The Quadrant Corporation, a Washington corporation, lessee, for a term of 55 years, and the covenants and conditions as therein contained, as disclosed by Memorandum of Amended and Restated Ground Lease dated March 11, 1998, and recorded October 21, 1999 as Recording No. 19991021000310.

    Said "Memorandum of Amended and Restated Ground Lease" previously recorded on March 12, 1998 as Instrument No. 9803120831.

    Said instruments are an amendment and restatement of Memorandum of Ground Lease recorded June 19, 1987 as Recording No. 8706190721, which was amended by Recording Nos. 9705291950 and 9705291951, recorded May 29, 1997.

    Document(s) declaring modifications thereof recorded January 31, 2001 as Recording No. 20010131000784 of Official Records.

21. Covenants, conditions, restrictions and/or easements:

Recorded:	March 23, 2000
Recording No.:	20000323000174

    Said instrument is a re-recording of that certain Instrument recorded February 23, 1998 as Recording No. 9802231707.

    Document(s) declaring modifications thereof recorded December 20, 1999 and June 22, 2000 as Recording Nos. 19991220000130 and 20000622001160 of Official Records.

22. The terms, provisions and easement(s) contained in the document entitled "Temporary Access Easement and Subordination Agreement" recorded March 7, 2005 as Recording No. 20050307001886 of Official Records.

INFORMATIONAL NOTES

A. Effective January 1, 1997, and pursuant to amendment of Washington State Statutes relating to standardization of recorded documents, the following format and content requirements must be met. Failure to comply may result in rejection of the document by the recorder.

B. Any sketch attached hereto is done so as a courtesy only and is not part of any title commitment or policy. It is furnished solely for the purpose of assisting in locating the premises and First American expressly disclaims any liability which may result from reliance made upon it.

C. The description can be abbreviated as suggested below if necessary to meet standardization requirements. The full text of the description must appear in the document(s) to be insured.

Ptn. Blk 84, Denny and Hoyt's Suppl. Plat, Vol. 3 Pg. 3; Ptn. Lot 1, Blk. 98, Lake Union Shorelands; Ptn SW 1/4, 18-25-04 aka Lot C, BLA No. 9700157, Rec 9706050452

APN: 197320-0389-08

D. According to the application for title insurance, title is to vest in Kilroy Realty Corporation dba Kilroy Realty Northwest Corporation, a Maryland corporation.

Examination of the records discloses no matters pending against said party(ies).

E. A fee will be charged upon the cancellation of this Commitment pursuant to the Washington State Insurance Code and the filed Rate Schedule of the Company.

END OF SCHEDULE B

First American Title Insurance Company
National Commercial Services

COMMITMENT
Conditions and Stipulations

1. The term "mortgage" when used herein shall include deed of trust, trust deed, or other security instrument.

2. If the proposed Insured has or acquires actual knowledge of a defect, lien, encumbrance, adverse claim or other matter affecting the estate or interest or mortgage thereon covered by this Commitment, other than those shown in Schedule B hereof, and shall fail to disclose such knowledge to the Company in writing, the Company shall be relieved from liability for any loss or damage resulting from any act or reliance hereon to the extent the Company is prejudiced by failure to so disclose such knowledge. If the proposed Insured shall disclosure such knowledge to the Company, or if the Company otherwise acquires actual knowledge of any such defect, lien, encumbrance, adverse claim or other matter, the Company at its option, may amend Schedule B of this Commitment accordingly, but such amendment shall not relieve the Company from liability previously incurred pursuant to paragraph 3 of these Conditions and Stipulations.

3. Liability of the Company under this Commitment shall be only to the named proposed Insured and such parties included under the definition of Insured in the form of Policy or Policies committed for, and only for actual loss incurred in reliance hereon in undertaking in good faith (a) to comply with the requirements hereof, or (b) to eliminate exceptions shown in Schedule B, or (c) to acquire or create the estate or interest or mortgage thereon covered by this Commitment. In no event shall such liability exceed the amount stated in Schedule A for the Policy or Policies committed for and such liability is subject to the Insuring provisions, exclusion from coverage, and the Conditions and Stipulations of the form of Policy or Policies committed for in favor of the proposed Insured which are hereby incorporated by references, and are made a part of this Commitment except as expressly modified herein.

4. Any claim of loss or damage, whether or not based on negligence, and which arises out of the status of the title to the estate or interest or the lien of the Insured mortgage covered hereby or any action asserting such claim, shall be restricted to the provisions and Conditions and Stipulations of this Commitment.

PRIVACY POLICY

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our parent company, The First American Corporation, we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information which you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its Fair Information Values, a copy of which can be found on our website at www.firstam.com.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and·
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies, and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies, or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's Fair Information Values. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 12/27/2011 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

UNITED MARINE SHIPBUILDING	***1441 N NORTHLAKE WAY***	***ESE 1/4 - 1/2 (0.358 mi.)***	***AG125***	***244***

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 12/28/2011 has revealed that there are 3 CERC-NFRAP sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/10/2011 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/10/2011 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 11/10/2011 has revealed that there are 4 RCRA-CESQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent NPL

HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the HSL list, as provided by EDR, and dated 02/28/2012 has revealed that there are 8 HSL sites within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 01/24/2012 has revealed that there are 36 CSCSL sites within approximately 1 mile of the target property.

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 01/24/2012 has revealed that there are 10 CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 11/10/2011 has revealed that there are 12 RCRA-NonGen sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there is 1 Manufactured Gas Plants site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
WASHINGTON NATURAL GAS	N 30TH AND BURKE AVE N	ESE 1/2 - 1 (0.646 mi.)	183	434

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are 23 EDR Historical Auto Stations sites within approximately 0.25 miles of the target property.

EDR Historical Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.

A review of the EDR Historical Cleaners list, as provided by EDR, has revealed that there are 18 EDR Historical Cleaners sites within approximately 0.25 miles of the target property.

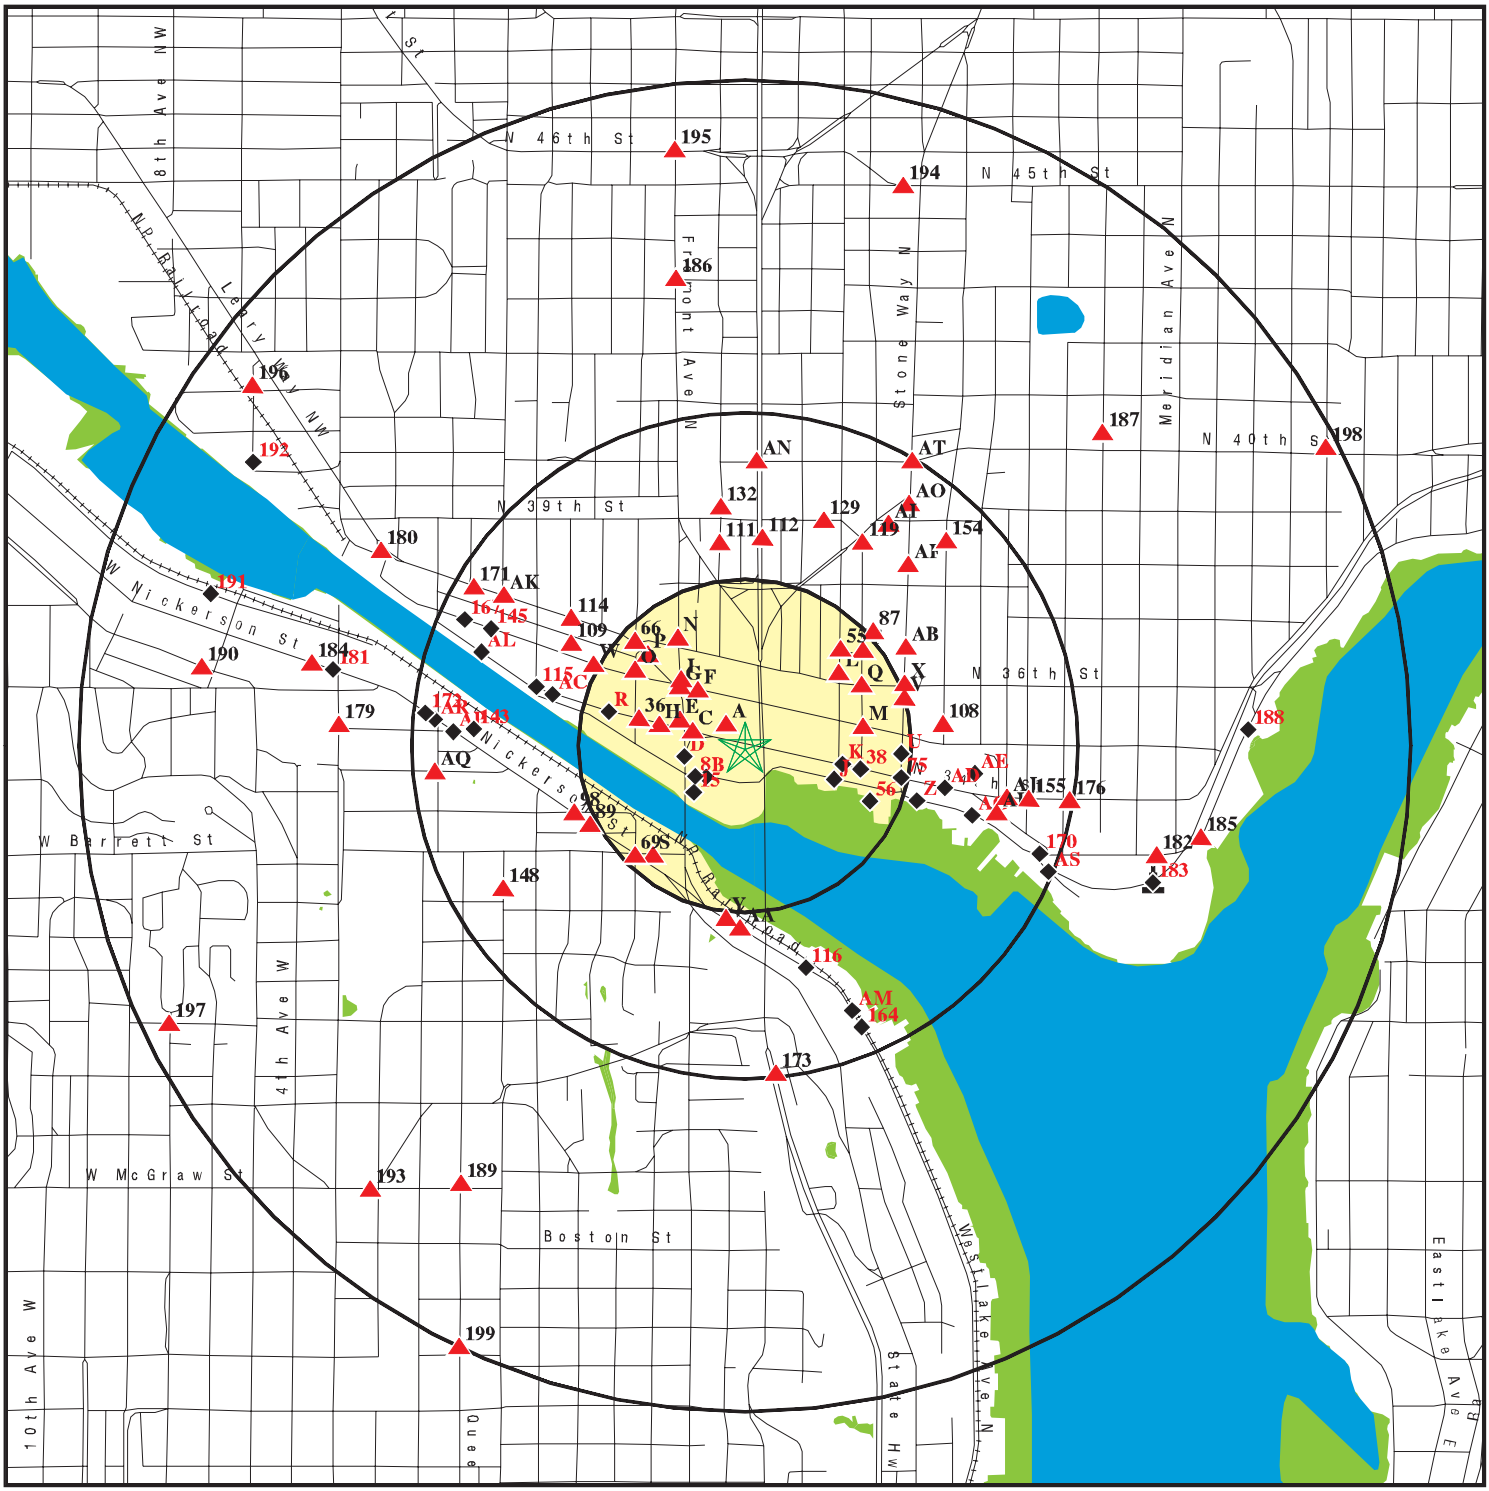

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007
Waste name: CHROMIUM

Waste code: D011
Waste name: SILVER

Waste code: D022
Waste name: CHLOROFORM

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: U122

ALLEN INSTITUTE FOR BRAIN SCIENCE (Continued) **1007265708**

Waste name: FORMALDEHYDE

Waste code: U123
Waste name: FORMIC ACID (C,T)

Waste code: WSC2
Waste name: Washington State solid or semisolid corrosive Dangerous Waste with a pH less than or equal to 2, or greater than or equal to 12.5, based upon a specific testing method.

Waste code: WT02
Waste name: Washington State Dangerous Toxic Waste with a toxic constituents concentration greater than or equal to 0.001% and less than 1.0%, determined by biological testing methods or a book designation procedure.

Biennial Reports:

Last Biennial Reporting Year: 2011

PHENOPATH LABORATORIES (Continued) **1006931805**

Classification: Small Small Quantity Generator
Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Owner/Operator Summary:

Owner/operator name: PHENOPATH LABORATORIES
Owner/operator address: 551 N 34TH ST STE 100
SEATTLE, 98103
Owner/operator country: US
Owner/operator telephone: (206) 374-9000

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: Yes
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No

PHENOPATH LABORATORIES (Continued) **1006931805**

Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 03/04/2008
Facility name: PHENOPATH LABORATORIES
Classification: Small Quantity Generator

Date form received by agency: 12/31/2007
Facility name: PHENOPATH LABORATORIES
Classification: Small Quantity Generator

Date form received by agency: 12/31/2005
Facility name: PHENOPATH LABORATORIES
Classification: Small Quantity Generator

Date form received by agency: 12/31/2003
Facility name: PHENOPATH LABORATORIES
Classification: Small Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007
Waste name: CHROMIUM

Waste code: D011
Waste name: SILVER

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT

PHENOPATH LABORATORIES (Continued) **1006931805**

NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: U122
Waste name: FORMALDEHYDE

Waste code: U154
Waste name: METHANOL (I)

Waste code: WT02
Waste name: Washington State Dangerous Toxic Waste with a toxic constituents concentration greater than or equal to 0.001% and less than 1.0%, determined by biological testing methods or a book designation procedure.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D010
Waste name: SELENIUM

Waste code: D012
Waste name: ENDRIN

Waste code: F006
Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF

ACU LINE CORP (Continued) **1000139075**

ALUMINUM.

Waste code: WT02
Waste name: Washington State Dangerous Toxic Waste with a toxic constituents concentration greater than or equal to 0.001% and less than 1.0%, determined by biological testing methods or a book designation procedure.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a

ACU LINE CORP (Continued) **1000139075**

means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003

ASKO PROCESSING INC (Continued) **1000326717**

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste name: METHYL ETHYL KETONE

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F006
Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste code: F007
Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS

Waste code: F008
Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Waste code: F009
Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Waste code: F019

ASKO PROCESSING INC (Continued) **1000326717**

Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Waste code: WP01
Waste name: Washington State Extremely Hazardous Persistent Waste containing Halogenated Organic Compounds (HOC) at a total concentration level of Greater than 1.0%.

Waste code: WT02
Waste name: Washington State Dangerous Toxic Waste with a toxic constituents concentration greater than or equal to 0.001% and less than 1.0%, determined by biological testing methods or a book designation procedure.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This

ASKO PROCESSING INC (Continued) **1000326717**

information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D022
Waste name: CHLOROFORM

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Classification: Not a generator, verified

Hazardous Waste Summary:
Waste code: WSQG
Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Violation Status: No violations found

Evaluation Action Summary:
Evaluation date: 06/25/2003
Evaluation: COMPLIANCE ASSISTANCE VISIT
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: State

FINDS:

Registry ID: 110005339008

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA’s programs. The vision for ICIS is to replace EPA’s independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

BELFOR USA GROUP INC (Continued) **1000188935**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No

NATIVE BRIGHTWORKS (Continued) **1000838636**

User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 01/04/2008
Facility name: NATIVE BRIGHTWORKS
Classification: Conditionally Exempt Small Quantity Generator

Date form received by agency: 12/31/2007
Facility name: NATIVE BRIGHTWORKS
Classification: Not a generator, verified

Date form received by agency: 12/31/2005
Facility name: NATIVE BRIGHTWORKS
Classification: Not a generator, verified

Date form received by agency: 12/31/2003
Facility name: NATIVE BRIGHTWORKS
Classification: Not a generator, verified

Hazardous Waste Summary:
Waste code: WSQG
Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Violation Status: No violations found

Evaluation Action Summary:
Evaluation date: 01/13/1998
Evaluation: COMPLIANCE ASSISTANCE VISIT
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: State

FINDS:

Registry ID: 110005381149

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

NATIVE BRIGHTWORKS (Continued) **1000838636**

corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

SEATTLE PACIFIC UNIVERSITY FACILITY OPER (Continued) **1000421967**

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D008
Waste name: LEAD

Waste code: D018
Waste name: BENZENE

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: U220
Waste name: BENZENE, METHYL-

Waste code: U226
Waste name: ETHANE, 1,1,1-TRICHLORO-

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington

SEATTLE PACIFIC UNIVERSITY FACILITY OPER (Continued) **1000421967**

Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D006
Waste name: CADMIUM

Waste code: D008
Waste name: LEAD

Waste code: D016
Waste name: 2,4-D

Waste code: D018
Waste name: BENZENE

KING CNTY DOT METRO TRANSIT LAKE UNION (Continued) **1000366466**

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: WSC2
Waste name: Washington State solid or semisolid corrosive Dangerous Waste with a pH less than or equal to 2, or greater than or equal to 12.5, based upon a specific testing method.

Waste code: WT02
Waste name: Washington State Dangerous Toxic Waste with a toxic constituents concentration greater than or equal to 0.001% and less than 1.0%, determined by biological testing methods or a book designation procedure.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington

KING CNTY DOT METRO TRANSIT LAKE UNION (Continued) **1000366466**

Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water

DIAMOND MACHINE WORKS INC (Continued) **1004793356**

Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 03/14/2008
Facility name: LUCCA STATUARY LEARY WAY
Classification: Conditionally Exempt Small Quantity Generator

Date form received by agency: 12/31/2007
Facility name: LUCCA STATUARY LEARY WAY
Classification: Not a generator, verified

Date form received by agency: 12/31/2005
Facility name: LUCCA STATUARY LEARY WAY

LUCCA STATUARY LEARY WAY (Continued) **1001114263**

Classification: Small Quantity Generator

Date form received by agency: 12/31/2003
Facility name: LUCCA STATUARY LEARY WAY
Site name: PIONEER MASONRY RESTORATION
Classification: Not a generator, verified

Date form received by agency: 04/06/1998
Facility name: LUCCA STATUARY LEARY WAY
Site name: PIONEER MASONRY RESTORATION
Classification: Large Quantity Generator

Hazardous Waste Summary:
Waste code: WSQG
Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Violation Status: No violations found

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions,

MARIE KING KING FIBER GLASS CORP (Continued) **1000231841**

and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a

JOHN DUNATO & CO INC (Continued) **1005445088**

means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Large Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D010
Waste name: SELENIUM

Waste code: D040
Waste name: TRICHLOROETHYLENE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,

FOSS MARITIME CO (Continued) **1000375162**

2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a

FOSS MARITIME CO (Continued) **1000375162**

means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Environmental Interest/Information System

FLOHR METAL FABRICATORS INC SEATTLE (Continued) **1004794074**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 03/05/2008
Facility name: TEXACO 121287
Classification: Not a generator, verified

Date form received by agency: 12/31/2007
Facility name: TEXACO 121287
Classification: Not a generator, verified

Hazardous Waste Summary:
Waste code: WSQG
Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Violation Status: No violations found

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Large Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D006
Waste name: CADMIUM

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: WSQG
Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Facility Has Received Notices of Violations:

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Owner/Operator Summary:
Owner/operator name: THOMAS KETTWIG
Owner/operator address: 1929 QUEEN ANNE AVE N
SEATTLE, WA 98109
Owner/operator country: US
Owner/operator telephone: Not reported
Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: 02/01/1973
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

76 SERVICE STATION 1134342 (Continued) **1004794270**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 10/07/2011

CSCSL NFA: Confirmed and Contaminated Sites - No Further Action
The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, a No Further Action code is entered based upon the type of NFA determination the site received.

Date of Government Version: 01/24/2012

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

TACOMA/PIERCE COUNTY:

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

EMCON
Daniel A. Balbiani, P.E.
18912 North Creek Parkway, Suite 100
Bothell, WA 98011-8016

Dear Mr. Balbiani,

The King County Health Department has completed the site hazard assessment (SHA) of the Quadrant Lake Union Center site, as required under the Model Toxics Control Act. A determination of no further action (NFA) at this site has been made by Ecology based on this SHA.

For your information, Ecology will be publishing the results of this, and other recently completed SHAs in the February 16, 1999 Special Issue of the Site Register.

Ecology reserves the right to initiate further investigation at this site where new information is received indicating a potential/actual threat to human health and/or the environment through the release of hazardous substance(s).

Please contact me at (206) 296-4830 if you have any questions/comments regarding this SHA/determination of NFA.

Sincerely,

Carsten Thomsen

Re: Revised Independent Remedial Action Interim Report
Adobe Development
Quadrant Lake Union Center, Seattle, Washington

Dear Mr. Wood:

This revised report summarizes the results of the independent remedial actions conducted to date at the Adobe Development (Adobe) at Quadrant's Lake Union Center in Seattle, Washington. The independent remedial actions were conducted by the Quadrant Corporation to address impacted soil associated with two former rail spurs and three underground storage tanks (USTs) present at the subject site. In addition, this report summarizes the actions taken to remove impacted soil encountered during excavation for site redevelopment. Independent remedial action performed to address impacted soil within the former Burlington Northern Railroad (BNR) right of way is presented in a separate report.

This revised report updates EMCON's August 11, 1997 report prepared for Quadrant Corporation. Activities completed since the publication of the August 1997 report include the placement of the stockpiled rail spur soil in the Aurora ramp, additional soil excavation and disposal associated with installation of a pile cap in the Building 2 area and additional soil sampling in the future Building 3 area.

EMCON has prepared this revised report for Bedford Property Investors as a potential purchaser of the Adobe Development. EMCON's environmental services up to the preparation of this report were performed for the Quadrant Corporation, the site developer. Ms. Barbara Chilcote of Quadrant Corporation provided EMCON verbal authorization to release the information contained in this report to Bedford Property Investors on January 16, 1998.

BACKGROUND

Site Description

Quadrant's Lake Union Center is a commercial development located in the Fremont district of Seattle, Washington. The center is bounded by Phinney Avenue on the west, North 34th Street on the north, Aurora Avenue on the east and the Lake Washington Ship Canal on the south (Figure 1).

The Adobe Development (Site) is located at the east half of the Lake Union Center and is bounded by the Fremont Avenue Bridge to the west, North 34th Street on the north, the Aurora Avenue Bridge on the east and Lake Union on the south (Figure 1). Prior to redevelopment, the site consisted of three buildings used for commercial purposes and warehousing. There were visible indications of two inactive rail spurs present in the northern and southern portions of the Adobe Development. The northern spur is approximately 600 feet long and the southern spur is approximately 400 feet long (Figure 2). The former right of way for the BNR tracks is located adjacent to North 34th Street. The railway tracks and ties were removed from the right of way between April 1989 and the end of 1990. The prior location of the tracks was covered by gravel surfacing. The remaining areas of the site surrounding the former buildings were typically covered by asphalt pavement.

The site is currently being redeveloped by constructing two new buildings which will have basement parking areas (Figure 2). The north east corner of the site may be developed for a third building at some point in the future. The construction of the basement parking areas requires removal of the upper 6 to 8 feet (ft) of soil beneath the new buildings. The areas outside of the building will typically be covered by asphalt pavement for access roads and parking or will be landscaped. A new privately owned access drive to North 34th Street (the Aurora ramp) will be constructed beneath the northern end of the Aurora Bridge (Figure 2).

Site History

The Lake Union Center was used for commercial activities since 1889 (Earth Consultants Inc., 1987). A portion of the Adobe Development site was used as lumber mill from 1889 until 1929 when the mill was closed. The mill was reopened as a door and sash company in 1939 and was operated as such until 1957. The door and sash company was shut down gradually from 1955 through 1957 at which time the site was used as an industrial/commercial park until the current redevelopment.

Over the years the site has been filled concurrent with site development. Fill consisted of spoils from the dredging and construction of the Lake Washington Ship Canal which was placed on the south end of the site. Additional fill was placed on and adjacent to the north end of the site, reportedly using clean fill obtained from other construction sites in the greater Seattle area.

SITE INVESTIGATION

Based on their experience with a rail spur on the western end of the Lake Union Center, Quadrant commissioned a soil investigation of the two rail spurs located on the Site. During the rail spur investigation, construction and demolition debris were encountered in several of the test pits. Quadrant requested that additional investigation be conducted within the limits of Adobe Development Buildings 1 and 2 general excavation (i.e., the excavation necessary for the basement parking garage) to evaluate subsurface soil conditions. An investigation of the future Building 3 area was performed after Buildings 1 and 2 general excavation was completed. A description of these investigations and the results of the testing are provided in the following sections.

Former Rail Spur Investigation

Field Investigation. The rail spurs were investigated by excavating 11 test pits using a backhoe. Five test pits were located on or immediately adjacent to the northern spur (TP-1 through TP-4 and TP-11) and six test pits were located on the southern spur (TP-5 through TP-10). The test pits typically extended to a depth of 4 to 5 ft below ground surface (bgs). Test pit locations are shown on Figure 3.

The ground surface of both rail spurs was covered by approximately 3 to 4 inches of asphalt pavement. Soils encountered beneath the northern rail spur typically consisted of a dark brown gravely sand to a depth of 1 ft bgs, dark brown silt from 1 to 3.5 ft bgs, and a brown sand from 3.5 ft bgs to the maximum depth explored (5 ft). Soil beneath the southern spur typically consisted of brown silty sand from 0.3 to 2 ft bgs and brown to black sandy silt from 2 to 5 ft bgs, although several of the test pits (TP-8, TP-9 and TP-10) did not encounter this silt. Three of the test pits (TP-6, TP-7, TP-8) encountered a second layer of asphalt pavement from 1 to 1.5 ft bgs. Bricks and other construction debris were encountered in all of the southern rail spur test pits at depths of approximately 2 to 3.5 ft bgs.

Soil samples were collected from eight of the test pits (TP-1, TP-2, TP-4, TP-5, TP-7, TP-9, TP-10, and TP-11) at various depths for laboratory analysis. The test pits selected for sampling and the specific depth intervals sampled, were based on field screening with a photoionization detector (PID), physical appearance of the sample (i.e., discoloration), odors, spatial and vertical distribution, and professional judgment. All of the soil samples were analyzed for total petroleum hydrocarbons as diesel and oil (TPH-D and TPH-O) using Washington State Department of Ecology (Ecology) method WTPH-D extended. A select number of the samples were analyzed for halogenated volatile organic compounds (HVOCs) using U.S. Environmental Protection Agency (USEPA) method 8010B, polynuclear aromatic compounds (PAHs) using USEPA method 8310, polychlorinated byphenyls (PCBs) using USEPA method 8080, and Resource Conservation and Recovery Act (RCRA) metals using USEPA methods 6010/7060/7471/7740.

Laboratory Results. The rail spur test pit soil sample laboratory results are summarized on Tables 1 and 2. Copies of the laboratory reports are included in Attachment A.

For the northern spur, the results indicate that TPH-D and TPH-O concentrations exceeded Model Toxics Control Act (MTCA) Method A[1] cleanup levels (200 mg/kg) in two of the four samples collected at depths of 1 to 2 ft bgs. Two of these samples contained carcinogenic PAHs (CPAHs) at concentrations of 0.08 and 3.1 mg/kg. This latter concentration is significantly below the MTCA Method A industrial soil cleanup level but slightly above MTCA Method A residential cleanup level of 1 mg/kg. Non carcinogenic PAHs were well below their respective cleanup levels (see the laboratory report in Attachment A for individual concentrations). PCBs and HVOCs were not detected in any of the samples analyzed from the northern spur. Concentrations of metals detected in these samples were well below their respective MTCA cleanup levels. None of the deeper (>2 ft bgs) samples collected from the northern spur contained TPH at concentrations exceeding MTCA levels.

The results for the samples from the southern spur indicate that all of the samples contained TPH-O and/or TPH-D at concentrations exceeding MTCA cleanup levels. Concentrations of TPH-O and TPH-D ranged from 202 to 1,190 mg/kg and 29 to 379 mg/kg, respectively. CPAHs were detected in both of the samples analyzed at concentrations of 0.1 and 3.64 mg/kg. This latter concentration is significantly below the MTCA Method A industrial soil cleanup level but slightly above MTCA Method A residential cleanup level of 1 mg/kg. PCBs and HVOCs were not detected in any of the samples analyzed from the southern spur. With the exception of sample TP-9-Comp A,

---

[1] Chapter 173-340 WAC, "The Model Toxics Control Act Cleanup Regulation; Method A Cleanup Levels." Amended January 1996.

concentrations of metals detected in the remaining samples from the southern spur were well below their respective MTCA cleanup levels. Sample SP-9-Comp A contained lead at 267 mg/kg, which is only slightly higher than the MTCA Method A cleanup level of 250 mg/kg.

Buildings 1 and 2 General Excavation Area Investigation

Field Investigation. The Adobe Development required that a large portion of the site be over excavated to allow the construction of a basement level parking garage. When construction debris was encountered in the southern rail spur test pits, Quadrant requested that additional test pits be excavated in the general excavation area (excavation limits are shown on Figure 3) to evaluate the physical characteristics of the soil/fill and to assess the potential for impacted soil. A total of 22 test pits (DTP-1 through DTP-7, DTP-9 through DTP-16, and DTP-18 through DTP-24) were excavated through out the general excavation area. Test pits DTP-8 and DTP-17 were not excavated due to construction constraints. The test pits were excavated in a sequential manner, such that the results from previous test pits were used to locate subsequent test pits. For example, test pits DTP-18 through DTP-20 were excavated to investigate the extent of apparent impacted soil discovered in DTP-15 and test pits DTP-21 through DTP-24 investigated the extent of apparent impacted soil found in DTP-4. The test pits were also excavated concurrent with the demolition of the previous buildings at the site which allowed test pits to be located within the former building limits. The test pits typically extended to depths of approximately 10 ft bgs. The locations of the general excavation area test pits are shown on Figure 3.

The ground surface was covered by 3 to 4 inches of asphalt pavement at test pit locations not located within the former building footprints. Typically, the building floors consisted of one to two layers of concrete separated by clean sand (presumably the second layer of concrete was placed to accommodate settling of the first floor slab). Soil conditions encountered beneath the pavement and concrete floor slabs in the test pits were variable, but generally consisted of the following profile;

0 - 2 ft bgs - gray to brown sand with varying amounts of gravel, silt and clay

2 - 5 ft bgs - gray to brown sand, with occasional layers of wood waste (sawdust) and other organic material

5 - 10 ft bgs - gray sand, with varying amount of construction debris including treated and untreated wood/timbers, concrete and brick rubble, and vertical pilings and piling caps.

The greatest amount of buried wood debris and construction debris was encountered beneath former Buildings A and B and in the eastern end of Building E and D. Former pilings were encountered beneath Buildings D, E and F.

Soil samples were collected from 21 of the test pits at various depths for laboratory analysis. The test pits selected for sampling and the specific depth intervals sampled, were based on field screening with a photoionization detector (PID), physical appearance of the sample (i.e., discoloration), odors, spatial and vertical distribution, and professional judgment. Samples were not analyzed from DTP-3 and DTP-23 because there were no field screening data to indicate sampling was necessary. Soil samples were also collected from stockpiles of soil excavated from test pits in former Buildings B and C (Fbld B-SS and Fbld C-SS) and from a stockpile of soil excavated from the western end of former Building F (SP-COMP-1, -2, and -3). All of the soil samples were analyzed for total petroleum hydrocarbons as gasoline (TPH-G), and benzene, toluene, ethylbenzene and total xylenes (BTEX) using Ecology method WTPH-G, TPH-D and TPH-O using Ecology method WTPH-D extended, HVOCs using USEPA method 8010B, and PAHs using USEPA method 8270 SIM. A select number of the samples were also analyzed for PCBs using USEPA method 8080, and RCRA metals using USEPA methods 6010/7060/7471/7740.

Samples of water that accumulated in three of the test pits (DTP-4, DTP-7, and DTP-15) were collected for laboratory analysis for construction dewatering purposes. During construction, water samples were collected from the discharge of two dewatering sumps (Build 2-Sump and FF& 16-Sump). The sump locations are shown on Figure 3. The water samples were analyzed for the same parameters as the soil samples except RCRA metals were not analyzed.

Laboratory Results. The general excavation area test pit soil sample laboratory results are summarized on Tables 3 and 4, and test pit and dewatering sump water sample results are summarized on Table 5. Copies of the laboratory reports are included in Attachment A.

Generally the laboratory results indicated that most of the analytes, when detected, were present at low concentrations, typically below applicable MTCA cleanup levels. TPH-G was only detected in two of the 47 samples analyzed at concentrations of 72.3 and 4,660 mg/kg (DTP-15 at 0 to 5 ft and DTP-4 at 5 to 9 ft, respectively). Benzene, toluene and ethylbenzene were not detected in any of the analyzed samples and total xylenes were

detected in three samples at concentrations ranging from 0.16 to 14.1 mg/kg (well below the MTCA Method A cleanup level of 20 mg/kg). TPH-D and TPH-O were detected in 24 of 47 samples and 26 of 47 samples, respectively. TPH-D and TPH-O concentrations ranged from 10.2 to 258 mg/kg and 26.9 to 818 mg/kg, respectively. Only one sample (DTP-19 at 3 to 6 ft) contained TPH-D above Method A cleanup levels and only two samples (DTP-15 at 0 to 5 ft and DTP-19 at 3 to 6 ft) contained TPH-O above Method A cleanup levels. HVOCs and PCBs were not detected in any of the samples analyzed. Concentrations of metals, when detected, were well below their respective MTCA cleanup levels (Table 4).

The most prevalent group of analytes detected was the PAHs, which were detected in 34 of the 47 samples analyzed. Concentrations of non-carcinogenic PAHs were below their respective MTCA cleanup levels (see the laboratory reports in Attachment A for individual concentrations). When detected, the concentrations of total CPAHs were typically less than 0.50 mg/kg which is less than the MTCA Method A cleanup level (residential) of 1 mg/kg. There were seven samples that contained total CPAHs concentrations exceeding 1 mg/kg: however only one sample (DTP-12 at 3 to 7 ft) contained CPAHs at a concentration exceeding the MTCA Method A Industrial cleanup level of 20 mg/kg. The seven samples containing the elevated CPAHs concentrations were obtained from intervals where there was noticeable amounts of wood debris, including what appeared to be creosote treated timbers and pilings. It is likely, that the elevated concentrations of CPAHs in theses samples is linked to the presence of this wood debris.

The laboratory results for the three test pit water and two dewatering sump water samples indicated that TPH-G, TPH-D, and/or TPH-O were detected in at least three of the samples at concentrations ranging from 0.0513 to 13.8 mg/L. Benzene and toluene were not detected in any of the samples and ethylbenzene and total xylenes were detected in one sample at a concentrations of 0.0123 and 0.0735 mg/L, respectively.

HVOCs were not detected in any of the water samples. CPAHs were detected in four of the samples at concentrations of 0.000377 to 0.1159 mg/L. The water samples obtained from the open excavation contained considerably higher CPAH concentrations than the sump samples. It is important to note that these samples were obtained either from an open excavation or a construction dewatering sump, were extremely turbid with high levels of suspended sediments, and therefore, should not be considered representative of groundwater conditions.

Future Building 3 Area

Field Investigation. The future Building 3 area was covered by the concrete recycling plant and a large stockpile of recycled concrete aggregate when the field investigation for the Buildings 1 and 2 general excavation was performed. An investigation of soil conditions in the future Building 3 area was performed in September 1997. A total of eight test pits (DTP-30 through DPT-37) were excavated in the future Building 3 area. The test pits were excavated after the former Buildings A and B were demolished and the foundations and floor slabs completely removed. The test pits extended to depths ranging from 7 to 9.5 feet bgs. Locations of the test pits are shown on Figure 3.

Much of the area to be occupied by the future Building 3 was previously covered by the former Buildings A and B. The former buildings had 1 to 2 layers of concrete as flooring materials as discussed previously for the Building 1 and 2 investigation. Soil conditions encountered in the future Building 3 area were variable but generally consisted of the following profile;

DTP-30 through DTP-32

0-4 bgs — mottled gray brown mixture of silt, sand and gravel with low to moderate amounts of woodwaste, bricks and concrete. No detectable PID readings or noticeable odors.

4-9 bgs — brown fine to medium sand. Organic layer with wood found from 4-8 bgs in DTP-30 and an organic layer found from 2 to 2.5 ft bgs in DTP-31. No detectable PID readings or noticeable odors.

DTP-33 through DTP-37

0-9 bgs — gray brown to black, fine to medium sand with occasional concrete and brick debris. Uncharacteristic organic odor (non-petroleum) detected in DTP-35 and DTP 37. No detectable PID readings in any of the test pits.

Soil samples were collected from each of the eight test pits at various depths for laboratory analysis. In test pits where relatively consistent soil types were encountered, a composite soil sample representing the entire depth interval was collected. If a soil type was encountered that was not consistent with the sands typically found at the site, a composite sample representing that interval was collected. The samples were analyzed for TPH-G, TPH-D, TPH-O, BTEX, HVOCs, and PAHs using the same methods as for the Buildings 1 and 2 samples. Metals and PCBs were not analyzed because the results from

the Buildings 1 and 2 soil samples indicated that these compounds were not of concern at the site.

Laboratory Results. The laboratory results for the samples from the future Building 3 area are summarized on Table 3.

The laboratory results indicate that the analytes, when detected, were present at low concentrations, typically less than the applicable MTCA cleanup levels. TPH-D and TPH-O were both detected in six of the seven samples at concentrations ranging from 12.3 to 232 mg/kg and 31.6 to 178 mg/kg, respectively. Only one sample (DTP-36-6.5) contained TPH-D at a concentration (232 mg/kg) slightly above the MTCA Method A cleanup level. BTEX and HVOCs were not detected in any of the samples analyzed.

PAHs were detected at low concentrations in all of the samples analyzed. Concentrations of non-carcinogenic PAHs well below their respective MTCA Method B cleanup levels (see laboratory reports in Attachment A for individual concentrations). CPAHs were detected at concentrations less than 0.5 mg/kg in six of the seven samples analyzed. One sample (DTP-37-8) contained CPAHs at a concentration (1.4387 mg/kg) slightly above the MTCA Method A residential cleanup level of 1 mg/kg, however this concentrations is significantly below the MTCA Method A industrial cleanup level of 20 mg/kg. The slightly higher concentration of CPAHs in sample DTP-37-8 may be attributed to the wood timbers that were encountered in this test pit.

INDEPENDENT REMEDIAL ACTIONS

Based on the results of the site investigation, Quadrant implemented independent remedial actions at the former rail spurs and within the Buildings 1 and 2 general excavation area limits. In addition, three unregulated heating oil USTs were removed from the site; two of the USTs were located during soil excavation activities. Independent remedial actions were conducted at each of these areas prior to soil excavation for the site development to ensure that impacted soil was handled appropriately and disposed of at an approved facility. An EMCON field geologist/technician was on site during the excavation activities associated with both the independent remedial actions and for the site development excavation to monitor soil quality. Other than the USTs discovered during excavation and the three areas identified previously, the field geologist/technician did not observe any suspect soil conditions. A description of the independent actions performed and the results of confirmation sampling are described in the following sections.

Rail Spur Soil Excavation

Based on the results of the rail spur soil investigation described previously, the soil beneath the northern and southern rail spurs containing TPH-D and/or TPH-O at concentrations greater than MTCA Method A was removed and stockpiled. The limits of the rail spur soil removal are shown on Figure 4. The depth of soil removal varied from 1.5 to 4.0 ft bgs for the northern spur and from 4 to 6 ft bgs for the southern spur. For both spurs, the soil removal extended the width of the ballast material which was approximately 10 to 15 ft. The stockpile was constructed using a visqueen liner and hay bales to form the sides. After placement of the soil in the stockpile it was covered with additional visqueen to prevent runoff and saturation of the soil. The soil was temporarily stockpiled beneath the Aurora Bridge overpass adjacent to North 34th Street. Approximately 2,000 cubic yards of soil was placed in the stockpile. The soil in the stockpile was used for backfill under the new private Aurora ramp (Figure 2). The soil is contained on the north, west, and east sides of the ramp by concrete retaining walls. A 1 foot layer of soil has been placed on top of the soil pending completion of the ramp pavement (1 foot of base rock and 4 inches of asphalt).

The tracks and ties were removed from the entire length of the spur as part of the site preparation. Reusable ties were recycled. The unusable railroad ties were transported to the Weyerhaeuser Material Recovery Facility in Longview, Washington, and subsequently disposed of at the Weyerhaeuser Regional Landfill which is permitted to accept these materials.

Confirmation soil samples were collected after rail spur excavation to confirm that the underlying materials were not impacted and could be managed accordingly. Five soil samples were collected from the excavation bottom or sidewalls along the northern spur (Figure 4). The samples were analyzed for TPH-D and TPH-O using Ecology method WTPH-D extended. The results are presented in Table 6 and copies of the laboratory reports are provided in Attachment A. The results indicate that concentrations of TPH-D (nondetect to 26.9 mg/kg) and TPH-O (nondetect to 68.5 mg/kg) beneath the areas excavated are well below their respective Method A cleanup levels of 200 mg/kg.

Similarly, eleven confirmation samples were collected from the southern spur after soil excavation. The samples were analyzed for the same parameters as the northern spur. The results (Table 6) indicate that the samples from the central portion of the southern spur contain TPH at concentrations above Method A levels. Samples SRS-2, -3 and -4 (all from 4 ft bgs) contained TPH above the cleanup level, so the excavation was extended another two feet deeper and confirmation samples SRS-5, -6 and -7 were collected from the same general area. The base of the excavation in this area was founded in a layer of

sawdust and other woodwaste with little amounts of soil. The results for samples SRS-5,-6, and -7 indicate concentrations of TPH above the MTCA Method A cleanup level. However, these samples were composed primarily of sawdust and wood debris and the elevated TPH concentrations are likely attributed to biogenic effects of the sawdust/wood debris and not related to petroleum hydrocarbons. The spur excavation in this area had extended below the water table and the excavation had filled with water before additional fill could be removed or additional samples obtained. The bottom of the southern rail spur was approximately the final grade of the general area excavation, so no further removal of soil was planned in this area. This area will be covered by the concrete floor slab of the parking garage beneath the new building.

Buildings 1 and 2 General Excavation Area Soil Removal

The site investigation results identified three areas where elevated concentrations of either TPH and/or CPAHs were detected. These areas are described below and shown on Figure 5.

- **DTP-4.** This area was located west of former Building B and contained elevated concentrations of TPH-G. The results of test pits DTP-21 through DTP-24 indicated that the area was relatively small, approximately a 15-ft radius around DTP-4. The source of the TPH-G is unknown.

- **DTP-12.** This area was located near the southeast corner of former Building D and contained concentrations of CPAHs higher than the MTCA Method A industrial cleanup level of 20 mg/kg. The source of the CPAHs is unknown but may be related to the presence of construction debris including creosote treated timbers found in this area.

- **DTP-15/DTP-19.** This area was located west of the northwest corner of former Building B and contained elevated concentrations of TPH-D and TPH-O, and concentrations of CPAHs less than MTCA Method A industrial levels but higher than the MTCA Method A residential cleanup levels. Results of test pits DTP-18 through DTP-20 suggested that the area of impacted soil was limited to the vicinity of DTP-15/DTP-19. The source of the TPH and CPAHs is unknown, however, the elevated CPAHs appears to be associated with the treated timbers found in DTP-15.

Based on this information, Quadrant decided to remove the soil containing TPH-D and TPH-O at concentrations exceeding MTCA Method A and CPAHs exceeding MTCA

Method A industrial. The limits of the excavations associated with each of these areas are shown on Figure 5. Typically, the excavations extended to depths of 5 to 7 ft bgs. The extent of the excavations were guided by the results of adjacent test pits and by field screening by the on-site geologist observing the excavation activities. Soil from the excavations was either loaded directly into the disposal trucks or was stockpiled briefly awaiting loading and subsequent disposal. The soil removed from these three areas was transported to the Weyerhaeuser Material Recovery Facility in Longview, Washington, and subsequently disposed of at the Weyerhaeuser Regional Landfill which is permitted to accept these materials.

Soil confirmation samples were collected to evaluate the soil quality after the excavation was presumed completed. The results of the soil confirmation sampling are summarized in Table 7 and discussed below.

- **DTP-4.** Three confirmation samples were collected from this area, one from the base and two composite samples of the sidewalls. The samples were analyzed for TPH-G and BTEX. Only one sample contained TPH-G (8.30 mg/kg) at concentration well Method A levels. BTEX was not detected in any of samples. No further excavation was deemed necessary based on these results.

- **DTP-12.** Four confirmation soil samples were collected from this area, two composite samples from adjacent sidewalls at depth intervals of 0 to 3 ft bgs and 3 to 7 ft bgs. The samples were analyzed for PAHs. The results indicated CPAHs concentrations significantly less than MTCA Method A industrial levels and only slightly higher than the MTCA Method A residential cleanup levels. No further excavation was deemed necessary based on these results.

- **DTP-15/DTP-19.** A total of 13 confirmation soil samples were collected from the excavation sidewalls and bottom. The samples (except for FT-37-N) were analyzed for TPH, BTEX, and PAHs. The results indicate that two samples (DTP-15/19-7 and DTP-25-fg) contained TPH-G at concentrations (249 and 2,550 mg/kg, respectively) above MTCA Method A cleanup levels. Concentrations of all other analytes, when detected were below their respective cleanup levels. Over excavation of the soil found at DTP-25-fg was attempted, however inflow of groundwater prevented excavation and resampling. Significant additional excavation was subsequently conducted east of DTP-25-fg, and along the west boundary as part of installing the pile camp for the foundation system. The area was excavated an additional 2 to 4 feet below the bottom of the excavation grade (i.e., 8 to 10 ft bgs). Confirmation soil samples could not be collected because the excavations were flooded by groundwater. The area with

TPH-G above cleanup levels is located beneath the parking garage concrete floor slab.

Because soil with elevated concentrations of TPH-G remained, an investigation of the groundwater quality near DTP-15/DTP-19 was performed. Groundwater samples were collected from five borings (SB-1 through SB-5) drilled using GeoProbe™ sampling equipment. The locations of the borings are shown on Figure 3. The borings were extended approximately 5 ft bgs (4 to 5 ft below groundwater) and a temporary well screen 3 feet long was exposed. The temporary well was purged of standing water (a minimum of three casing volumes) using a peristaltic pump. Groundwater samples were collected from each boring and analyzed for TPH and BTEX.

The laboratory results of the GeoProbe™ groundwater samples are summarized in Table 8. The results indicate that concentrations of TPH-G and TPH-D, when detected, were below the MTCA Method A cleanup level of 1 mg/L. TPH-O, benzene, and ethylbenzene were not detected in any of the groundwater samples collected. Toluene and/or total xylenes were detected in three of the samples at very low concentrations, well below their respective MTCA Method A cleanup levels. This data indicates that, although there appears to be an isolated area of soil containing TPH-G above cleanup levels, this residual impacted soil has not caused groundwater to exceed cleanup levels.

Underground Storage Tank Removal and Closure

During the course of the general area excavation, two previously unknown USTs were discovered (UST-1 and UST-2). These two USTs and a third previously known UST (UST-3) were decommissioned and removed from the site. All three USTs appeared to be of steel construction, approximately 550 to 1,100 gallons in size, and were likely used for the storage of fuel oil. The location of the USTs are shown on Figure 3.

All three USTs were decommissioned by Filco of Seattle, Washington, under permits obtained from the Seattle Fire Department. The tanks were pumped dry of any liquids, tripled rinsed and inerted using dry ice before they were removed. The tanks were transported and destroyed. Documentation of UST removal and disposal is included in Attachment B.

The soil around each of the USTs was screened using a PID. Suspect soil was either directly loaded into transport trucks or stockpiled pending sampling and analysis. When UST-2 was encountered much of the soil surrounding the tank had already been removed. Screening of this soil did not indicate the presence of TPH nor were there any visible signs

or odors. After the tanks were removed and obvious impacted soil was excavated, soil confirmation samples were collected from each tank basin. A floor sample could not be collected from UST-2 because groundwater had filled the excavation bottom.

The UST confirmation soil sample laboratory results are summarized in Table 9. The results indicated that the soil removal activities for UST-1 and UST-2 were successful and that the residual concentrations of TPH found in the confirmation soil sample are below MTCA Method A cleanup levels. The confirmation soil samples results for UST-3 indicated that additional soil removal was required on two occasions. The final confirmation samples were all below MTCA Method A cleanup levels except for the composite sample from the north and west sidewalls, which had a TPH-D concentration of 249 mg/kg (only slightly higher than the cleanup level of 200 mg/kg). It is EMCON's opinion, that this concentration is protective of human health and the environment. Therefore no further excavation was necessary.

CONCLUSIONS AND RECOMMENDATIONS

The site investigation revealed that the soil beneath the former rail spurs and within three areas in the Buildings 1 and 2 general excavation area contained concentrations of petroleum hydrocarbons and/or CPAHs at concentrations above applicable MTCA cleanup levels. In addition, three USTs were present at the site which were subsequently removed. The results of the soil samples from the future Building 3 area indicate that concentrations of TPH, HVOCs, BTEX and PAHs are typically below MTCA Method A cleanup levels. There was one sample (DTP-36-6.5) that slightly exceeded the cleanup level for TPH-D and one sample (DTP-37-8) that contained CPAHs at concentrations slightly above the MTCA Method A residential cleanup level but significantly below the Method A industrial cleanup level. Based on the existing uses of the site, these materials do not pose a threat to human health or the environment.

The results of the confirmation sampling following the removal of the USTs indicates that the tanks were removed consistent with the requirements of MTCA and that the no further soil removal beneath the former USTs is necessary.

The results of confirmation soil samples taken after soil was removed from the former rail spurs and from the Buildings 1 and 2 general excavation areas, indicate that concentrations of the compounds of concern are below their respective cleanup levels with two exceptions:

- Samples of the material beneath the former southern spur contained concentrations of TPH-D and TPH-O above Method A cleanup levels. These samples were collected from a layer composed primarily of sawdust and wood waste which is known to cause increased TPH concentrations. The elevated TPH concentrations are most likely caused by the biogenic interference of the sawdust, and are not likely the results of petroleum hydrocarbons associated with the former rail spur. In addition, this area will be completely covered by the new Building 1 which will isolate these materials from direct contact or leaching from infiltration of precipitation. These materials do not pose a threat to human health or the environment under these conditions.

- Samples of soil beneath a small part of the DTP-15/DTP-19 area contained TPH-G above cleanup levels. A significant amount of additional solid removed was conducted in this area, however confirmation soil samples could not be collected to document residual soil concentration. A groundwater study in and around this area indicated that groundwater did not exceed its cleanup level. In addition this area will also be covered by the parking garage for Building 2, and as such will be isolated from direct contact and leaching from the infiltration of precipitation. These materials do not pose a threat to human health or the environment under these conditions.

Based on the findings of this report and the proposed development of the site, EMCON believes no further actions other than those described below are required for the Adobe Development site. EMCON recommends the following actions:

- The rail spur stockpiled soil has been placed in the Aurora ramp as fill. This is an acceptable use of the material from an environmental standpoint because the soil will be encapsulated in the fill by the street pavement on the top and the concrete retaining walls or the sides. It is EMCON's understanding that the asphalt pavement will be constructed in the next 4 to 6 weeks.

- Although the concentrations of TPH and CPAHs in soil beneath the future Building 3 area are typically below cleanup levels, if these soils are to be removed as part of future site development, EMCON recommends verifying with the intended disposal site that the detected concentration levels are acceptable.

LIMITATIONS

The services described in this report were performed consistent with generally accepted professional consulting principles and practices. No other warranty, express or implied, is made. These services were performed consistent with our agreement with our client. This report is solely for the use and information of our client unless otherwise noted. Any reliance on this report by a third party is at such party's sole risk.

Opinions and recommendations contained in this report apply to conditions existing when services were performed and are intended only for the client, purposes, locations, time frames, and project parameters indicated. Subject: **Report of Phase I Environmental Site Assessment**
Lake View at Fremont
837 North 34th Street
Seattle, Washington
CODA Project 10-069

Dear Mr. Carlson:

CODA Consulting Group, LLC (CODA) is pleased to submit this report of the Phase I Environmental Site Assessment for the referenced site. This report discusses background information, purpose and scope of work, execution of work, conclusions, and recommendations for the subject property. The work was conducted in general compliance with CODA Proposal P10-066, dated September 28, 2010 and authorized by Stockbridge Real Estate Funds on October 4, 2010. Reliance on this report is governed by language included in Section 1.2.

We appreciate your selection of CODA for this project and look forward to assisting you further on other projects. If you have any questions, please do not hesitate to contact either of the undersigned.

Respectfully submitted,
CODA Consulting Group, LLC

EXECUTIVE SUMMARY
Lake View at Fremont
837 North 34th Street
Seattle, King County, Texas

Stockbridge Real Estate Funds engaged CODA Consulting Group, LLC (CODA) to perform a Phase I Environmental Site Assessment (ESA) of the referenced site. The subject building is a Class A, four-story office building constructed in 2008 with associated parking garage area under the building footprint. The site is approximately 1.79 acres. The subject property operates through a ground lease from Fremont Dock Company. No industrial activities are conducted on site and no hazardous wastes are generated. Historical use of the subject property included a foundry, a lumber storage yard, and an asbestos mill. The subject property is located in an area characterized by office buildings and small commercial shops.

CODA performed the Phase I ESA of Lake View at Fremont building, located at 837 North 34th Street, Seattle, King County, Washington, in general conformance with the scope and limitations of ASTM Practice E 1527-05. Exceptions to, or deletions from, this practice are described in Section 10.0 of this report.

Based upon the information obtained, as reflected in this report, this assessment has revealed no evidence of *recognized environmental conditions* in connection with the subject property with the exception of the following:

Historically a "tank farm" was identified on a portion of the subject property in the 1905 Sanborn map. The "tank farm" occupied a footprint area approximately 20 feet by 20 feet in size. The number of tanks and tank contents were not identified on the Sanborn map. The "tank farm" was situated between a foundry and an asbestos grinding mill. Other industrial businesses common of the era were also present in the immediate area. The current improvements are located in a master planned business park known as Quadrant Lake Union Center and the subject property building is one of eight buildings situated on six parcels. Quadrant Lake Union Center leases the land from Fremont Dock Company on an original 55-year ground lease, with extension options. Redevelopment of the subject property parcel (completed 2008) included a three-level subterranean parking garage that covers the entire footprint of the subject property. Any residual impacted soil from former operations would have been discovered and excavated during the construction of the garage. Since the current improvements do not include fuel storage or hazardous materials, the historical business activities in the early part of the 20th century as well as the tank storage is not material to the current use of the property and consequentially CODA does not believe that further assessment is warranted.

No *historical recognized environmental conditions* were identified.

On the basis of information obtained to date, CODA believes that while there is evidence of historic use of the subject property that may have lead to past impacts of the property, based on construction of the subject building with ventilated subsurface garage parking and the soil removal that took place during the construction of this subsurface parking area, residual impacts to the property, if present, would not present a significant risk to the subject property structures. No further assessment is recommended at this time.

This summary is for convenience only and should not be relied upon without first reading the full contents of this report, including appendix materials.

1.0 INTRODUCTION

1.1 PURPOSE

The purpose of this Phase I Environmental Site Assessment (ESA) was to identify *recognized environmental conditions* in connection with the subject property. As defined by ASTM E 1527-05, "The term *recognized environmental conditions* means the presence or likely presence of any *hazardous substances* or *petroleum products* on a *property* under conditions that indicate an existing release, a past release, or a material threat of a release of any *hazardous substances* or *petroleum products* into the structures on the property or into the ground, groundwater, or surface water of the *property*. The term includes *hazardous substances* or *petroleum products* even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."

The term *historical recognized environmental condition* as defined by ASTM is an "environmental condition which in the past would have been considered a *recognized environmental condition*, but which may or may not be considered a *recognized environmental condition* currently." ASTM further defines a *historical recognized environmental condition* by stating "If a past release of any hazardous substances or petroleum products has occurred in connection with the property and has been remediated, with such remediation accepted by the responsible regulatory agency… this condition shall be considered a *historical recognized environmental condition*…"

The term suspect *recognized environmental condition* as used throughout this report is cited from Section 12.5 of ASTM E 1527-05. CODA uses this term for conditions that have a potential to be a *de minimis* condition, a *recognized environmental condition*, a *historical recognized environmental condition*, or not a *recognized environmental condition* for the subject property and requires further discussion as presented within the text of this report. Section 7.0 summarizes each of the known or suspect *recognized environmental conditions* associated with the subject property. In Section 8.0, CODA presents its opinion of the potential impact a known or suspect *recognized environmental condition* has on the subject property and whether or not the suspect *recognized environmental condition* is currently a *de minimis* condition, a *recognized environmental condition,* or a *historical recognized environmental condition*, based on site-specific characteristics.

ASTM E 1527-05 states that an ESA "meeting or exceeding" this practice and completed less than 180 days prior to the date of acquisition or intended transaction is presumed to be valid if the report is being relied on by the User for whom the assessment was originally prepared. The components of the practice to be completed within 180 days include: interviews, searches for recorded environmental cleanup liens, the regulatory review, site visit and the declaration by the environmental professional responsible for the assessment. The ASTM E 1527-05 practice also states that within this 180 day period, if the assessment will be used by a different user than the user for whom the assessment was originally prepared, the subsequent user must also satisfy the User's Responsibilities.

1.2 DETAILED SCOPE-OF-SERVICES

The scope of services was performed in general conformance with the ASTM E 1527-05 document *Standard Practice for Environmental Site Assessment: Phase I Environmental Site Assessment Process*[1] and Client-specified requirements (see Section 1.5).

The Phase I ESA consisted of a historical review of the subject property and area use, regulatory database review, assessment of the physical setting, subject property and area reconnaissance, and a report of CODA's findings, opinions, conclusions, and recommendations. Data gaps or deviations from this standard, if applicable, are described in Section 10.0.

Subject Property and Area Use

Using selected sources of reasonably ascertainable public information, CODA reviewed the current and historical uses of the subject property. The Phase I ESA historical review extends back until 1940 or, for uses prior to that date, back to the time the subject property was undeveloped. Sources of historical use information relating to the subject property and its adjoining properties were acquired and reviewed according to the reasonable availability of the information, the time limits provided for data acquisition and review, as permitted, by the project schedule and cost, and CODA's judgment of the likely value of the information for indicating environmental conditions. Historical sources reviewed by CODA are listed in Section 11.0 and typically include local city directories, aerial photographs, and topographic maps. If available through the database provider, the historical sources reviewed also included Fire Insurance Maps.

Regulatory Status Review

CODA reviewed a report of select regulatory databases published for the local area to identify facilities potentially constituting a suspect *recognized environmental condition* in regard to the subject property. CODA reviewed the databases to identify recorded facilities located on, or in proximity to, the subject property using the ASTM E 1527-05 standard environmental record sources and recommended approximate minimum search distances.

CODA attempted to obtain additional information regarding listed facilities that, in its professional judgment, may constitute *recognized environmental conditions* in connection with the subject property. In addition, local agencies were contacted regarding recorded information, incidents, or activities of environmental concern relating to the subject property and its immediate environs.

Subject Property Physical Setting

CODA obtained and reviewed reasonably ascertainable published subject property information to characterize the physical setting of the subject property. Sources reviewed are listed in Section 11.0 of this report. CODA reviewed the current *USGS 7.5 Minute Topographic Map* showing the area on which the subject property is located. CODA reviewed one or more physical setting sources at the discretion of the environmental professional to obtain information about the geologic, hydrogeologic, hydrologic, or

[1] ASTM E 1527-05 is incorporated by reference; CODA can assist the Client with obtaining a copy of this standard on request.

topographic characteristics of the subject property. Discretionary physical setting sources may have been sought if (1) conditions had been identified in which hazardous substances or petroleum products are likely to be present on-site or to migrate to the subject property from off-site sources and (2) more information is generally obtained, pursuant to local good commercial or customary practice.

Subject Property and Area Reconnaissance

The subject property reconnaissance consisted of field observations of the subject property and adjoining land areas by CODA personnel experienced in environmental site assessments. CODA observed and documented current uses of the subject property and indicators of hazardous substances, petroleum products, storage tanks, odors, pools of liquid, drums, containers, polychlorinated biphenyls (PCBs), heating and cooling systems, stains, corrosion, drains and sumps, pits, ponds, lagoons, stressed vegetation, wastes, wells, and septic systems. The area reconnaissance was performed on foot within areas that were reasonably accessible and at CODA's discretion by automobile along publicly accessible roads.

Report

CODA prepared this report, which includes the findings concerning known or suspect *recognized environmental conditions* and an opinion as to the potential impact those conditions would have on the subject property. CODA's services also included assessment of *recognized environmental conditions* that may constitute potential *business environmental risks* at the time of the Phase I ESA. Finally, this report concludes whether or not the assessment revealed *recognized environmental conditions*, whether the *recognized environmental conditions* are considered a *business environmental risk,* and provides recommendations, if appropriate.

1.3 SIGNIFICANT ASSUMPTIONS

Information obtained from the Client, the Client's representative, individuals interviewed, and prior environmental reports were considered to be accurate unless CODA's reasonable inquiries clearly revealed otherwise.

Conditions observed were considered to be representative of areas that were not observed unless otherwise indicated.

The primary direction of groundwater flow was assumed to be dictated by topography, unless otherwise indicated by measurement of potentiometric surface or other quantifiable data. For this assessment, groundwater flow was assumed to be toward the south. Additionally, the groundwater flow direction was assumed to control the distribution of impacts, if present.

1.4 LIMITATIONS AND EXCEPTIONS

The findings and opinions presented are relative to the dates the work was conducted and should not be relied on to represent conditions at later dates. The opinions included herein are based on information obtained during the assessment and CODA's experience. If additional information becomes available that may impact CODA's environmental

assessment findings, CODA requests the opportunity to review the information, reassess the potential concerns, and modify CODA's opinions, if warranted.

This assessment included visual observations to identify obvious features or conditions indicative of *recognized environmental conditions*.

Although this assessment has attempted to identify *recognized environmental conditions*, CODA cannot eliminate all uncertainty as to *recognized environmental conditions* in connection with the subject property nor represent or warrant that the subject property contains no hazardous substances or petroleum products or other latent conditions beyond those identified through the scope of work identified herein. Other features, conditions, and constituents may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, and/or (5) deliberate concealment of detrimental information.

Although this assessment has attempted to identify *business environmental risk*, potential *business environmental risk* may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, (5) deliberate concealment of detrimental information, (6) the subjective nature of materiality to the User with respect to *business environmental risk*, and/or (7) a lack of understanding of the future use of the subject property.

CODA's professional services have been performed using that degree of care and skill ordinarily exercised, under similar conditions, by reputable environmental consultants undertaking similar studies and practicing in this locality during the same timeframe. No other warranty, expressed or implied, is intended or made with respect to this report or CODA's services. This assessment was not exhaustive and Users of this report should consider the scope and limitations related to these services when developing opinions as to risks associated with the subject property.

This report presents an assessment of the subject property as defined by information provided by the Client, Client's representative, or Key Site Manager. CODA's findings, opinions, conclusions, and recommendations are based on the locations and boundaries of the subject property as evident in the field and on maps or plats provided by the Client, Client's representative, or Key Site Manager.

1.5 SPECIAL TERMS AND CONDITIONS

The work was conducted in general conformance with CODA's Proposal P10-066, dated September 28, 2010. The User is defined as the party seeking to use ASTM E 1527-05 to complete an ESA of the property. The User of this Phase I ESA is CODA's Client, Stockbridge Real Estate Funds.

There are no special contractual conditions between the User and Environmental Professional.

1.6 USER RELIANCE

This assessment and report were prepared on behalf of and for the exclusive use of Stockbridge Real Estate Funds solely for its use and reliance, subject to the terms and conditions agreed upon between CODA and Stockbridge Real Estate Funds.

This report represents CODA's services as of the date hereof. As CODA's final document, it may not be altered after final issuance. The Client and CODA were solely involved in shaping the scope of services. Accordingly, reliance on this report by any other party may involve assumptions leading to an unintended interpretation of findings and opinions. As such, reliance by other parties on the contents of this document is not granted, and any such reliance shall be at the sole risk of the User. With the consent of CODA and the Client and for a fee, CODA may offer reliance to third parties or contract with other parties to develop findings and opinions related to such party's specific risk management objectives. Except as otherwise agreed in writing, any and all third party reliance upon this Phase I ESA shall be subject to the terms in CODA's standard Terms and Conditions; the $50,000 liability limitation listed in CODA's standard Terms and Conditions (available upon request) constitutes CODA's aggregate liability to any and all relying third parties for any and all claims.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 LOCATION AND LEGAL DESCRIPTION

The subject building is located at 837 North 34th Street, Seattle, King County, Washington. The legal description is described below:

"Denny & Hoyts supplemental plat, portion of Block 84; Denny & Hoyts supplemental plat to City of Seattle & Burlington Northern Inc.'s Sumas Branch right-of-way & Lot 1, Block 98 Lake Union Shorelands; also known as Lot C, City of Seattle Lot Boundary Adjustment Number 9700157, Record Number 970605042."

Note that the commercial building on the subject property operates through a ground lease from Fremont Dock Company. Figures depicting the subject property are located in Appendix A of this report.

2.2 SUBJECT PROPERTY AND VICINITY GENERAL CHARACTERISTICS

The subject property and area reconnaissance, performed on October 12 and 13, 2010, consisted of visual observations made during a foot and vehicular tour of the subject property and adjoining land areas. The area reconnaissance was performed on foot within areas that were reasonably accessible and at CODA's discretion by automobile along publicly accessible roads. CODA's area reconnaissance observations are described in Section 2.5, and subject property observations are described in Section 5.0.

2.3 CURRENT USE OF THE PROPERTY

The subject property is currently used for administrative office functions by two tenants, Institute for Science and Biology and Tableau Software. The remainder of the building is

vacant. Note that the Lake View at Fremont commercial building on the subject property operates through a ground lease from Fremont Dock Company.

2.4 DESCRIPTIONS OF STRUCTURES, ROADS, OTHER IMPROVEMENTS ON THE SUBJECT PROPERTY

The subject property consists of approximately 1.79 acres of land and is improved with one four-story office building that overlies a three-level subterranean parking garage. The footprint of the lowest level of the parking garage underlies the entire subject tax lot and two adjoining lots to the west and south. No other structures were located on-site.

2.5 CURRENT USES OF THE ADJOINING PROPERTIES

Observed current uses of adjoining properties are discussed below according to their respective geographic relationship to the subject property.

North
The subject property was bordered to the north by Costas Opa, Car Quest Auto Parts, Istanbul Imports, Dragon Fly Acupuncture, a catering company, and History House. No suspect *recognized environmental conditions* were identified.

East
The subject property was bordered to the east by the George Washington Memorial Bridge, Aurora Avenue North, Lake Union and Lake Washington Rowing Club. No suspect *recognized environmental conditions* were identified

South
The subject property was bordered to the south by a developed office/commercial building containing Adobe Systems, Google, Getty Images, and other office spaces. No suspect *recognized environmental conditions* were identified.

West
The subject property was bordered to the west by an adjoining building that contains restaurants, a dentist, and several office spaces for rent. No suspect *recognized environmental conditions* were identified.

3.0 USER-PROVIDED INFORMATION

ASTM E 1527-05 requires that the environmental professional request from the User of the Phase I ESA, the Client, certain information (discussed below) concerning the subject property that will help identify the possibility of *recognized environmental conditions* in connection with the subject property or to request from the User the names of other individuals who can provide this information.

ASTM E 1527-05 assigns to the Client or its representative the responsibility to provide the environmental professional with information pertaining to environmental liens or AULs[2]

[2] See ASTM E2091 for additional information about *activity and use limitations* (AULs), their use and function, and standard means to check for existence and evaluate compliance with these controls. CODA can assist the Client with obtaining a copy on request.

(including institutional controls, physical or engineered controls, land use restrictions, restrictive covenants, easements, etc.) applicable to the subject property, whether recorded or not. ASTM E 1527-05 states that the User can engage a title company or title professional as an addition to the scope of work to be performed by the environmental professional. ASTM E 1527-05 and the supporting regulation[3] state that the search for environmental liens/AULs by the User may be a significant component in the Environmental Protection Agency's (EPA's) determination of whether a property owner has satisfied the requirements for landowner liability protection against the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) liability.

Depending on available information and specific site conditions, CODA may conclude that the failure of the User to provide environmental lien/AUL search documentation does not present a significant Data Gap and therefore, can declare that CODA has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. However, failure of the User to provide the information or to engage the environmental consultant or others to obtain and consider that information may separately weaken a defense to CERLCA liability.

If the Client or its representative is aware of specialized knowledge or experience that is material to the identification of *recognized environmental conditions*, or if it has actual knowledge that the purchase price of the subject property is significantly less than the purchase price of comparable properties, ASTM E 1527-05 assigns to the Client the obligation to communicate that information to the environmental professional prior to the subject property reconnaissance. ASTM E 1527-05 requires that an explanation of a significant decrease in purchase price be provided in writing.

ASTM E 1527-05 assigns to the Client or its representative the responsibility to inform the environmental professional of the reason it wants the Phase I ESA performed and to provide commonly known, reasonably available information about the subject property that is material to *recognized environmental conditions*. Absent information to the contrary, the purpose for assessment is assumed to be in preparation for a *commercial real estate transaction*.

As part of CODA's engagement to conduct this work, this information was requested from Stockbridge Real Estate Funds or its representative. In addition, CODA has requested from Stockbridge Real Estate Funds or its representative helpful documents such as those specified in Section 10.8 of ASTM E 1527-05 and as listed in Appendix G. Finally, CODA inquired whether Stockbridge Real Estate Funds or its representative was aware of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the subject property; or (3) any notices from governmental entities regarding possible violations of environmental laws or possible liabilities relating to hazardous substances or petroleum products.

Information provided by others is discussed in Section 6.0. Information and excerpts from reports provided by Stockbridge Real Estate Funds, its representative, or others are included in Appendix G of this report and are listed in Section 11.0.

[3] 40 CFR 312 Standards and Practices for All Appropriate Inquiries

3.1 TITLE RECORDS

Stockbridge Real Estate Funds did not provide CODA with chain-of-title records. However, upon review of the available information, it was CODA's opinion that a chain-of-title document was not required.

3.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

No information regarding environmental liens, AULs, or governmental notification relating to past or recurrent violations of environmental laws with respect to the subject property was reported to CODA by Stockbridge Real Estate Funds or its representative. CODA was provided with a copy of a preliminary commitment for title insurance dated October 9, 2010. The subject property owner was listed as Stockbridge Real Estate Funds Cordillera, LLC. No environmental liens or AULs were identified. A copy of the document is included in Appendix H.

3.3 SPECIALIZED KNOWLEDGE

No specialized environmental knowledge or experience concerning the subject property was reported to CODA by Stockbridge Real Estate Funds or its representative.

3.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

No information indicating that the purchase price of the subject property was significantly less than the purchase price of comparable properties was reported to CODA by Stockbridge Real Estate Funds or its representative.

3.5 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

No commonly known or reasonably ascertainable information about the subject property within the local community that was material to *recognized environmental conditions* in connection with the subject property was reported to CODA by Stockbridge Real Estate Funds or its representative.

3.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

The owner of the property is Quality Properties Asset Management Company. The Property Manager and key site manager is Mr. Chad Lenchuk, an employee of Pinnacle Commercial, has been associated with the subject property since March 2010. The building occupants are Institute for Science and Biology and Tableau Software. Information obtained from interviews with the Key Site Manager is presented in relevant sections of this report.

3.7 REASON FOR PERFORMING PHASE I

CODA understands this assessment was required prior to the proposed purchase of the subject property. CODA understands that the purpose of this assessment was to complete an evaluation that meets the applicable standard of "all appropriate inquiry into the previous ownership and uses of the subject property consistent with good commercial or customary practice" with the objective of assembling documentation that may help to support one of the

threshold criteria for satisfying one or more defenses to CERCLA liability (LLPs[4]) and to assist Stockbridge Real Estate Funds in understanding potential environmental conditions that could materially impact the operation of the business associated with the subject property (*business environmental risk*).

3.8 OTHER

Other information that was provided is listed in Section 11.0 and is discussed throughout this report in applicable sections.

4.0 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

CODA reviewed selected federal and state regulatory lists in an attempt to identify recorded information concerning environmental impacts or conditions or concerns associated with the subject property. CODA reviewed the regulatory lists included in the following table as obtained from Environmental Data Resources (EDR), Milford, Connecticut. A copy of the database report is included in Appendix D, including a listing of the databases, an explanation of each database, and figures depicting the approximate locations of regulated facilities in the near vicinity of the subject property.

Regulatory listings are limited and include only those facilities or incidents that are known to the regulatory agencies at the time of publication to be contaminated, in the process of evaluation for potential contamination, or to store/generate potentially hazardous substances, waste, or petroleum.

Federal, State, and Tribal Lists

The following table includes the approximate minimum search distances and a list of the databases reviewed. These databases were selected based on minimum requirements of ASTM E 1527-05. The number of facilities indicates the number of regulated facilities identified by CODA to be present within the approximate minimum search distance for a particular database.

ASTM FEDERAL, STATE, & TRIBAL DATABASE LISTS		
Database	**Approximate Minimum Search Distance**	**No. of Facilities[5]**
NPL/ State Equivalents	One Mile	8
Delisted NPL	One-half Mile	0
CERCLIS/State Equivalents	One-half Mile	30
CERC-NFRAP Sites	One-half Mile	4
CORRACTS or Violators/ Enforcement	One Mile	0
RCRA Generators	One Quarter Mile	14
RCRA TSD Facilities	One-half Mile	0

[4] Innocent landowner, contiguous property owner, or bona fide prospective purchaser; see CERCLA (1980), SARA (1986), "Lender Liability Act" (1996), and "Brownfields Amendments" (2001).
[5] Facilities field verified to be within the approximate minimum search distance.

ASTM FEDERAL, STATE, & TRIBAL DATABASE LISTS		
Database	**Approximate Minimum Search Distance**	**No. of Facilities[5]**
ERNS	Subject Property	0
ENVIROSTOR	One Mile	0
SWF/LF Report	One-half Mile	1
Open Dump Inventory	One-half Mile	0
LUST List and equivalent	One-half Mile	9
UST List	Subject Property and Adjoining	12
HIST UST and equivalent	Subject Property and Adjoining	0
VCP List	One-half Mile	9
HAZNET	Subject Property and Adjoining	0
AST	Subject Property and Adjoining	0
LIENS	Subject Property	0
Drycleaners	One-half Mile	0
Institutional Control/Engineering Control Registries/Activity Use Limitations (AULs)	Subject Property and Adjoining	3
Brownfields Sites	One-half Mile	0

CODA reviewed the regulatory information provided in the database report to identify listed facilities located within the above approximate minimum search distances. Significant facilities, if any, are discussed in detail below.

SUBJECT PROPERTY LISTINGS

There was one listing for the subject property:

- Lake View Building, North 34th Street and Fremont Avenue – Although the listing does not have the current subject property address, CODA believes the listing is related to the subject property. The site is listed in the Department of Ecology's Allsites database, described as the Agency's listing of facilities and sites of interest to the Department of Ecology. The listing indicates the interaction start date was July 12, 2007. The program associated with the listing is Water Quality According to the DOE's Internet site, construction site operators are required to be covered by a Construction Stormwater General Permit if they are engaged in clearing, grading, and excavating activities that disturb one or more acres and discharge stormwater to surface waters of the state. It is our opinion that the Allsite listing is associated with a stormwater general permit and no further assessment is recommended.

OFF-SITE FACILITIES

The hydraulic relationship of the off-site facilities to the subject property was made by CODA after reviewing the latest topographic map and observations made during the site/area reconnaissance. The assumption for this assessment is that the groundwater flow direction is toward Lake Union, to the south of the subject site. The actual groundwater flow direction may vary for a given area.

U.S. Environmental Protection Agency (EPA) National Priority List (NPL)/Equivalents: There were no federal NPL sites located within one mile radius of the subject property. The State equivalent to the federal NPL, the Hazardous Sites List (HSL), is actually a subset of Washington State's Confirmed & Suspected Contaminated Sites List (CSCSL). Ranking is provided by the Department of Ecology. Eight sites are listed on the HSL list, but all are located in a crossgradient hydraulic position with respect to the subject property.

EPA Comprehensive Environmental Recovery, Compensation and Liability (CERCLIS)/ Equivalents: There is one Federal CERCLIS listed site. The site is over 0.25 miles to the east, and therefore is crossgradient relative to the subject property. The site is unlikely to impact the Lake View at Fremont site.

Washington Department of Ecology (DOE) Allsites database: Three nearby addresses were identified on the EDR database. Harmon Contract, 760 North Northlake Way, Speakerlab, 735 North Northlake Way, and Growing Green Gardens, 711 North Northlake Way. At the time of CODA's area reconnaissance, these businesses were not identified on North Northlake Way. Since the facilities no longer conduct business in the area, they do not represent *recognized environmental conditions*.

DOE Solid Waste Facility / Landfill Facility database: One facility was identified within one-half mile of the subject site. Upon further review the facility is a recycling facility and a solid waste transfer station that is hydraulically crossgradient of the subject site. The facility does not represent a *recognized environmental condition*.

DOE Institutional Control / Engineering Control database: Three facilities are listed within the search distance. However, upon further review, the three sites are located in crossgradient or downgradient positions to the subject property and do not pose a concern to the subject site.

There are 29 sites listed in Washington State's Confirmed & Suspected Contaminated Sites List (CSCSL): The nearest site is over 0.125 miles to the northwest and is crossgradient relative to the subject property. After reviewing the locations and distances of the CSCSL listed sites, the listed sites are unlikely to impact the Lake View at Fremont site.

EPA CERCLA-No Further Remedial Action Planned (NFRAP) Sites: All four sites appear to be crossgradient relative to the subject property and therefore unlikely to cause impacts to the subject site.

There are 10 CSCSL NFA (No Further Action) sites listed within the search radius. These sites have been reviewed by the Department of Ecology and do not require further investigation or cleanup.

EPA Resource Conservation Recovery Act (RCRA) Generators of Hazardous Waste: Three Large Quantity Generators (LQGs) are identified by within the search radius. However, upon further review, the three sites are not located on adjoining properties. Four Small Quantity Generators (SQG) were identified by EDR within the search radius. However, upon further review the four sites are not located on adjoining properties. Seven Conditionally Exempt Small Quantity Generators (CESQG) were identified on the EDR database. However, upon further review, the CESQG were not located on adjoining properties.

DOE Leaking Underground Storage Tank (LUST) List and equivalent: There were nine sites identified in the DOE's LUST database. After reviewing the locations and distances of the CSCSL listed sites as well as reported regulatory status of the sites, the listed sites are unlikely to impact the Lake View at Fremont site.

State of Washington Voluntary Cleanup Program (VCP): The Voluntary Cleanup Program includes sites that have agreed to perform cleanups under the oversight of the Washington DOE. There were nine sites listed in the VCP within a 0.5 mile radius. The sites are crossgradient or at a sufficient distance from the subject property that impacts would be unlikely to impact the Lake View at Fremont.

DOE Registered Underground Storage Tank (UST) List: There are 14 sites identified in the UST database. Listing in the database does not indicate a release has occurred or will occur in the future. Review of the locations and distances from the subject property indicates the site is unlikely to be impacted by the listed sites.

4.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

CODA conducted the following local inquiries to enhance and supplement the ASTM E 1527-05 standard environmental record sources when, in the judgment of the environmental professional, such additional records were deemed to be reasonably ascertainable; were sufficiently useful and accurate, and complete in light of the objective of the records review; and were generally obtained pursuant to local good commercial or customary practice.

Additional Environmental Record Sources/Local Inquiries				
Database/Source	**Entity**	**Facility**	**Response Received Y/N**	**Pertinent Information Available Y/N**
Municipal Inquiry	Seattle Fire Dept.	Subject Property	Y	N
Municipal Inquiry	Seattle Health Dept.	Subject Property	Y	N

Based upon review of other regulatory information discussed above and in Section 4.1, findings indicating suspect *recognized environmental conditions* to the subject property were not anticipated from the City of Seattle.

Copies of the requests and records of communication for these inquiries are included in Appendix E of this report.

4.3 PHYSICAL SETTING SOURCE(S)

Physical setting sources specified in Section 11.0 of this report were reviewed to provide information about the geology and hydrogeology of the subject property. The subject property is located in the Puget Sound physiographic province, a lowland between the Cascade Range on the east and the Olympic Mountains to the west. Elevation at the site is approximately 33 feet above mean sea level.

Surface Drainage and Soil

Based upon the topographic map reviewed, the subject site slopes gently to the south (see topographic maps in Appendix C).

The subject property soil is identified as Fill. Based on a review of the historic Sanborn maps, the majority of the subject property was part of Lake Union until around the turn of the 20th century at which time fill operations were conducted to create a landmass suitable for development. The nature of the fill material was not readily available. A copy of the geotechnical investigation report was not provided for our review. At least 20 feet of soil were removed beneath the footprint of the subject property to construct the parking garage. There was no historical use of the subject property identified that would indicate a soil vapor issue could be present.

Geologic Setting

King County is underlain by the Vashon Stade of Fraser age, consisting of mainly continental glacial till. These deposits were emplaced by the processes associated with the continental ice sheet that advanced through the area in the late Pleistocene.

The native deposits are overlain by fill materials imported from an unknown location. The 1893 Sanborn map shows most of the site as a part of Lake Union with the northern portion being a rail line; however, by 1905 the site had been filled in to above the water level of Lake Union, creating developable land area.

Groundwater

The depth to shallow groundwater (vadose zone) at the subject property was listed as 10 feet below ground surface (December 2009 Environmental Site Assessment report prepared by Property Solutions Incorporated). The EDR database listed several wells in the area that verify depth-to-groundwater at approximately 10 feet below ground surface.

Shallow groundwater generally flows consistent with the topographic down-slope direction. Based upon review of the topographic map, it appeared that the ground-water flow direction in the uppermost water-bearing unit across the subject property would be to the south.

4.4 HISTORICAL USE INFORMATION ON THE SUBJECT PROPERTY

Historical sources specified in Section 11.0 of this report were reviewed to assess on-site historical activities. Copies of historical aerial photographs and topographic maps reviewed are included in Appendix C.

Aerial Photographs

CODA reviewed aerial photographs dated 1936, 1956, 1965, 1968, 1977, 1985, 1990, 2000, 2002, 2006, 2007, and 2009. The 1956 photographs show a large warehouse-type building on site. The 1977 through 1990 photographs depict a “complex” of attached warehouse-type buildings that are unlike the building configuration depicted in the 1956 photograph. The subject property had been redeveloped on the 2000 photograph. The western side of the site was covered with an elevated plaza, the central portion was covered with lawn, and the north and east sides were developed with a parking lot. The subject property appeared

unchanged on the 2002 and 2006 photographs as compared to the 2000 photograph. The 2007 photograph depicted the subject site in the process of redevelopment. The area previously occupied by lawn and the parking lot areas were depicted as graded land. The 2009 photograph shows the subject property developed much as it was during CODA's October 2010 site visit with one commercial office building. No structures, mounding, or excavations of environmental concern were identified on the available photographs.

Sanborn Maps

CODA reviewed Certified Sanborn Fire Insurance Maps dated 1893, 1905, 1919, 1950, and 1968. The 1893 map shows the majority of the site as part of Lake Union with a rail line running east to west along the northern site boundary. The 1905 map depicts the majority of the site developed with Pacific Iron and Steel Works (foundry) and Magnesia Asbestos Supply Company as occupants. The two story foundry building was used as a machine shop, storage area and bench work, pattern shop, and blast furnace powered by coking coal. A 20 foot by 20 foot "tank farm" was depicted between the businesses. The type of product and number of tanks was not identified on the map. Wharfs are present along the south side of the businesses. The rail line still occupies the northern portion of the site and a small south-eastern portion of the site is Lake Union. The 1919 map depicts the site as part of Bryant Lumber and Shingle Mill. The subject site is used for lumber storage only. The railway still occupies the northern portion of the site. The 1950 map shows the site occupied by two dry-kilns, a lumber storage shed, and the railway to the north. The 1968 map shows the site occupied by a plumbing supplies warehouse, a roofing material warehouse, and a general storage warehouse. The railway is still present to the north. The presence of a "tank farm" on the site in 1905 represents a *recognized environmental condition* in connection with the subject property. However, since the tank storage area was relatively small, was not present 14 years later, and at least 30 feet of soil was excavated from this area during the construction of the current parking garage, CODA does not believe that further assessment is warranted. The proposed purchase of the subject property does not include the land.

Topographic Maps

CODA reviewed topographic maps dated 1897, 1909, 1949, 1968, and 1983. The 1897 map shows the subject site as being part of Lake Union. The 1909 map depicts the site as part of Lake Union. The 1949 map shows the site as vacant land with a rail line present along the northern site boundary. The 1968 map shows the site with a commercial-sized structure and a rail line along the north boundary. The 1983 map depicted a large building on the subject site. No symbols of text of environmental concern were identified on the available topographic maps.

City Directories

A city directory abstract was ordered from EDR, but the subject site address did not return any results on North 34th Street. Based on a review of the 1968 Sanborn Map, the on-site business would have had addresses on North Northlake Way. Results for adjoining addresses indicated adjacent commercial property uses, including:

- 724 North 34th Street (1935-1975)
    - Lakeview Hotel Lodgings
    - Probably professional offices (numerous single person listings)
    - Roofer

  - Auto painter
  - Shoemaker
  -
- 730 North 34th Street (1935-1975)
  - Vacant
- 740 North 34th Street (1930)
  - Sheet metal works
- 744 North 34th Street (1925-2005)
  - Carquest Auto Parts
  - Fremont Electric Company (equipment and supplies)
  - Seattle Marine Equipment Company
- 754 North 34th Street (2005)
  - Istanbul Imports

Chain-of-Title

Stockbridge Real Estate Funds or its representative did not provide CODA with title records for review. However, King County indicates the current property owner is Quality Properties Asset Management Company, which acquired the property on March 12, 2010, as a foreclosure. The previous owner was Regional Trustee Services Corporation. Another transaction recorded in the county records was Bedford Property Investors, Inc. granting the property to Quadrant Corporation on December 14, 2004 by quit claim deed. There is no listing showing transfer from Quadrant Corporation to Regional Trustee Services.

No other historical property ownership data was easily ascertainable. The lack of a complete chain-of-title document does not prevent CODA from rendering an opinion as to the potential for *recognized environmental conditions* at the subject property.

4.5 HISTORICAL USE INFORMATION ON ADJOINING PROPERTIES

Nearby property usage could potentially impact the surface and subsurface conditions at a subject property. Developing a history of past uses or occupancies can provide an indication of the potential for *recognized environmental conditions* associated with the subject property. Historical information specified in Section 11.0 of this report was reviewed to assess off-site activities. CODA's findings are presented below.

Aerial Photographs

The 1936 through 2010 photographs show the majority of the surrounding land as developed for industrial usage. No significant changes to the adjoining areas were identified on the remaining aerial photographs. No structures, pits, or mounds of environmental concern were identified on the adjoining properties on the available aerial photographs.

Sanborn Maps

The 1893 map shows properties to the west as being Fremont Milling Company's Plant with stores and domiciles further west. To the north is a mixture of open lots, stores and domiciles. To the east is Lake Union. The 1905 map has Bryant Lumber and Shingle Mill to the south and west, with some two-story domiciles and lumber storage further west. To the north is a mixture of open lots, stores, and domiciles. The 1919 map shows Bryant Lumber and Shingle Mill as covering the entire south and west portions of the map. To the north,

the lots are more consolidated with larger shops and fewer domiciles. The 1950 map shows the areas to the south and west mostly vacant except for some buildings relating to a lumber mill. To the north are mostly shops including an auto parts store and a large private garage. The 1968 map shows the area to the south containing several buildings that may be a tile and floor company. To west are several buildings that appear to be industrial in nature. To the north are mostly shops including an auto parts store and electrical supplies. No recognized environmental conditions were identified on the available Sanborn maps.

Topographic Maps

Due to the small scale of the 1897 and 1909 maps, no details were visible except city streets. The 1949 map depicted the surrounding area as undeveloped land to the south and "built up" area to the north, across the street. The George Washington Bridge is present along the eastern site boundary. The 1968 and 1983 maps depicted the surrounding areas as "built up" areas and commercial-sized structures are present to the west and south of the subject site. No symbols or text of environmental concern were identified on the surrounding properties.

4.6 REVIEW OF PREVIOUS REPORTS

CODA was provided with a copy of one previous environmental report.

Phase I Environmental Site Assessment of The Lakeview Building, 837 North 34th Street, Seattle, Washington, prepared by Property Solutions Inc*, dated December 2009*.

The report was prepared on behalf of Bank of America as a part of pre-purchase due diligence. The subject property was developed with one four-story office building with two tenants that conducted general administrative office functions in support of computer software. No *historical recognized environmental conditions* or recognized environmental conditions were identified. No further assessment was recommended.

5.0 SUBJECT PROPERTY RECONNAISSANCE

5.1 METHODOLOGY AND LIMITING CONDITIONS

CODA visually and physically observed accessible areas of the subject property. The periphery of the subject property was visually and/or physically observed, as well as the periphery of structure on the subject property. The subject property was viewed from adjacent public thoroughfares. In the interior of the structure, CODA observed accessible common areas expected to be used by occupants or the public, as well as maintenance and repair areas. Limitations imposed by physical obstructions or other limiting conditions included:

- None.

5.2 GENERAL SUBJECT PROPERTY SETTING

The subject property reconnaissance was performed by Mr. Lynn Green, an Environmental Professional experienced in environmental site assessments, in an attempt to identify apparent visual indications of present or past activities that have or could have

contaminated the subject property. Mr. Green was accompanied through the building by the Investment Manager, Mr. Chuck Lenchuk. Mr. Lenchuk has been associated with the subject property since March 2010. A Site Plan has been included as Figure 2.

The current use of the subject property was discussed in Section 2.3. A description of structures, roads, and other improvements on the subject property, if any, was presented in Section 2.4.

Hazardous Substances and Petroleum Products in Connection with the Property

No hazardous substances or petroleum products were detected onsite.

Storage Tanks

No USTs or ASTs were detected onsite.

Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were detected.

Pools of Liquid Likely to Contain Hazardous Substances or Petroleum Products

Pools of liquid were not identified.

Drums

No drums were detected onsite.

Hazardous Substances and Petroleum Products Containers (Not Necessarily in Connection with Identified Uses)

No hazardous substances or petroleum products not connected to site use were identified.

Unidentified Substance Containers

Unidentified substance containers were not identified.

Potential Polychlorinated Biphenyls (PCB)-Containing Equipment

One pad mounted transformer was indentified at the northeast corner of the building. The transformer was labeled as having <1ppm of PCBs. Fluorescent lights are located through the building, but given the age of the building (circa 2008), PCB-containing equipment is not suspected.

Hydraulic Equipment

The elevators in the building are all cable operated and do not contain any hydraulic fluid. No evidence of hydraulic equipment was detected onsite.

Source of Heating and Cooling

The buildings are heated and cooled by electrical-powered units.

Stains or Corrosion

Staining and/or corrosion were not identified onsite.

Drains or Sumps

Sump pumps were found on the lowest level of the parking garage. The sumps collect stormwater from the upper levels of the parking garage. Mr. Lenchuk stated that they are rarely used and the water is discharged into the city sewer system.

Pits, Ponds, or Lagoons

Pits, ponds, or lagoons were not identified on the subject property.

Stained Soil or Pavement

Stained soil or pavement was not identified.

Stressed Vegetation

Stressed vegetation was not identified.

Solid Waste

No areas that were apparently filled or graded by non-natural causes (or filled by fill material of unknown origin) suggesting trash, construction debris, demolition debris, or other solid waste disposal was identified. No mounds or depressions suggesting trash or other solid waste disposal were identified.

Waste Water

Two sources of waste water were identified; sanitary sewer waste water and storm water. The sanitary sewer waste water is discharged into the municipal system.

Stormwater runoff flows via sheetflow to the street and then to the city stormwater system.

Wells

No evidence of the presence of wells, potable or monitoring, was identified. According to Mr. Lenchuk, there are no wells on the subject property.

Septic Systems

No on-site septic systems or cesspools were identified.

6.0 INTERVIEWS

ASTM E 1527-05 requires that a reasonable attempt be made to interview past and present owners, operators, and occupants who are likely to have material information about uses and conditions that could present a suspect *recognized environmental condition* to the subject property. ASTM E 1527-05 requires that the owner or its representative be asked to identify a person with good knowledge of the uses and physical characteristics of the subject property who is defined as the Key Site Manager. The interviews were conducted in person, by telephone, or in writing and are discussed in the following table.

Owner(s)

CODA was unable to obtain contact information for the previous owner. CODA interviewed a representative of the current property management company, Pinnacle, Mr. Chad Lenchuk, Investment Manager. Mr. Lenchuk has been the Investment Manager since March 2010. Mr. Lenchuk was not aware of any incidents of environmental concern during his tenure as Investment Manager.

Occupants

The occupants are the Institute for Science and Biology on the second floor and Tableau Software on the fourth floor. The two tenants conduct general administrative office functions only in their respective tenant spaces. At the request of the Key Site Manager, CODA did not interview tenant represents. This does not pose a data gap and does not affect CODA's ability to identify *recognized environmental conditions*.

Records of communication for the interviews conducted are provided in Appendix E.

7.0 FINDINGS

These findings are specific to the structure at the site; although historical occupancy and physical characteristic of the land on which the subject building is constructed are discussed herein, the land is not part of the scope of this assessment. In 2008, the subject building (Lake View at Fremont) was constructed at the site. This construction entailed excavation of some of the fill materials and development of a three levels of parking under the building. To address vehicular emissions, the parking facilities are equipped with ventilation to remove vehicular exhaust (carbon monoxide and any incidental volatile organics and petroleum hydrocarbons that may be present). The current tenants of the building do not use any hazardous materials or generate hazardous wastes.

Historical tenant use included a foundry, asbestos grinding mill, lumber storage yard, plumbing supply storage, and general warehouse storage.

Historically a "tank farm" was identified on a portion of the subject property in the 1905 Sanborn map. The "tank farm" occupied a footprint area approximately 20 feet by 20 feet in size. The number of tanks and tank contents were not identified on the Sanborn map. The "tank farm" was situated between a foundry and an asbestos grinding mill. Other industrial businesses common of the era were also present in the immediate area.

The current improvements are located in a master planned business park known as

Quadrant Lake Union Center and the subject property building is one of eight buildings situated on six parcels. Quadrant Lake Union Center leases the land from Fremont Dock Company on an original 55-year ground lease, with extension options. Redevelopment of the subject property parcel (completed 2008) included a three-level subterranean parking garage that covers the entire footprint of the subject property. and consequentially CODA does not believe that further assessment is warranted.
A "tank farm" was identified on the 1905 Sanborn map. The "tank farm" occupied an area approximately 20 feet by 20 feet. The number of tanks and tank contents were not identified on the Sanborn map. The "tank farm" was situated between a foundry and an asbestos grinding mill.

8.0 OPINION

In the process of the site assessment CODA discovered possible historical environmental conditions associated with the land on which the Lake View at Fremont commercial structure has been developed. (The building and the property are owned by different parties.) In the late 1800s, historical maps indicate the site was largely under the water level of Lake Union. By 1905, placement of fill had raised the site above the water level of Lake Union, and subsequent industrial development of the site location was indicated, including a metals foundry as well as an asbestos grinding plant. The filling and subsequent industrial activities may have lead to impacts to soil and groundwater. However, as previously discussed, the current 2008 development entailed construction of a ventilated three level parking facility under the four-story commercial building. Based on this, even if the underlying soil and/or ground water have been impacted from historical use soils, this risk of an unacceptable health risks from the vapor intrusion exposure pathway is very low.

The presence of a "tank farm" on the site in 1905 represents a *recognized environmental condition* in connection with the subject property.

The current tenants of the building do not use hazardous materials and do not generate hazardous wastes. Since the scope of this Phase 1 ESA pertains to the office building and parking garage, it is our opinion that the Lake View at Fremont does not have any *recognized environmental conditions* relating to a past release or potential imminent release to land or potential unacceptable exposures to potential human receptors.

9.0 CONCLUSIONS AND RECOMMENDATIONS

CODA has performed a Phase I Environmental Site Assessment of The Lakeview Building, located at 837 North 34th Street in Seattle, King County, Washington, in general conformance with the scope and limitations of ASTM Practice E 1527-05. Exceptions to, or deletions from, this practice are described in Section 10.0 of this report.

The historical "tank farm" represents a *recognized environmental condition* in connection with the subject property. Any residual impacted soil from historical operations would have been discovered and excavated during the construction of the garage. Since the current improvements do not include fuel storage or hazardous materials, the historical business activities in the early part of the 20th century as well as the historical tank storage are not material to the current use of the property. CODA does not believe that further assessment is warranted. The proposed purchase of the subject property does not include the land.

Based upon the information obtained, as reflected in this report, this assessment has revealed no evidence of *historical recognized environmental conditions* in connection with the subject building.

10.0 DATA GAPS AND DEVIATIONS

Data gaps are defined as a lack of or inability to obtain information required by ASTM E 1527-05 despite good faith efforts. Significant data gaps that affected the ability of the environmental professional to identify *recognized environmental conditions* were not identified.

Known deviations or deletions from the scope of work defined by ASTM E 1527-05 were not intentionally made.

12.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONAL(S)

I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in Section 312.10 of 40 CFR 312, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

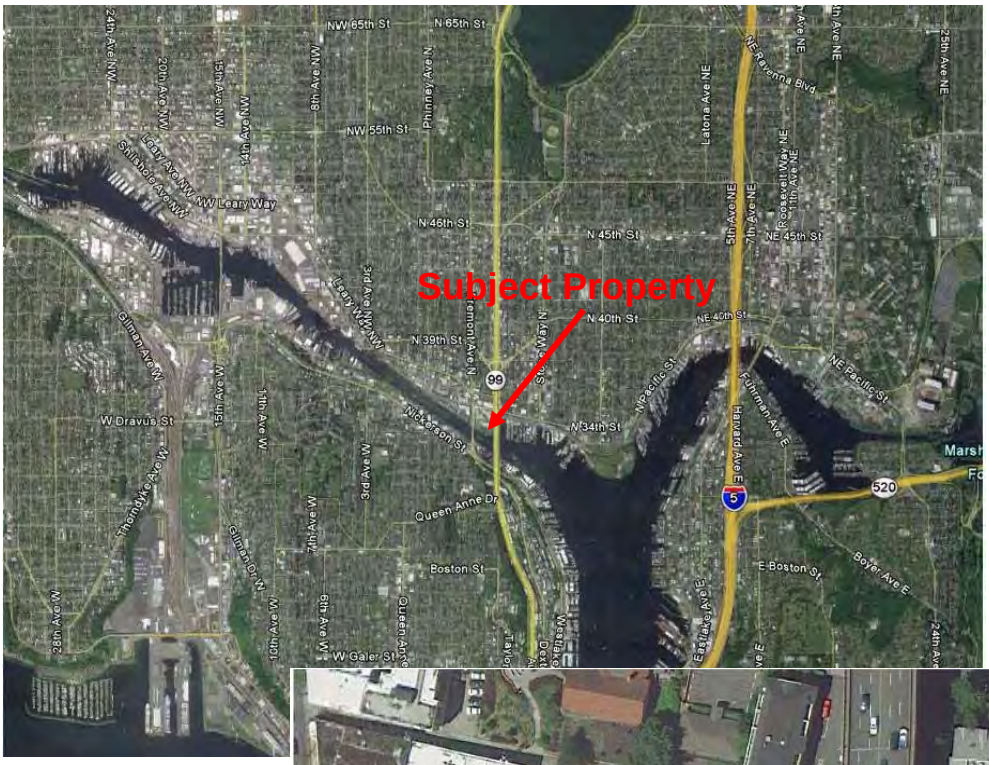

Joe Maulsby
Environmental Professional

13.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL(S)

In accordance with ASTM E 1527-05, this report includes the qualifications of the environmental professional, and the qualifications of the personnel conducting the site reconnaissance and interviews, if conducted by someone other than an environmental professional. These qualifications are documented in Appendix G.

2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

City Directory Report. Three important enhancements have been made to the EDR City Directory Abstract:

1. *Executive Summary.* The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.

2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.

3. *Findings Listed by Location.* Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

Options for Selecting Adjoining Properties. Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

1. *You Select Addresses and EDR Selects Addresses.* Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.

2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.

3. *You Select Addresses.* Use this method for research based solely on the addresses you select or enter into the system.

4. *Hold City Directory Research Option.* If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit www.edrnet.com/2009enhancements

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2005. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR is licensed to reproduce certain City Directory works. Reproduction of City Directories without permission of the publisher may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

837 NORTH 34TH STREET
SEATTLE, WA 98103

COORDINATES

Latitude (North):	47.649000 - 47° 38' 56.4''
Longitude (West):	122.348300 - 122° 20' 53.9''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	548944.2
UTM Y (Meters):	5277276.0
Elevation:	33 ft. above sea level

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 01/29/2010 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

UNITED MARINE SHIPBUILDING	***1441 N NORTHLAKE WAY***	***E 1/4 - 1/2 (0.320 mi.)***	***Y134***	***258***

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 06/23/2009 has revealed that there are 4 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/17/2010 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2010 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 02/17/2010 has revealed that there are 7 RCRA-CESQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent NPL

HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the HSL list, as provided by EDR, and dated 02/17/2010 has revealed that there are 8 HSL sites within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 07/27/2010 has revealed that there are 29 CSCSL sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Ecology's Solid Waste Facilities Handbook.

A review of the SWF/LF list, as provided by EDR, and dated 06/15/2010 has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 07/27/2010 has revealed that there are 10 CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 02/17/2010 has revealed that there are 22 RCRA-NonGen sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there is 1 Manufactured Gas Plants site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
WASHINGTON NATURAL GAS	N 30TH AND BURKE AVE N	ESE 1/2 - 1 (0.605 mi.)	AM199	470

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are 34 EDR Historical Auto Stations sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

SEATTLE, WA 98103
Owner/operator country: US
Owner/operator telephone: Not reported
Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: 02/26/2008
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No
Off-site waste receiver: Commercial status unknown

Historical Generators:

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Owner/operator country: US
Owner/operator telephone: Not reported
Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: 06/05/1996
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No
Off-site waste receiver: Commercial status unknown

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a

ALEXANDER GOW FIRE EQUIPMENT C (Continued) **1000891773**

means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2009

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 2001

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN

ASKO PROCESSING INC (Continued) **1000326717**

OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 141131

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 22228

Waste code: D006
Waste name: CADMIUM
Amount (Lbs): 77307

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 150967

Waste code: D008

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions,

ASKO PROCESSING INC (Continued) **1000326717**

and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Owner/Operator Summary:
- Owner/operator name: SDOT ROADWAY STRUCTURES DIVISION
- Owner/operator address: PO BOX 34996 700 FIFTH AVENUE, SUITE 3900 SEATTLE, WA 98124
- Owner/operator country: US
- Owner/operator telephone: Not reported
- Legal status: Municipal
- Owner/Operator Type: Operator
- Owner/Op start date: 03/04/1998
- Owner/Op end date: Not reported

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No
- Off-site waste receiver: Commercial status unknown

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Phone Number: 2067630380

Tank ID: 4691
Tank Name: 1
Install Date: 12/31/1964
Capacity: Not reported
Tank Upgrade Date: 1/1/0001
TankSystem Status: Removed
TankSystem Status Change Date: 8/26/1996
Tank Status: Removed
Tank Permit Expiration Date: 1/1/0001
Tank Closure Date: 1/1/0001
Tank Pumping System: Not reported
Tank Spill Prevention: Not reported
Tank Overfill Prevention: Not reported
Tank Material: Not reported
Tank Construction: Not reported
Tank Tightness Test: Not reported
Tank Corrosion Protection: Not reported
Pipe Material: Not reported
Pipe Construction: Not reported
Pipe Primary Release Detection: Not reported
Pipe Second Release Detection: Not reported
Pipe Corrosion Protection: Not reported
Tank Primary Release Detection: Not reported
Tank Second Release Detection: Not reported
Pipe Tightness Test: Not reported
Tank Actual Status Date: 8/6/1996
Tag Number: Not reported

Tank ID: 4794
Tank Name: 2
Install Date: 1/1/1962

SEATTLE CITY NORTH RECYCLING & DISP (Continued) **1000421926**

Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:
Owner/operator name: LAKE UNION YACHT CENTER
Owner/operator address: 1341 N NORTHLAKE WAY
SEATTLE, WA 98103
Owner/operator country: US
Owner/operator telephone: Not reported
Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: 08/10/1993
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No
Off-site waste receiver: Commercial status unknown

Violation Status: No violations found

Registry ID: 110011441332

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

LAKE UNION YACHT CENTER (Continued) **1000399520**

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

EPA Region: 10
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:
Owner/operator name: ATOMIC PRESS
Owner/operator address: 1421 N 34TH ST
SEATTLE, WA 98103
Owner/operator country: US
Owner/operator telephone: Not reported
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: 05/19/1985
Owner/Op end date: Not reported

Handler Activities Summary:

ATOMIC PRESS (Continued) **1000299149**

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No
Off-site waste receiver: Commercial status unknown

Violation Status: No violations found

FINDS:

Registry ID: 110005324835

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Owner/Operator Summary:
Owner/operator name: WESTERN INDUSTRIAL INC
Owner/operator address: 1441 N. NORTHLAKE WAY
SEATTLE WA 98103, WA 98103
Owner/operator country: US
Owner/operator telephone: Not reported
Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: 05/04/2000
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No
Off-site waste receiver: Commercial status unknown

Historical Generators:
Date form received by agency: 12/31/2007

Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Description: Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:
Owner/operator name: OROWEAT FOODS CO
Owner/operator address: 1604 N 34TH ST
SEATTLE, WA 98103
Owner/operator country: US
Owner/operator telephone: Not reported
Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: 01/01/1997
Owner/Op end date: Not reported

OROWEAT FOODS CO (Continued) **1000850383**

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No
Off-site waste receiver:	Commercial status unknown

Violation Status: No violations found

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contact email: Not reported
EPA Region: 10
Land type: Private
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:
Owner/operator name: SEATTLE PACIFIC UNIVERSITY
Owner/operator address: 3307 3RD AVE W, SUITE 117
SEATTLE, WA 98119
Owner/operator country: US
Owner/operator telephone: Not reported
Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: 08/14/1996
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No
Off-site waste receiver: Commercial status unknown

Historical Generators:

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington

SEATTLE PACIFIC UNIVERSITY FACILITY OPER (Continued) **1000421967**

Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

NORTAR INC (Continued) **1000360891**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2009

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the

FOSS MARITIME CO (Continued) **1000375162**

Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/02/2010
Date Data Arrived at EDR: 07/14/2010
Date Made Active in Reports: 10/04/2010

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/02/2010

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/02/2010

Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/29/2010
Date Data Arrived at EDR: 02/09/2010
Date Made Active in Reports: 04/12/2010

Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2010

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010
Date Made Active in Reports: 05/17/2010

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/17/2010

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Data Release Frequency: Semi-Annually

State- and tribal - equivalent CERCLIS

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 07/27/2010
Date Data Arrived at EDR: 07/28/2010
Date Made Active in Reports: 09/22/2010

Data Release Frequency: Semi-Annually

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Solid Waste Facility Database

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 06/15/2010

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites Listing
A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

Date of Government Version: 07/27/2010
Date Data Arrived at EDR: 07/28/2010
Date Made Active in Reports: 09/22/2010

Next Scheduled EDR Contact: 11/08/2010
Data Release Frequency: Varies

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/07/2010
Date Data Arrived at EDR: 06/18/2010

CSCSL NFA: Confirmed and Contaminated Sites - No Further Action
The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, a No Further Action code is entered based upon the type of NFA determination the site received.

Date of Government Version: 07/27/2010

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

COUNTY RECORDS

KING COUNTY:

Abandoned Landfill Study in King County

The King County Abandoned Landfill Survey was conducted from October through December 1984 by the Health Department's Environmental Health Division at the request of the King County Council. The primary objective of the survey was to determine if any public health problems existed at the predetermined 24 sites.

Date of Government Version: 04/30/1985
Date Data Arrived at EDR: 11/07/1994
Date Made Active in Reports: N/A
Number of Days to Update: 0

TACOMA/PIERCE COUNTY:

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

Date of Government Version: 09/01/2002

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Daycare Center Listing
Source: Department of Social & Health Services
Telephone: 253-383-1735

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Longitude (West):	122.3483 - 122° 20' 53.9''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	548944.2
UTM Y (Meters):	5277276.0
Elevation:	33 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	47122-F3 SEATTLE NORTH, WA
Most Recent Revision:	1983

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

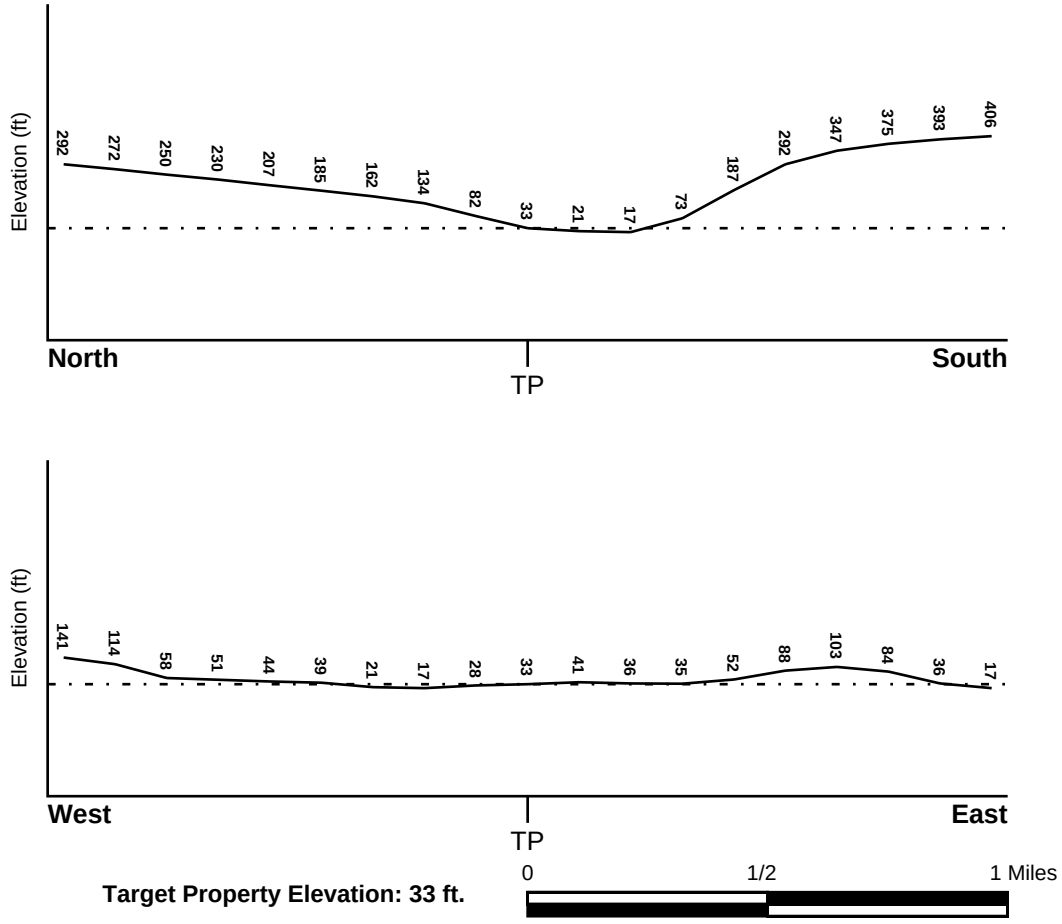

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 33 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
KING, WA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 53033C0340F - FEMA Q3 Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SEATTLE NORTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/8 - 1/4 Mile NW
Site Name:	ACME PLATING WORKS
Site EPA ID Number:	WAD980726442
Groundwater Flow Direction:	S TOWARD THE CANAL
Inferred Depth to Water:	20 feet to 30 feet
Hydraulic Connection:	Information is not available about the hydraulic connection between aquifer(s) underlying the site.
Sole Source Aquifer:	A sole source aquifer is not persent at or near the site
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/2 - 1 Mile NE	S
F22	1/2 - 1 Mile North	NE

For additional site information, refer to Physical Setting Source Map Findings.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	ALDERWOOD
Soil Surface Texture:	gravelly - sandy loam
Hydrologic Group:	Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class:	Moderately well drained. Soils have a layer of low hydraulic conductivity, wet state high in the profile. Depth to water table is 3 to 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	7 inches	gravelly - sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 6.00 Min: 2.00	Max: 6.50 Min: 5.10
2	7 inches	35 inches	very gravelly - loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 6.00 Min: 2.00	Max: 6.50 Min: 5.10
3	35 inches	39 inches	cemented	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
very gravelly - sandy loam

Surficial Soil Types: silt loam
very gravelly - sandy loam

Shallow Soil Types: very gravelly - loam

Deeper Soil Types: very gravelly - coarse sand
stratified
very gravelly - loamy sand
very gravelly - sand

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells
Source: Department of Health

CODA CONSULTING GROUP

RECORD OF COMMUNICATION

Date / Time:	Oct, 13 2010	**CODA Project No.**	10-069
Call Made By:	Nici Schroeter	**Project Name:** Lake View at Fremont **734-10001-01**	
Call Made To:	Sherry Burkley Fire Marshal's Office	**Telephone No.** **206-3861400**	
Subject:	Enviro. Issues	**Distribution**	file

Topics Discussed:

- Requested information on records of hazardous substance spill incidents or other fire dept responses. There were no records found.
- Requested information on records of underground or above-ground storage tanks, decommissioning or cleanups. There were no records found
- Explained that we are evaluating the facility for the Owner and performing a Phase 1 ESA.

Next Action: Submit letter request via email

QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Coni Hennersdorf is a seasoned professional with over 28 years of diversified business experience providing technical recommendations to real estate professionals and institutional investors of commercial property for investments, improvements and environmental risk management. She has demonstrable ability to manage several complex projects simultaneously while maintaining constant attention to detail and execution. Her career focuses on engineering and environmental studies as they relate to the condition of commercial real estate holdings. Her broad range of experience extends to the construction of mixed use and Brownfield projects; the sale of industrial and office properties; the development of medical office buildings; the formation of urban redevelopment projects including mixed use facilities or office, industrial, and retail space as well as live-work projects.

Representative Project Experience

FEIN, Belmont and Carleton, Property Condition Assessment, 2 Multi-family Apartment Communities, January 2009
Stockbridge Texas Teachers, Property Condition Assessment of 120 Industrial properties in 13 States, May 2009
BlackRock, Calhoun Square, Minneapolis, MN, Property Condition Assessment, Mix Use Live Work Retail, June 2009
TRT, Westin Galleria and Weston Oaks, Houston TX, Property Condition Assessment, 2 Mid-rise Hotels and Convention space June 2009;
AMB, Lonestar Portfolio, Dallas Texas, Property Condition Assessment, 8 Industrial Facility, July 2009
IMT Monterey Ranch, Austin TX, Property Condition Assessment,3 Residential Community, August 2009
Security Capital, ENTRADA, San Diego, CA, Property Condition Assessment, Residential Community October 2009
QORE, 1201 K Street, Sacramento, CA, Property Condition Assessment, Office Complex with Parking, November 2009
SSC, Murphy Ranch, San Jose, CA Five Building Mid rise Office Complex and Parking, May 2009
METLIFE, Property Condition Assessment of Two Mid-Rise office buildings and parking, November 2009
Northwestern Mutual, Property Condition Assessment, Chase Tower, Seattle, WA High-rise office and parking August 2009;
METLIFE, One Shell Square, New Orleans, LA, Property Condition Assessment, High-rise and parking September 2008;
BlackRock, Property Condition Assessment Hollywood Towers, High-rise Residential Complex and Parking, September 2008
Lincoln Center, Dallas Texas, Property Condition Assessment of 3 High-rise Office Buildings and parking garage totaling 1.6 million square feet of commercial office, August 2005;
Archstone-Smith, Property Condition Assessment of 34 Multi-family Residential Communities in 9 States, May 2005;
Dividend Capital – Cabot, Property Condition Assessment of 105 Industrial properties in 10 States, May 2005;

Conilee Hennerdsorf, PE

Partner

Education:
Bachelors of Science, Engineering Science and Mechanics (Structural and Architectural emphasis); University of Tennessee, Knoxville - 1981

Registration:

Civil Engineer, Texas, 1994

Joe Maulsby has been qualified to conduct environmental assessments and compliance assessments since 1992. His total business experience spans over 28 years. Joe's realm of experience is focused on environmental assessments (Phase I and Phase II) for commercial properties. Tasks involved in such projects include: evaluation of chemical/hazardous substance storage, historical research of site use, compliance of operations with regulatory requirements, and audits of properties containing underground and aboveground storing tanks. Subsurface site assessments include the placement of soil borings, field screening of soil samples, selection of soil samples for laboratory analysis, and installation of groundwater monitoring wells with associated groundwater sample collection.

As the Project Manager, Mr. Maulsby is responsible for coordinating with sub-consultants, report peer review, and also directing the work of contractors assigned to the various projects. His knowledge base includes familiarity with numerous state environmental regulations and federal regulations along with the Texas Commission on Environmental Quality (TCEQ) and their Voluntary Cleanup Program (VCP). He has worked with the TCEQ in preparing VCP application agreements and formulating work plans to bring properties into compliance and acquiring site closure documentation.

Representative Projects

Underground Storage Tank (UST) Removal; Dallas, TX - Mr. Maulsby has managed the removal of USTs from City of Dallas Fire Stations, collected confirmatory soil samples, and wrote tank closure reports which were submitted to the Texas Commission on Environmental Quality (TCEQ) for approval.

Environmental Services; Various Locations - Mr. Maulsby has coordinated the environmental efforts on several large portfolios: 120 commercial office/warehouse buildings (US), 28 warehouse/distribution buildings (Carlstadt, NJ), and 32 air cargo warehouse/distribution facilities (Jamaica, NY). The assessments included tenant interviews, regulatory file review, conducting subsurface assessments, and report preparation to document compliance with regulatory requirements.

Environmental Compliance Audit; Dallas, TX **-** Mr. Maulsby conducted an on-site audit of a national airline fuel tank farm. The audit required a working knowledge of state and federal regulations pertaining to underground fuel storage. Upon completion of the audit, a report was generated outlining the findings, conclusions, and recommendations.

Phase II Environmental Site Assessment (ESA); Carrollton, TX **-** Mr. Maulsby conducted a Phase II ESA on a commercial tract of vacant land to assess whether off-site facilities had environmentally impacted the property. Twelve soil borings were advanced and three permanent groundwater monitoring wells were installed. Based upon low levels of contamination detected in the soil and groundwater, it was recommended to the client that an application be made to the TCEQ VCP. The site received closure and a Certification of Completion was issued.

Groundwater Treatment System, Houston, TX – Mr. Maulsby coordinated the efforts of the field technician during the operations and maintenance activities of a pump and treat system, groundwater sampling events, and report preparation for submittal to the TCEQ.

Soil Remediation, Houston, TX – Mr. Maulsby conducted an extensive soil vapor survey with follow-up soil borings and testing at a shopping center which had known groundwater contamination. A Remedial Action Work Plan was prepared, submitted, and approved by the TCEQ. Mr. Maulsby coordinated the efforts of field personnel during excavation of approximately 300 cubic yards of contaminated soil. The contaminated soil was treated on site by steam injection and transported offsite for landfill disposal.

Joe Maulsby

Director, Environmental Services

Education

Bachelor of Science, Geology, University of Oklahoma, 1980;

Master of Science, Geology, New Mexico Institute of Mining & Technology, 1981

Lynn Green Lynn has over a decade of experience as a Project Manager in the natural resources and environmental areas. Lynn has worked extensively on a variety of environmental issues, including: environmental contamination, ground water resource utilization, risk assessment and environmental modeling, storm water control and mitigation, and aggregate resources. He has performed diverse types of modeling to address environmental problems, including pollution dispersion, fate and transport, comparative risk analysis, cross-media transport, and statistical data analysis. He is experienced in a variety of chemical analytical methodologies including sampling, sample analysis, data quality assurance and validation, and statistical analysis and is experienced in performing large-scale data collection activities for evaluating hydrogeologic systems, remedial investigations, and particle migration pathway analysis.

Lynn is responsible for project management, sampling and analytical protocols, analytical and numerical modeling of environmental systems (air, subsurface soil, surface water, groundwater and cross-media transport), slope stability analysis, data validation and analysis, monitoring and evaluation of environmental systems, stream bank stabilization and watershed restoration. He also provides expertise in baseline, analytical and comparative risk assessments and the environmental impact statements.

Representative Projects

Lynn's projects include Phase I and Phase II Environmental Site Assessments for many types of facilities, including: hospitals, factories, warehouses, hotels, apartment complexes, agricultural properties, and service stations. Other studies have been performed for airport facilities, lumber mills, pulp and paper facilities, dry cleaners, industrial metal scrapping operations, and petroleum-distributions facilities.

INFORMATION REQUESTED FROM CLIENT
EXCERPTS FROM DOCUMENTS PROVIDED BY CLIENT OR OTHERS

USER INFORMATION REQUEST

In accordance with ASTM E1527-05 (All Appropriate Inquiry) in order to qualify for one of the Landowner Liability Protections (LLPs) *offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the* ***USER OF THE ASSESSMENT REPORT MUST*** *provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. The Key Site Manager has good knowledge of the uses and physical characteristics of the property.*

Property Name: Lake View at Freemont

Address: 837 North 34th Street, Seattle, WA

Contact for Site Access: Tom Abbott, CBRE

Contact for Key Site Manager: Tom Abbott

AAI-Required Information (per 40 CFR§312):

1. Is the ***USER*** aware of environmental liens (federal, state, tribal, or local) associated with the *property*?

☑ No ☐ Yes If yes, please attach an explanation and copies of environmental lien information.

2. Is the ***USER*** aware of deed restrictions, engineering or institutional controls, or other Activity and Use Limitations (AULs) filed under federal, state, tribal, or local law?

☑ No ☐ Yes If yes, please attach an explanation copies of AUL information.

3. Does the ***USER*** possess actual or specialized knowledge or experience that is material to potential *recognized environmental conditions*?

☑ No ☐ Yes If yes, please attach an explanation.

4. If the property is being purchased, is the purchase price...

☐ less than fair market value?

☐ more than fair market value?

☑ the same as fair market value?

☐ relationship to fair market value unknown?

(NOTE: You do not have to disclose the purchase price.)

If the purchase price is *less than* fair market value, is the ***USER*** aware of reasons, environmental or otherwise, that would explain the differential?

☐ No ☐ Yes If yes, please attach an explanation.

5. Is the ***USER*** aware of commonly known or reasonably ascertainable information that is material to potential *recognized environmental conditions*?
For example: Do you know the past uses of the *property*?
Do you know of specific chemicals that are present or once were present at the *property*?
Do you know of spills or other chemical releases that have occurred at the *property*?
Do you know of chemical cleanups that have occurred at the *property*?)

☑ No ☐ Yes If yes, please attach an explanation.

6. Does the ***USER*** possess knowledge of (1) pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property; or (3) notices from governmental entity regarding possible violations of environmental laws or possible liability relating to hazardous substances or petroleum products?

☑ No ☐ Yes If yes, please attach an explanation.

7. What is the **USER'S** reason for having the Phase I Environmental Site Assessment performed?

☑ Purchase ☐ Lease ☐ Other (please attach explanation)

☐ Sale ☐ Loan

COMMITMENT FOR TITLE INSURANCE

Issued by

FIRST AMERICAN TITLE INSURANCE COMPANY

First American Title Insurance Company, herein called the Company, for valuable consideration, hereby commits to issue its policy or policies of title insurance, as identified in Schedule A, in favor of the proposed Insured named in Schedule A, as owner or mortgagor of the estate or interest covered hereby in the land described or referred to in Schedule A, upon payment of the premiums and charges therefor; all subject to the provisions of Schedules A and B and to the Conditions and Stipulations hereof.

This Commitment shall be effective only when the identity of the proposed Insured and the amount of the policy or policies committed for have been inserted in Schedule A hereof by the Company, either at the time of the issuance of the Commitment or by subsequent endorsement.

This Commitment if preliminary to the issuance of such policy or policies of title insurance and all liability and obligations hereunder shall cease and terminate six (6) months after the effective date hereof or when the policy or policies committed for shall issue, whichever first occurs, provided that the failure to issue such policy or policies is not the fault of the Company. This Commitment shall not be valid or binding until countersigned by an authorized officer or agent.

IN WITNESS WHEREOF, the Company has caused this commitment to be signed and sealed, to become valid when countersigned by an authorized officer or agent of the Company, all in accordance with its By-Laws. This Commitment is effective as of the date shown in Schedule A as "Effective Date."

3. The estate or interest in the land described on Page 2 herein is **A leasehold estate as created by that certain unrecorded ground sublease dated November 1, 2006, executed by The Quadrant Corporation, a Washington corporation as Sublessor and Michael R. Mastro, a married man as his separate estate, as Sublessee, as disclosed by Memorandum of Ground Sublease recorded March 23, 2007 as Recording No. 20070323002502.**

The Sublessee's interest under the Ground Sublease has been assigned to Bank of America, N.A., a national banking association by Trustee's Deed recorded March 16, 2010 as Recording No. 20100316000684, and title thereto is at the effective date hereof vested in:

Quality Properties Asset Managment Company, an Illinois corporation

4. The land referred to in this Commitment is described as follows:

The land referred to in this report is described in Exhibit A attached hereto.

EXHIBIT 'A'

LEGAL DESCRIPTION:

THOSE PORTIONS OF BLOCK 84, DENNY AND HOYT'S SUPPLEMENTAL PLAT TO THE CITY OF SEATTLE, ACCORDING TO THE PLAT THEREOF RECORDED IN VOLUME 3 OF PLATS, PAGE 3, IN KING COUNTY, WASHINGTON, AND OF THE BURLINGTON NORTHERN, INC., RIGHT OF-WAY FOR ITS FORMER SUMAS BRANCH IN SECTION 18, TOWNSHIP 25 NORTH, RANGE 4 EAST, W.M., IN KING COUNTY, WASHINGTON, AND OF LOT 1, BLOCK 98, LAKE UNION SHORELANDS, AS SHOWN ON THE OFFICIAL MAPS ON FILE IN THE OFFICE OF THE COMMISSIONER OF PUBLIC LANDS AT OLYMPIA, WASHINGTON, SAID PORTIONS BEING DESCRIBED AS A WHOLE AS FOLLOWS:

COMMENCING AT THE INTERSECTION OF THE NORTHERLY PROLONGATION OF THE EAST LINE OF THE WEST 7.00 FEET OF SAID BLOCK 84 AND THE NORTHERLY MARGIN OF SAID BURLINGTON NORTHERN RIGHT-OF-WAY;
THENCE SOUTH 77° 28' 32" EAST 194.84 FEET ALONG SAID NORTHERLY MARGIN TO THE TRUE POINT OF BEGINNING;
THENCE SOUTH 06° 16' 09" WEST 117.67 FEET;
THENCE SOUTH 77° 28' 32" EAST 69.78 FEET;
THENCE SOUTH 12° 31' 28" WEST 31.25 FEET;
THENCE SOUTH 77° 28' 32" EAST 70.75 FEET;
THENCE SOUTH 12° 31' 28" WEST 24.72 FEET;
THENCE SOUTH 77° 28' 32" EAST 50.92 FEET;
THENCE SOUTH 12° 31' 28" WEST 121.78 FEET;
THENCE SOUTH 77° 28' 32" EAST 50.86 FEET;
THENCE EAST 99.03 FEET TO THE WEST LINE OF THE EAST 50.71 FEET OF SAID LOT 1 AND THE WEST MARGIN OF AURORA AVENUE NORTH;
THENCE NORTH 00° 18' 53" EAST 197.69 FEET ALONG SAID WEST LINE AND MARGIN AND ITS NORTHERLY PROLONGATION TO THE SOUTHERLY MARGIN OF SAID BURLINGTON RIGHT-OF-WAY;
THENCE SOUTH 77° 29' 04" EAST 194.04 FEET ALONG SAID SOUTHERLY MARGIN TO THE NORTHERLY PROLONGATION OF THE EAST MARGIN OF SAID AURORA AVENUE NORTH;
THENCE NORTH 00° 18' 53" EAST 81.85 FEET ALONG SAID NORTHERLY PROLONGATION OF SAID EAST MARGIN TO SAID NORTHERLY MARGIN;
THENCE NORTH 77° 28' 32" WEST 486.72 FEET ALONG SAID NORTHERLY MARGIN TO THE TRUE POINT OF BEGINNING;

(ALSO KNOWN AS LOT C, CITY OF SEATTLE LOT BOUNDARY ADJUSTMENT, MASTER USE PERMIT APPLICATION NO. 9700157, RECORDED UNDER RECORDING NUMBER 9706050452).

SCHEDULE B - SECTION 1
REQUIREMENTS

The following are the Requirements to be complied with:

Item (A) Payment to or for the account of the Grantors or Mortgagors of the full consideration for the estate or interest to be insured.

Item (B) Proper instrument(s) creating the estate or interest to be insured must be executed and duly filed for record.

Item (C) Pay us the premiums, fees and charges for the policy.

Item (D) You must tell us in writing the name of anyone not referred to in this Commitment who will get an interest in the land or who will make a loan on the land. We may then make additional requirements or exceptions

SCHEDULE B - SECTION 2
GENERAL EXCEPTIONS

The Policy or Policies to be issued will contain Exceptions to the following unless the same are disposed of to the satisfaction of the Company.

A. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.

B. Any facts, rights, interest, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of person in possession thereof.

C. Easements, claims of easement or encumbrances which are not shown by the public records.

D. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.

E. (1) Unpatented mining claims; (2) reservations or exceptions in patents or in acts authorizing the issuance thereof; (3) Water rights, claims or title to water; whether or not the matters excepted under (1), (2) or (3) are shown by the public records; (4) Indian Tribal Codes or Regulations, Indian Treaty or Aboriginal Rights, including easements or equitable servitudes.

F. Any lien, or right to a lien, for services, labor, materials or medical assistance theretofore or hereafter furnished, imposed by law and not shown by the public records.

G. Any service, installation, connection, maintenance, construction, tap or reimbursement charges/costs for sewer, water, garbage or electricity.

H. Defects, liens, encumbrances, adverse claims or other matters, if any, created, first appearing in the public records or attaching subsequent to the effective date hereof but prior to the date the proposed insured acquires of record for value the estate or interest or mortgages thereon covered by this Commitment.

SCHEDULE B - SECTION 2
(continued)
SPECIAL EXCEPTIONS

1. Lien of the Real Estate Excise Sales Tax and Surcharge upon any sale of said premises, if unpaid. As of the date herein, the excise tax rate for the **City of Seattle** is at **1.78**%. Levy/Area Code:

   For all transactions recorded on or after July 1, 2005:
   - **A fee of $10.00 will be charged on all exempt transactions;**
   - **A fee of $5.00 will be charged on all taxable transactions in addition to the excise tax due.**

2. Right and interest of the State of Washington over said premises for the Aurora Avenue Bridge.

3. Release of damages from all liability to adjacent property and property owners for the improvement, enlargement, construction, maintenance and controlling of the waterway and ship canal connecting the waters of Puget Sound by Salmon Bay with Lakes Union and Lake Washington, and for such other general purposes as may be incident thereto; as contained in Final Decree for Condemnation:

Entered:	November 25, 1898
King County Superior Court Case No.:	21942
In Favor of:	King County and the United States of America

4. Right of King County to make necessary slopes for cuts or fills upon said premises for road, acquired by condemnation decree entered in King County Superior Court Cause No. 108136.

5. Reservations contained in Deed from the State of Washington recorded under Recording No. 1423670, reserving all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same.

6. The terms and provisions contained in the document entitled "Public Place Indemnity Agreement" recorded January 19, 1972 as Recording No. 7201190407 of Official Records.

7. Conditions, notes, easements, provisions contained and/or delineated on the face of the Survey recorded July 13, 1987 under Recording No. 8707139001 in Volume 56 of surveys, at Page(s) 130, in King County, Washington.

8. The terms and provisions contained in the document entitled "Grade Release" recorded November 2, 1987 as Recording No. 8711020942 of Official Records.

9. The terms and provisions contained in the document entitled "Release of Damages" recorded November 2, 1987 as Recording No. 8711020943 of Official Records.

10. Side sewer easement, including terms and provisions contained therein:

Location:	Along the line as constructed
Width:	6 feet
Recording Information:	November 2, 1987 under Recording No. 8711020944

11. Reservations and exceptions, including the terms and conditions thereof:

Reserving:	Minerals
Reserved By:	Burlington Northern Railroad Company (formerly named Burlington Northern Inc.,), a Delaware corporation
Recorded:	January 24, 1989
Recording Information:	8901240577

12. Conditions, notes, easements, provisions contained and/or delineated on the face of the Survey recorded January 26, 1989 under Recording No. 8901269013 in Volume 64 of surveys, at Page(s) 205, in King County, Washington.

    Document(s) declaring modifications thereof recorded December 29, 1989 as Recording No. 8912299019 of Official Records.

13. The terms, provisions and easement(s) contained in the document entitled "Easement Agreement" recorded March 17, 1992 as Recording No. 9203172094 of Official Records.

14. The terms and provisions contained in the document entitled "Memorandum of Agreement Regarding Building 3:" recorded January 30, 1997 as Recording No. 9701300934 of Official Records.

15. The terms and provisions contained in the document entitled "Memorandum of Agreement" recorded January 30, 1997 as Recording No. 9701300935 of Official Records.

    The terms and provisions contained in the document entitled "Partial Release of Rights" recorded December 14, 1999 as Recording No. 19991214000692 of Official Records.

16. The terms and provisions contained in the document entitled "Memorandum of Agreement" recorded January 30, 1997 as Recording No. 9701300936 of Official Records.

    The terms and provisions contained in the document entitled "Partial Release of Rights" recorded December 14, 1999 as Recording No. 19991214000692 of Official Records.

17. The terms and provisions contained in the document entitled "Memorandum of Drainage Control Plan" recorded April 24, 1997 as Recording No. 9704240619 of Official Records.

18. Terms, covenants, conditions and restrictions as contained in recorded Lot Line Adjustment (Boundary Line Revision) 9700159 :

Recorded:	June 5, 1997
Recording Information:	9706050451

19. Terms, covenants, conditions and restrictions as contained in recorded Lot Line Adjustment (Boundary Line Revision) 9700157 :

Recorded:	June 5, 1997
Recording Information:	9706050452

20. The terms and provisions contained in the document entitled "Memorandum of Right of First Refusal to Purchase Property" recorded March 12, 1998 as Recording No. 9803120830 of Official Records.

21. The terms and provisions contained in the document entitled "Owner's Covenant" recorded May 14, 1999 as Recording No. 9905141925 of Official Records.

22. Easement, including terms and provisions contained therein:

Recording Information:	October 5, 1999 under Recording No. 19991005000121
In Favor of:	City of Seattle, a municipal corporation
For:	Electric distribution system
Affects:	As described therein

23. Lease made by Fremont Dock Company, a Washington corporation, lessor, to The Quadrant Corporation, a Washington corporation, lessee, for a term of 55 years, and the covenants and conditions as therein contained, as disclosed by Memorandum of Amended and Restated Ground Lease dated March 11, 1998, and recorded October 21, 1999 as Recording No. 19991021000310.

    The Deed of Trust/Mortgage was Partially reconveyed as to a portion of the property as described therein by instrument recorded March 12, 1998 under Recording No. 9803120831.

    Said instruments are an amendment and restatement of Memorandum of Ground Lease recorded June 19, 1987 as Recording No. 8706190721, which was amended by Recording Nos. 9705291950 and 9705291951, recorded May 29, 1997.

    Document(s) declaring modifications thereof recorded January 31, 2001 as Recording No. 20010131000784 of Official Records.

24. Covenants, conditions, restrictions and/or easements:

Recorded:	March 23, 2000
Recording No.:	20000323000174

    The Deed of Trust/Mortgage was Partially reconveyed as to a portion of the property as described therein by instrument recorded February 23, 1998 under Recording No. 9802231707.

    Said instruments are amendment and restatement of Recording No. 9701300926, recorded January 30, 1997.

    Document(s) declaring modifications thereof recorded December 20, 1999 and June 22, 2000 as Recording Nos. 19991220000130 and 20000622001160 of Official Records.

25. The terms, provisions and easement(s) contained in the document entitled "Temporary Access Easement and Subordination Agreement" recorded March 7, 2005 as Recording No. 20050307001886 of Official Records.

26. The terms, provisions and easement(s) contained in the document entitled "Ordinance 121872" recorded August 12, 2005 as Recording No. 20050812000040 of Official Records.

27. This item has been intentionally deleted.

28. Title to vest in an incoming owner whose name is not disclosed. Such name must be furnished to us so that a name search may be made.

29. Unrecorded leaseholds, if any, rights of vendors and security agreement on personal property and rights of tenants, and secured parties to remove trade fixtures at the expiration of the term.

INFORMATIONAL NOTES

A. Effective January 1, 1997, and pursuant to amendment of Washington State Statutes relating to standardization of recorded documents, the following format and content requirements must be met. Failure to comply may result in rejection of the document by the recorder.

B. Any sketch attached hereto is done so as a courtesy only and is not part of any title commitment or policy. It is furnished solely for the purpose of assisting in locating the premises and First American expressly disclaims any liability which may result from reliance made upon it.

C. The description can be abbreviated as suggested below if necessary to meet standardization requirements. The full text of the description must appear in the document(s) to be insured.

Ptn. Blk 84, Denny and Hoyt's Suppl. Plat, Vol. 3 Pg. 3; Ptn. Lot 1, Blk. 98, Lake Union Shorelands; Ptn SW 1/4, 18-25-04 aka Lot C, BLA No. 9700157, Rec 9706050452

D. General taxes for the year 2010 which have been paid.

Tax Account No.	197320-0389-08
Amount:	$294,741.95
Assessed Land Value:	$7,419,000.00
Assessed Improvement Value:	$24,855,000.00

E. A fee will be charged upon the cancellation of this Commitment pursuant to the Washington State Insurance Code and the filed Rate Schedule of the Company.

END OF SCHEDULE B

First American Title Insurance Company
National Commercial Services

COMMITMENT
Conditions and Stipulations

1. The term "mortgage" when used herein shall include deed of trust, trust deed, or other security instrument.

2. If the proposed Insured has or acquires actual knowledge of a defect, lien, encumbrance, adverse claim or other matter affecting the estate or interest or mortgage thereon covered by this Commitment, other than those shown in Schedule B hereof, and shall fail to disclose such knowledge to the Company in writing, the Company shall be relieved from liability for any loss or damage resulting from any act or reliance hereon to the extent the Company is prejudiced by failure to so disclose such knowledge. If the proposed Insured shall disclosure such knowledge to the Company, or if the Company otherwise acquires actual knowledge of any such defect, lien, encumbrance, adverse claim or other matter, the Company at its option, may amend Schedule B of this Commitment accordingly, but such amendment shall not relieve the Company from liability previously incurred pursuant to paragraph 3 of these Conditions and Stipulations.

3. Liability of the Company under this Commitment shall be only to the named proposed Insured and such parties included under the definition of Insured in the form of Policy or Policies committed for, and only for actual loss incurred in reliance hereon in undertaking in good faith (a) to comply with the requirements hereof, or (b) to eliminate exceptions shown in Schedule B, or (c) to acquire or create the estate or interest or mortgage thereon covered by this Commitment. In no event shall such liability exceed the amount stated in Schedule A for the Policy or Policies committed for and such liability is subject to the Insuring provisions, exclusion from coverage, and the Conditions and Stipulations of the form of Policy or Policies committed for in favor of the proposed Insured which are hereby incorporated by references, and are made a part of this Commitment except as expressly modified herein.

4. Any claim of loss or damage, whether or not based on negligence, and which arises out of the status of the title to the estate or interest or the lien of the Insured mortgage covered hereby or any action asserting such claim, shall be restricted to the provisions and Conditions and Stipulations of this Commitment.

PRIVACY POLICY

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our parent company, The First American Corporation, we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information which you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its Fair Information Values, a copy of which can be found on our website at www.firstam.com.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and·
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies, and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies, or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's Fair Information Values. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

APPENDIX D

SECTIONS 8.5 AND 8.6:
CERTIFICATIONS AND SCOPE OF WORK

8.5.1

CERTIFICATIONS AND QUALIFICATIONS

Adele C. Brandl – Associate Consultant

B.S., Animal Science/Agriculture, Pennsylvania State University

Ms. Brandl has more than three years of experience in the environmental service industry conducting Phase I Environmental Site Assessments of commercial, industrial and multi-family residential properties in the Northwestern United States. Ms. Brandl provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Environmental Transaction Analyses, Transaction Screens, Historical Records Review, and Database Reviews.

In addition, prior to joining the environmental service industry, Ms. Brandl has conducted sampling and instrumental analysis of contaminated groundwater for industrial remediation projects and prepared written reports in formats prescribed by various regulatory agencies. In work performed in Florida and Kentucky, Ms. Brandl has managed activated sludge studies of industrial plant waste streams to determine biodegradation of byproducts affecting effluent quality. She has also conducted environmental sampling and GC/Mass Spectroscopy analysis of priority pollutants in the discharge of a 55.0 million gallon per day Wastewater Treatment Plant in Texas for National Pollution Discharge Elimination System (NPDES) permit compliance.

For a national pharmaceutical company in New Jersey, Ms. Brandl performed QA/QC analysis of raw materials and finished products for compliance to United States Pharmacopeia (USP) specifications. Her experience includes toxicology studies, analytical methods development, instrumental and wet chemical analyses, and water quality monitoring.

D. Howe Gates, Senior Technical Advisor – National Accounts

BS - Environmental Health, Oregon State University
AHERA Certified Asbestos Inspector

Mr. Gates has over 28 years of environmental management experience working as an environmental consultant, in industry, and as an environmental regulator. He specializes in environmental due diligence, regulatory compliance, and environmental risk management

Mr. Gates has expert knowledge of the All Appropriate Inquiry (AAI) and ASTM E1527-05 Phase I Environmental Site Assessment Process and has personally performed or managed many hundreds of individual environmental assessments and numerous large portfolio projects of commercial, industrial, healthcare, multi-family, and timberland properties. He has also managed numerous Phase II subsurface investigations of soil and groundwater to assess environmental risk conditions identified during initial Phase I assessment. He has also managed numerous asbestos, radon, and mold evaluations of commercial and industrial properties as part of the due diligence process.

Mr. Gates also has expertise in Environmental Risk Management and has assisted numerous clients reduce environmental risk associated with mergers and acquisitions, divestitures, lending, and commercial real estate foreclosure. Mr. Gates also has international experience, having conducted environmental and compliance assessments of manufacturing facilities in Mexico.

Project experience for Mr. Gates includes:

- National Due Diligence Practice – Primary contact with national financial and commercial real estate clients and designed and managed due diligence projects on a national basis. Scopes of work included Indoor Air Quality, mold evaluations, lead-based-paint, asbestos, and radon testing.

- Designed and managed Phase II Subsurface Investigations on a national basis based on findings of initial due diligence assessments. Scopes of work included soil and groundwater sampling, potable water testing, comprehensive asbestos surveys, and soil vapor surveys.

- Pre-acquisition and post closure environmental risk management assessments of manufacturing facilities; Scopes of work included comprehensive environmental site assessments and environmental compliance evaluations designed to assist private equity ownership develop facility specific environmental management strategies.

Holly Neber, REA – President

M.Ed. – Holy Names College
B.A. – Environmental Studies, University of Kansas

REA Registered Environmental Assessor REA 1 - 07393
EPA Accredited Asbestos Inspector
DHS Certified Lead-Based Paint Inspector
EPA Certified Radon Measurement Operator
OSHA 40-Hour Hazardous Waste Worker Training

Ms. Neber has worked in environmental consulting since 1996, serving with AEI since 1999. Ms. Neber's prior work history included positions as a Due Diligence Project Manager, Department Manager, and Vice President of Operations. As President, Ms. Neber is responsible for the day-to-day operations of AEI, as well as ensuring the consistency and quality of due diligence service delivery to clients on a national basis. Ms. Neber also provides senior author services to national clients.

Technical experience for Ms. Neber includes:

- Phase I Environmental Site Assessments – performance and review of thousands of ASTM E1527-00 and E1527-05 (All Appropriate Inquiry) Phase I investigations for sites ranging from multi-family properties to industrial facilities.

- Client/Agency Liaison and Interface to obtain case closure or No Further Action (NFA) status, or negotiate conditional closure scenarios for leaking underground storage tank (LUST) sites and other impacted facilities.

- Conducting client training and speaking engagements to inform and educate clients and others in the community regarding environmental due diligence

Ms. Neber's Phase I experience includes investigations of auto wrecking yards, plating facilities, foundries, gas stations, dry cleaners, manufacturing facilities, and metal working and machining operations, among others. Her project experience also includes management of portfolio projects involving numerous properties throughout the US. In addition, Ms. Neber participated in conducting comprehensive radon, asbestos and lead-based paint surveys of numerous housing facilities in California for the United States Coast Guard.

SCOPE OF WORK

EXHIBIT "A-1"

PHASE I ENVIRONMENTAL SITE ASSESSMENT AND REPORT SCOPE OF WORK

I. OVERVIEW & GENERAL PROVISIONS

A. INTRODUCTION. The Environmental Consultant's ("Consultant") general duties under the Basic Ordering Agreement for Phase I Environmental Site Assessment and Report or Agreement for Phase I Environmental Site Assessment and Report (the "Agreement") to which this Phase I Environmental Site Assessment And Report Scope of Work ("Scope of Work") is attached are to provide environmental hazard substance investigation and analysis to Client with respect to each Site listed on the Agreement or Task Orders subsequently issued by Client, and to provide the results and conclusions of the investigation to Client in a comprehensive, confidential report, as specified herein (the "Report"). Consultant shall perform the services in accordance with the Agreement, and the terms, conditions and obligations of the Agreement are to be read and interpreted in accordance with this Scope of Work.

B. PURPOSE OF ASSESSMENT. The purposes of this Phase I Environmental Site Assessment ("ESA") are: To identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E-1527-05, hereinafter defined) affecting the Site that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the Site or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the Site under any applicable environmental law; 4) may affect the value of the Site, and; 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing, 2) evaluate the Site's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the Site, and or; 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the Site.

C. DEFINITIONS. Unless specifically defined herein, all capitalized terms in this Scope of Work shall have the same meaning as defined in the Agreement and the American Society for Testing and Materials Standard E-1527-05, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (hereinafter "ASTM Standard E-1527-05"), and as amended. In the event of a conflict, the definition contained in the Agreement shall prevail.

1. The term "Hazardous Substance" shall mean any substance defined as a hazardous substance pursuant to CERCLA 42 USC § 9601(14), as interpreted by EPA regulations and the courts: "(A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture solution, or substance designated pursuant to section 9602 of this title, (C) any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (42 USC § 6921) (but not including any waste the regulation of which under the Solid Waste Disposal Act (42 USC § 6901 et seq.) has been suspended by Act of Congress), (D) any toxic pollutant listed under section 1317(a) of Title 33, (E) any hazardous air pollutant listed under section 112 of the Clean Air Act (42 USC § 7412), and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator (of EPA) has taken action pursuant to section 2606 of Title 15. The term does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a Hazardous Substance under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas)."

2. The term "Petroleum Products" means: Those substances included within the meaning of the petroleum exclusion to CERCLA, 42 USC § 9601(14), as interpreted by the courts and

EPA, that is petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a Hazardous Substance under Subparagraphs (A) through (F) of 42 USC § 9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). (The word "fraction" refers to certain distillates of crude oil, including gasoline, kerosene, diesel oil, jet fuels, and fuel oil, pursuant to Standard Definitions of Petroleum Statistics.)

3. The term "Recognized Environmental Condition" (REC) means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property.

4. The term "Historical Recognized Environmental Condition" (HREC) means an environmental condition which in the past would have been considered an REC, but which may or may not be considered a REC currently.

5. The term "data failure" means a failure to achieve the historical research objectives even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

6. The term "data gap" means a lack of or inability to obtain information required by the ASTM practice despite good faith efforts by the Consultant to gather such information. Data gaps may result from incompleteness in any of the activities required by the ASTM standard, including but not limited to site reconnaissance and interviews.

D. INFORMATION PACKAGE. The Consultant will be furnished with the following information:

1. An Agreement or Task Order which includes a Site Information Sheet which provides to Consultant: the Site's name; common address; legal description and lot, block and subdivision where applicable and known; the Client's Loan Number or Asset Number for the Site; Client's contact person and telephone number, and the Site's on-site contact name and telephone number, if any.

2. The Consultant may receive copies of prior environmental site assessments, environmental screening checklists of the Site, and environmental database reports, if any are in Client's possession. If none have been provided to Consultant, it may assume none are in Client's possession. Consultant shall be entitled to rely upon the foregoing items in the performance of the services, provided that such is consistent with information developed by the Consultant during performance of the services. In the event the provided information is refuted by or is substantially inconsistent with information developed by Consultant, Consultant shall rely upon that information which, in the professional judgment and opinion of Consultant, is most trustworthy and reliable under the circumstances.

E. SUPPORTING DOCUMENTATION. The findings, opinions and conclusions in the Phase I ESA Report shall be fully supported by documentation. If the Consultant has chosen to exclude certain documentation from the Report, the Consultant shall identify in the Report the reasons for doing so. All relevant supporting documentation shall be included in the appropriate section of the Report, or if such that a copy of such documentation could not be obtained, this documentation shall be adequately referenced along with providing a reason in the Report, to facilitate reconstruction of the assessment by an environmental professional other than the Consultant. Sources that revealed no findings shall also be documented. The Report shall also include references to identify published sources relied upon in preparing the Report. Each referenced source shall be adequately annotated to facilitate retrieval by another party.

F. SUPPLEMENTATION OF ESA REPORT. If the Consultant receives any information about the Site within ninety (90) days after its submission of the final Report, Consultant shall immediately

notify the Client of the substance of such information and its impact on the Site and shall mail or deliver to the Client all written information so received within five (5) business days from the Consultant's receipt of such information.

II. ENVIRONMENTAL SITE ASSESSMENT PROCEDURES AND METHODS.

This Scope of Work is intended to exceed, and therefore by implication, meet all minimum requirements set forth in ASTM Standard E-1527-05. Accordingly, this Scope of Work is comprised of four general substantive components: 1) Assimilation of General Site Information; 2) Records Review; 3) Site Reconnaissance, and; 4) Interviews. Pursuant to the designated assessment procedures set forth in Section II of this Scope of Work, all four components of ASTM Standard E-1527-05 will be discussed in detail in the Report in the exact format specified in Section III of this Scope of Work. **If any investigation requirement contained herein cannot be met, the Consultant must indicate such fact and state in Section 1.4 of the Report Format the reason the requirement was not met and the estimated date upon which the requirement can be met. If access issues are encountered, Consultant should contact Client or Client representative for assistance immediately. All data gaps shall be discussed in Section 1.4 of the Report Format.**

A. GENERAL SITE INFORMATION AND DESCRIPTION.

1. Identify Site by legal description (including lot, block and subdivision), street address, municipality, county, state and zip code;

2. Indicate type of property (office, retail, multifamily, warehouse, nursing home, congregate care, hotel/motel, industrial, undeveloped land, etc.), Site size (acres/square feet), number of building structures on Site, building size (square feet), number of units, number of stories in building, building age, and the number of subterranean floors present.

3. Identify year Site buildings were constructed and substantially remodeled or rehabilitated, if applicable, and discuss construction type.

4. Identify current use(s) of the Site.

5. Indicate names of owner(s), operator(s), manager(s), and all non-residential tenants/occupants pursuant to the guidelines set forth in Section II,C,1,m of this Scope of Work, and the nature of their business/operations, occupancy status; and

6. Prior Environmental Site Assessments. Summarize findings, conclusions and recommendations contained in any environmental site assessments, environmental checklists or other environmental studies provided to Consultant. If available, copies of this information shall be provided by Consultant.

B. RECORDS REVIEW. Review and interpret federal, state and local public records, as prescribed below, to assess the Site and areas surrounding the Site to identify RECs and HRECs.

1. General Public Records Review. The Consultant's review should include, but not be limited to, the following public records:

a) Physical Setting Sources.

(1) Topography. Report on regional, vicinity, and Site topography including significant physiographic features, such as ridges, streams and valleys within one (1) mile of the Site. Include in the Appendix to the Report a color United States Geologic Survey ("USGS") topographic map (7.5 minute, 1:24,000 scale) with the Site's boundaries delineated on the map. Report on the range of Site elevations, overall Site topography or slope.

(2) Soils. Identify soil types and general characteristics, such as drainage, permeability.

(3) Geology. Examine geologic data to determine the physiographic province within which the Site is located as it pertains to the regional geologic setting. Determine the type and approximate thickness of unconsolidated materials (materials beneath soils and above bedrock). Identify the characteristics (e.g., rock types, impermeable layers, bedrock characteristics) of local geologic formations. Identify depth to bedrock.

(4) Hydrology. Examine hydrologic data to determine approximate depth to shallow groundwater and direction of flow.

b) Historical Use Information.

Identify all prior uses of the Site since 1940 or first developed use, whichever is earlier at approximately five-year (5-year) intervals, including the nature of businesses or operations that were on the Site. A reasonable attempt should be made to identify uses of the Site prior to 1940, back until a time when the Site was not yet developed, intervals to be determined by the Consultant, based upon available record sources. At a minimum, the following record sources shall be obtained and reviewed to determine historic use of Site.

(a) Recorded Land Title Records. Consultant shall review publicly recorded records of fee ownership, land contracts, liens, activity and use limitations and other encumbrances currently affecting or filed of record against the Site, particularly noting any recorded document evidencing RECs.

(b) Chain of Record Title. **ONLY AT THE REQUEST OF THE CLIENT,** Consultant shall obtain and review a minimum fifty-year (50-year) chain of record title search for the Site, noting any past or present owners/grantees indicating a potential RECs affecting the Site only in one or both of the two following circumstances: 1) Consultant is expressly directed to obtain such chain of record title by Client in the Agreement, Task Order or Exhibit A-1 of this Scope of Work (if applicable), or; 2) Consultant recommends such chain of record title be obtained because, in their best professional judgment, other sources of historical information hereunder do not provide adequate data or representation of the historical uses of the Site, or state law requires such record chain of title be obtained to qualify for any innocent purchaser or secured lender exemptions from state environmental law liability. In either of these two circumstances, Consultant shall immediately notify Client of Consultant's opinion and recommendation that Client obtain such chain of record title. Despite Consultant's obligation hereunder to make such recommendation, Consultant shall not obtain such chain of record title until expressly authorized to do so by Client.

(c) Aerial Photographs. Consultant shall obtain and review aerial photographs of the Site, and surrounding and adjacent areas. The Consultant should obtain the oldest useful photographs, dating back to 1940 or earlier if possible, or to the time in which the Site was originally developed. In the Report, provide at least three original-quality aerial photographs with a minimum 10 to 15-year interval between photographs, if possible. At a minimum, the frequency of aerials shall represent periods with evidence of Site activity or Site development. All aerial photographs shall have the Site boundaries clearly outlined, and be labeled with a north arrow, scale, and date of the photograph.

(d) Fire Insurance Maps. Consultant shall obtain and review Fire Insurance Maps for potential RECs affecting the Site, and to help assess present and historical uses on the Site and at adjacent/nearby properties. Include in the Appendix to the Report copies of such maps obtained and reviewed. Site boundaries shall be clearly defined. Each map shall be labeled with the date and a north arrow.

(e) City Directories. Consultant shall obtain and review historical city directories for potential RECs affecting the Site, and to help assess present and historical uses on the Site and adjacent/nearby properties. Consultant shall research the Site use of any listings that could be a potential environmental concern (i.e., dry cleaners, manufacturing, repair and maintenance shops, gas stations, etc). Include in the Appendix to the Report copies of relevant pages of such city directories

obtained and reviewed. The Site shall be identified and all pages should be dated. If copies of the documents are not permitted, notes taken during the directory review shall be included in the Appendix to the Report along with an explanation as to why copies were not obtained.

(f) Maps and Other Data. Consultant shall obtain and review other documents and maps such as Property Tax Files, Field Cards, Assessor's Maps, Building Department Records, Zoning/Land Use Records, Local Historical Records, Fire Marshal Records, Business License Records, and other maps to help assess past and present historical uses on the Site and adjacent/nearby properties. Include in the Appendix to the Report, any map or document, which indicates a potential for RECs that may adversely impact the Site (for example, those involving the manufacture, generation, use, storage and/or disposal of Hazardous Substances or Petroleum Products). The area surrounding the Site that will be researched will be at a search distance and time period determined by the Consultant in its professional judgment. At a minimum, Consultant shall include a review of all adjacent and/or contiguous properties and attempt to determine current and past uses, tenants, and occupants for such properties. Factors to consider in making a determination of search distance and time period for previous uses of the properties in the surrounding area include: the extent to which information is reasonably ascertainable; the extent to which information is useful, accurate and complete in light of the review of the government agency records; hydrogeologic/geologic conditions of the Site that may indicate a high probability of Hazardous Substance or Petroleum Product migration to the Site; how recently local development has taken place; information obtained from interviews; and the extent to which history and/or uses of properties in the area surrounding the Site are generally researched, pursuant to local standards for good commercial or customary practice in environmental site assessments in real estate transactions.

If any observation or information indicates a reasonable possibility that Hazardous Substances or Petroleum Products that are located upon adjacent or nearby properties within one-quarter (1/4) mile radius of the Site may migrate to the Site, topographic observations shall be analyzed in connection with geologic, and hydrogeologic information obtained pursuant to Records Reviewed and Interviews to determine whether Hazardous Substances or Petroleum Products are likely to migrate to or from the Site through groundwater or soil. Additionally, Consultant shall provide the common street address for each off-site property so discussed in the Report. All assumptions used in Consultant's analysis should be presented in the Report.

2. Environmental Records Review.

a) Environmental Database Search. The Consultant will obtain and review a commercially-available mapped, environmental government database report ("Database Report") for the Site from a nationally recognized vendor, which shall include, at a minimum, a search of the following databases at the prescribed search distances (the current ASTM E 1527 standard shall take precedence in the event the below search distances differ from such current ASTM E 1527 standard) and the results of such search depicted on the map:

Database Searched	Search Distance
Federal NPL Site List	1.0 mile/1.6 kilometer
Federal Delisted NPL Site List	0.5 mile/0.8 kilometer
Federal CERCLIS List	0.5 mile/0.8 kilometer
Federal CERCLIS NFRAP List	0.5 mile/0.8 kilometer
Federal RCRA CORRACTS TSD Facilities List	1.0 mile/1.6 kilometer
Federal RCRA Non-CORRACTS TSD Facilities List	0.5 mile/0.8 kilometer
Federal RCRA Generators List	Site and Adjoining properties
Federal Institutional Control/Engineering Control Registries	Site
Federal ERNS List	Site
State and Tribal Lists of Hazardous Waste Sites Identified for Investigation or Remediation:	
State and Tribal NPL-equivalent	1.0 mile/1.6 kilometer

State and Tribal Equivalent CERCLIS-equivalent	0.5 mile/0.8 kilometer
State and Tribal Landfill and/or Solid Waste Disposal Site Lists	0.5 mile/0.8 kilometer
State and Tribal Leaking UST Lists	0.5 mile/0.8 kilometer
State and Tribal Registered UST Lists	Site and Adjoining properties
State and Tribal Institutional Control/Engineering Contro Registries	Site
State and Tribal Voluntary Cleanup Sites	0.5 mile/0.8 kilometer
State and Tribal Brownfield Sites	0.5 mile/0.8 kilometer
Other Local, State or Federal databases as recommended	As recommended by Consultant

Consultant shall determine if any of the unmappable/non-geocoded/"orphan" sites listed in the Database Report are located within the prescribed search radii, and Consultant shall ensure that all such sites listed in the Database Report are mapped or otherwise discussed in the analysis of the Database Report. The results of the Database Search on areas surrounding the Site shall be additionally discussed in the section of the Report detailing Surrounding Properties.

b) Environmental Regulatory Agency Records Review. Obtain and review information from applicable governmental agencies in a timely manner regarding environmental violations, spills, releases, or incidents and/or status of enforcement actions at the Site and at nearby properties within one-quarter (1/4) mile radius of the Site. This regulatory records review shall be performed for all on-site environmental violations, spills, releases, and incidents, and all off-site active environmental violations, spills, releases, and incidents. This regulatory records review shall also be performed for any on-site or off-site environmental violations, spills, releases, and incidents, which Consultant identifies as RECs. Information to be obtained through these inquiries should, at a minimum, include information sufficient to enable Consultant to express an opinion, with justification, as to the likelihood or probability that identified RECs originating upon or under nearby properties may impact the Site.

C. SITE RECONNAISSANCE.

1. General Site Characteristics. Consultant shall perform Site Reconnaissance of the interior and exterior of the Site and a visual inspection of the exterior of adjacent properties and areas (Consultant shall attempt to avoid inspecting the Site on an inclement weather day), specifically, noting the following conditions:

a) General Site Information. Observe and determine and/or confirm information specified in Section II.A of this Scope of Work.

b) Observe for additional indications of current and past uses of the Site.

c) Observe for additional indications of current and past uses of adjoining Properties and surrounding areas.

d) Topographic Conditions. Observe topographic conditions and features of Site and areas surrounding the Site.

e) Potable Water Supply. Determine the source of potable water for the Site. If the source is other than a public water supply system, indicate whether a public supply system is available for the Site's use.

f) Sewage Discharge & Disposal. Identify current and historical methods of sewage discharge or disposal (sanitary sewer, septic system, cesspool, etc.). If other than a municipal system, identify the system age and whether such system appears to be in compliance with applicable state or local laws and regulations. Additionally, indicate whether a municipal system is available to the

subject Site, and if there are any local or state regulatory issues affecting the same. Consultant should note whether floor drains and/or septic systems are present in connection with hazardous material usage and storage and opine on the potential for hazardous materials to have entered them and for any subsequent migration into the environment.

g) Wastewater Discharge. Identify any wastewater generated at the Site and discuss the disposal and treatment of such wastewater. Identify whether the discharge is in substantive compliance with applicable regulatory requirement. Consultant should note whether wastewater discharges are present in connection with hazardous material usage and storage and opine on the potential for hazardous materials to have migrated into the environment.

h) Solid Waste Disposal. Describe method of solid waste disposal.

i) Surface Water Drainage. Describe any observed evidence of discharge of surface or wastewater into any drain, ditch, and stream on or adjacent to the Site.

j) Drains. Note all drains located in the interior or exterior of the Site and determine point of discharge if possible. Note if any staining or discoloration of the drains is observed and if any odors are associated with the drains.

k) Method of Heating/Cooling. Identify the current and historical methods of heating and cooling the buildings located upon the Site, including the fuel source (fuel oil, natural gas, electric, etc.).

l) Wells and Cisterns. Describe any wells or cisterns located or observed upon the Site, including groundwater monitoring wells, supply wells, dry wells, etc., and indicate the status of any such structures (active, inactive, abandoned, etc.). Also, determine depth, construction, regulatory requirements and compliance for all wells (including any abandonment requirements for inactive and/or abandoned wells).

m) Current Occupants. Identify all current non-residential occupants of Site. Except for Multifamily residential properties, if the Site has five or fewer occupants, a reasonable attempt shall be made to inspect all Occupant spaces and conduct interviews with all Occupants. If there are five or more current Occupants, a reasonable attempt shall be made to inspect the space of and interview the Major Occupants and all those other Occupants whose operations indicate or are likely to pose RECs in connection with the Site. The Report shall identify the Occupants interviewed and the duration of their Occupancy. For Multifamily residential properties, a representative number of individual units (approximately 10% of all units unless in the professional judgment of Consultant inspection of less than 10% of the individual units will provide an adequate representation), plus all common areas, shall be inspected.

At a minimum, the Consultant must visually inspect the exterior and interior of the Site in accordance with the methods and procedures prescribed in the Standard. Consultant must request access to inspect any facility involving manufacturing, vehicle maintenance, dry cleaning or any other type of industrial, maintenance or agricultural operations which involve or may involve the use of hazardous materials and/or the generation of hazardous waste. Refusal by Site representatives to grant such access, and the reason for refusal, should be documented in the Report. When such commercial operations are noted at a property, the Consultant should tabulate the names of the tenants, give a brief description of their operations, make note of the hazardous materials observed and provide an estimate of the waste stream and quantity.

n) Additional General Site Observations. Note any additional relevant general Site characteristics observed which are not included in the above.

o) Site Drawing. Prepare a Site drawing at not less than 1:600 scale depicting the Site, the improvements on the Site, locations of all environmentally sensitive areas observed during Site Reconnaissance or otherwise identified during the performance of this ESA (such as LUSTs, USTs, wells, drains, discarded debris or drums, etc.) and all areas of known or potential RECs. The drawing need not be drawn to scale or based upon a survey, but must be sufficiently accurate to inform Client of the general locations of the listed areas or items. Include on the site drawing (or an additional site area drawing) all adjacent properties, and all nearby properties anticipated to contain RECs potentially impacting the Site. This drawing shall be professional quality (hand-drawings are not acceptable), preferably drawn via CADD system.

p) Color Photographs. As part of the reconnaissance of the Site and surrounding areas, take at least one (1), twenty-four (24) exposure roll of color photographs of all relevant aspects of the Site, including but not limited to photographs of the improvements, interiors and exteriors of the improvements, all environmental hazards, and potential environmental hazards noted on the Site, adjacent properties and surrounding areas. Provide as many relevant photographs as possible in the Report. For each photograph, provide a brief written summary of subject (including the facing of the outdoor photographs) and relevance of photograph.

2. Investigation for Specific Environmental Hazards. At a minimum, the Consultant must visually inspect the exterior and interior of the Site in accordance with the methods and procedures prescribed in the Standard. Consultant must request access to inspect any facility involving manufacturing, vehicle maintenance, dry cleaning or any other type of industrial, maintenance or agricultural operations which involve or may involve the use of hazardous materials and/or the generation of hazardous waste. Refusal by Site representatives to grant such access, and the reason for refusal, should be documented in the Report. When such commercial operations are noted at a property, the Consultant should tabulate the names of the tenants, give a brief description of their operations, make note of the hazardous materials observed and provide an estimate of the waste stream and quantity.

When inspecting such facilities, the Consultant should pay specific attention to areas utilized for chemical and waste storage (both indoors and outdoors), process areas, areas where chemicals are applied and areas around aboveground storage tanks (ASTs) and underground storage tanks (USTs) to assess the quality of overall housekeeping practices, general adherence with applicable regulations and to determine if obvious spills and releases of hazardous materials have occurred.

Consultant should also note whether floor drains and/or septic systems are present, the potential for hazardous materials to have entered them and for any subsequent migration into the environment. The Consultant is expected to photograph any areas of potential environmental concern and should also attempt to cross-reference such tenants to see if they are identified in any of the regulatory database listings. Consultant should also request to view hazardous waste manifests and any other applicable environmental-related permits and registrations if the Consultant suspects they are required for proper/compliant operation.

Storage Tanks – When ASTs or USTs are encountered at a Site, the Consultant must attempt to assess the age, condition, contents, size and regulatory compliance status of any such tanks. Such assessment should also include a review of any registration documents; permits; tank test results; soil/groundwater assessments; tank closure reports; Spill Prevention, Control and Countermeasure (SPCC) Plan if applicable; or any other relevant documents available. Consultant is authorized by Client to make a request to view such documents if they are not readily posted and available at the Site. Consultant is also expected to opine on any suspected or known historical USTs.

Dry Cleaners – When dry cleaners are encountered, the Consultant shall determine if the tenant conducts dry cleaning onsite or if the facility is a drop-off / pick-up center. For active, onsite dry cleaning facilities, Consultant shall determine and clarify the following: (i) name of the current dry cleaning tenant and owner, (ii) duration of all onsite dry cleaning operations, (iii) type of solvent used [PCE, other solvent, “Green” non-haz cleaning agent, etc], (iv) if currently “Green”, Consultant

shall determine if this replaced an older solvent-based system, (v) if the machinery is an open- or closed-loop system, (vi) age of the current machine, (vii) if current system is closed-loop, Consultant shall confirm if the system replaced a former open-loop system and the date the newer machine was installed, (viii) the servicer and frequency of the system service/maintenance, (ix), the existence or absence of secondary containment beneath the dry cleaning machine and waste drums areas, (x), the existence or absence of the floor being coated with a chemical-resistant epoxy sealant, (xi) if sealed, clarify the date when was the floor sealed, (xii) if sealed, confirm if the floor is sealed under the dry cleaning machine and waste drums areas, (xiii) if there are any drains in the tenant space and clarify if they drain into the public sewer or into an onsite septic leaching field, (xiv) clarify if the floor has any stains or cracks, (xv) comment on the overall housekeeping, (xvi) describe hazardous material and waste storage practices, (xvii) clarify the vendor(s) who drops off new solvent and picks up the spent solvent drums and waste, (xviii) confirm if there are any hazardous waste manifests kept onsite and comment if they are in good order with no gaps in the record.

a) Hazardous Substances and Petroleum Products Used In the Ordinary Course of Occupants' Business. Visually examine all interior and exterior areas of the Site and review appropriate on-site records for any Hazardous Substances or Petroleum Products currently or previously located on or at the Site. Provide determination as to whether storage of any hazardous substance or Petroleum Products is substantially within federal, State or local regulations. Specifically discuss:

(1) Any containers or drums observed on the Site labeled as containing Hazardous Substances or Petroleum products and identify the locations and approximate quantities involved, types of containers, condition of containers, any containment devices, storage conditions, and evidence of leakage.

(2) Any containers or drums observed on the Site that are not labeled but suspected as containing or having once contained Hazardous Substances or Petroleum Products. For any suspected Hazardous Substances or Petroleum Products observed, identify the locations and approximate quantities involved, types of containers, condition of containers, any containment devices, storage conditions, and evidence of leakage.

(3) Disposal locations of waste Hazardous Substances and waste Petroleum Products. Include brief comments on whether such disposal and treatment methods seem appropriate and appear to meet applicable standards. Consultant shall request to review permits, manifests, contracts and/or methods used to dispose of Hazardous Substances, solid wastes, residual or waste materials and sanitary and process waste waters.

b) Hazardous Substances and Petroleum Products: Evidence of Releases. Observe all areas of the Site for visual evidence of releases, spills, dumping, significant air emissions or other illegal or improper disposition of Hazardous Substances or Petroleum Products, including but not limited to evidence of stained or corroded floors or paved surfaces, sumps or drains in storage areas, stained soil, stained or stressed vegetation, etc. Also observe all operations and/or equipment, which generate or controls air emissions. Discuss all such areas in the Report and include reference to such areas in the Site Drawing.

c) Polychlorinated Biphenyls. Identify electrical or hydraulic equipment known or suspected to contain Polychlorinated Biphenyls ("PCBs") based on observation and review of facility records of the Site. For electrical equipment located upon the Site, determine the ownership and the year of manufacture (or age) of the equipment; identify any evidence of past or current leakage, and whether the equipment is marked as “Non-PCB Containing”. If the equipment is utility-owned and there is evidence of past or current leakage, Consultant shall contact the utility to determine PCB content of the equipment unless the equipment has been verified to have been manufactured in or after 1980 or is clearly marked “Non-PCB Containing”. If the equipment is not utility-owned and such equipment either cannot be verified to have been manufactured in or after 1980 or the transformer is not clearly marked “Non-

PCB Containing", attempt to determine whether or not the transformer contains PCBs. If the equipment is not utility-owned and is not clearly marked "Non-PCB Containing", and evidence of past or current leakage is present, recommend appropriate actions, including testing for PCB content. For other equipment observed which is likely to contain PCBs, attempt to identify the type of equipment, age or manufacture date, condition and any evidence of past or current leakage. Fluorescent light ballasts likely to contain PCBs do not need to be identified or discussed.

d) Asbestos Containing Materials. For all building types constructed prior to 1981, the Consultant will perform a limited asbestos-containing material ("ACM") inspection ("ACM Inspection") to identify the location, quantities, and condition of all obvious and accessible suspect ACM ("SACM") and presumed ACM ("PACM"), and estimate repair, replacement and maintenance costs of all such ACMs, SACMs, and PACMs. A representative number of individual units (approximately 10% of all units or areas unless in the professional judgment of Consultant, inspection of less than 10% of the individual units or areas will provide an adequate representation), plus a representative number of common areas (hereinafter collectively the "Representative Areas"), shall be inspected and sampled according to the protocol specified below.

The Consultant should visually estimate the quantity of all (friable & non-friable) observed suspect materials and assess its condition and its potential for disturbance. The Consultant should determine if an Asbestos Operations & Maintenance (O&M) Plan for the continued in-place management of ACMs, SACMs, and PACMs has already been implemented at the Site and whether the O&M Plan appears to adequately address all observed ACMs, SACMs, and PACMs. In addition, Consultant should also inquire with Site Management regarding the existence of any previous asbestos surveys and if abatement projects have been undertaken at the Site. Any such information provided should be incorporated into the ESA Report.

Depending on whether or not sufficient information on past abatement projects is provided, Consultant should opine on how much ACM has already been removed from the building and how much may still be present.

The ACM Inspection shall be performed by or under the direct supervision of an AHERA or state-equivalent certified inspector.

(1) The ACM Inspection should include the following: (a) a general review of building construction drawings/specifications and/or renovation plans and specifications, if readily available, to assist in identification and documentation of ACMs; (b) an inspection of all reasonably accessible and observable representative building areas; (c) documentation of the location of all friable and non-friable ACMs, SACMs, and PACMs; (d) assessment of their conditions; and (e) collection of bulk samples of observed **DAMAGED** materials (non-friable and friable), using appropriate sampling protocols and submittal to a qualified analytical laboratory for asbestos content analysis by U.S. EPA PLM methodology. No more than a total of twenty (20) individual samples may be obtained for analysis without the prior written authorization of Client. However, if in the professional judgment of the Consultant additional samples are recommended, Consultant shall immediately attempt to obtain Client's consent to collect and analyze such additional samples while still on Site, or Consultant may collect additional samples and request Client's consent to analyze such additional samples prior to laboratory analysis.

(2) The Consultant shall prepare and present a written compilation of data in tabular form (substantially similar to the ACM sample table presented in Sample Table I of this SOW) in the text section of the Report which provides the following information: 1) exact locations of all ACMs, SACMs, and PACMs observed and/or sampled; 2) type of observed materials (ceiling tile, floor tile, pipe wrap, etc.) observed and/or sampled; 3) friability ("friable" or "non-friable") of the materials observed and/or sampled; 4) condition of the materials observed and/or sampled as defined by AHERA guidelines (i.e. "good," "damaged," or "significantly damaged"); 5) the potential for disturbance of the materials observed and/or sampled; 6) recommendations to be considered with respect to all ACMs, SACMs, and PACMs, and; 7) cost estimates for each recommendation requiring action.

The ranges of recommendations to be considered by the Consultant for ACMs, SACMs, and PACMs shall at a minimum include the implementation of an Asbestos O&M) Plan for maintenance in place and/or the removal, repair, encapsulation, or enclosure and shall be consistent with the OSHA "Occupational Exposure to Asbestos" Final Rule, 29 CFR Parts 1910 and 1926, et al. All recommendations shall include the Consultant's cost estimate for such recommendation. The Consultant shall recommend the least costly response action that protects the health and safety of the building occupants for each homogeneous area consistent with the hazard assessment criteria in AHERA and in accordance with the OSHA Final Rule referenced above.

e) Radon. For all residential or multifamily residential Properties located in areas of EPA-determined high concentration of radon gas (sites located in areas identified by the US EPA as Radon Zone 1) or within a state or local jurisdiction requiring radon testing, Consultant shall perform a radon gas test which meets EPA or applicable state requirements. Consultants shall perform one (1) radon gas test for each building up to a total of three (3) tests if more than three (3) buildings are located upon the Site, Consultant shall select three (3) representative buildings within which to perform the radon testing. The test(s) shall be performed in the habitable area(s) (within a residential housing unit) most susceptible to radon gas accumulation (generally the lowest habitable area of the building). If radon is detected in concentrations greater than that allowed by federal, state or local statutes or regulations or the EPA recommended action levels, the Consultant shall so state in the Report and provide recommendations, with cost estimates for remedial actions.

f) Lead-Based Paint. For all residential or multifamily residential properties, schools, churches or day care facilities constructed prior to 1980, Consultant shall assess the potential for the potential presence of suspected Lead-Based Paint (LBP). Any multifamily property built prior to 1980, MUST include an inquiry to the appropriate local agency (i.e., Health Department and/or Childhood Lead Poisoning Prevention Program) to determine if the Site is in compliance with applicable Lead Law requirements and whether there have been or are any current LBP violations, actions or complaints on file against the Site Owner/Management.

The Consultant should determine if a LBP O&M Plan (if permitted by applicable Lead Law requirements) for the continued in-place management of painted surfaces has already been implemented at the Site. In addition, Consultant should also inquire with Site Management regarding the existence of any previous LBP surveys and if abatement projects have been undertaken at the Site. Any such information provided should be incorporated into the ESA Report.

A representative number of individual units (approximately 10% of all units or areas unless in the professional judgment of Consultant, inspection of less than 10% of the individual units or areas will provide an adequate representation), plus a representative number of common areas (hereinafter collectively the "Representative Areas"), shall be inspected and sampled according to the protocol specified below.

(1) LBP Inspection & Testing Methodology. The LBP Inspection should include the following: (a) an inspection of all reasonably accessible painted surfaces; (b) assessment of their conditions; and (c) collection of bulk samples of observed **DAMAGED** painted surfaces using appropriate **paint chip** sampling protocols and submittal to a qualified analytical laboratory for lead content analysis by U.S. EPA methodology. No more than a total of ten (10) individual samples may be obtained for analysis without the prior written authorization of Client. However, if in the professional judgment of the Consultant additional samples are recommended, Consultant shall immediately attempt to obtain Client's consent to collect and analyze such additional samples while still on Site, or Consultant may collect additional samples and request Client's consent to analyze such additional samples prior to laboratory analysis.

(2) Building Components to be Sampled. In those units and common areas selected for testing, a representative portion of the painted or lacquered surfaces of building components likely to contain LBP shall be tested, with emphasis on those surfaces subject to friction (e.g., window sills and door jams) and surfaces that are reasonably accessible to children under the age of seven (7). Representative building component surfaces in individual living units include, but are not necessarily limited to, woodwork/molding, doors, door jams and trim, window sills and sashes, cabinets, walls, ceilings, counter tops, stair railings, floors, radiators, balcony railings, and baseboards. Representative building component surfaces in common areas include, but are not necessarily limited to, stair treads, stair risers, entry doors, entry door casings, window ledges, newel posts, garage doors and porch trims.

(3) Results, Conclusions, and Recommendations. Accurate records and notes shall be kept by the testing personnel of the number of units, unit numbers, sample ID, sample location, type of substrate, condition of paint, accessibility to children, and quantity for all tests performed. Results shall be provided in tabular format (substantially similar to Sample Table II presented of this SOW) in the text section of the Report that includes the information specified above. Based upon the test kit and other relevant information, the Consultant shall indicate whether the Site is in compliance with applicable State or local laws, regulations, and ordinances regarding LBP inspection, abatement, and notification requirements. If local ordinances apply, the Consultant shall include a copy of the relevant provisions of such ordinances in the Report. Consultant shall provide cost estimates for any further actions recommended.

Additionally, the LBP survey results shall contain Consultant's recommended corrective actions (removal and replacement, encapsulation, enclosure, manage in place, etc.) for each unit or common area in which LBP was identified above applicable regulatory levels and cost estimates for Consultant's recommended corrective action. Estimated LBP corrective action costs shall be calculated based upon requirements specified in the state or local regulations for the jurisdiction in which the Site is located, if applicable. The average value of the cost estimates calculated for the units that were tested shall be used as a representative corrective estimate for units that were not selected for testing. The average estimated cost per unit shall be assigned to the untested units to calculate an estimated corrective cost for the entire structure. All field inspection sheets, custody forms, and laboratory reports must be included in the Report.

Prior to any recommendation for a LBP O&M Plan, Consultant must first confirm with the local Health Department, Childhood Lead Poisoning Prevention Program, and/or applicable Lead Law requirements if the local statutes and regulations permit the implementation of a LBP O&M Plan as a method of protecting the health and safety of onsite occupants, children, and maintenance workers.

g) Lead in Drinking Water. Consultant shall determine the potable water source for the Site. If the potable water source is a public utility, Consultant shall contact the utility to confirm that such utility is in compliance with current EPA requirements for lead concentrations in drinking water.

For all residential or multifamily residential properties, schools, churches or day care facilities not served by a municipal water system, Consultant shall contact the applicable regulatory agency which oversees the use of private water-supply wells to confirm that the private drinking water well is in compliance with current EPA requirements for lead concentrations in drinking water. Consultant shall determine both permitting and water-quality compliance.

For private drinking water supply wells with no record of prior water-quality data, Consultant shall collect one static (unpurged) and one dynamic (purged at least 3 minutes prior to sampling) drinking water sample from the Site for analysis (in accordance with the most recent, accepted analytical method) to determine the lead content of the Site's potable drinking water. Consultant shall indicate whether such lead content exceeds EPA or other applicable state or local standards for drinking water. Prior to

collecting water samples, Consultant shall ensure that an appropriate number of water taps be flushed and sealed to ensure the static water samples are collected from taps idle for at least 6 hours but no more than 48 hours.

h) Landfills. Identify whether the Site is located on or within a one-half mile (0.5 mi)/0.8 kilometer (0.8 km) radius of a known licensed or unlicensed landfill, or a federal or state-permitted hazardous waste/disposal site. Indicate whether it is an open or closed landfill. Observe for any indications of on-site land filling.

i) Pits, Sumps, Surface Impoundments, Catchbasins and Pools of Liquid. Identify the location, condition and contents of all pits, sumps, surface impoundments, catchbasins and pools of liquid observed on the Site. Note the current disposition of each in the Report and indicate their locations on the Site Map.

j) On-Site Aboveground and Underground Storage Tanks. Consultant shall identify all confirmed and possible, current and past ASTs and USTs located on or under the Site and shall take note of any vent pipes, fill pipes, concrete pads, saw cuts in paved areas, or other customary apparatus or indications of storage tanks.

For each existing tank system, Consultant shall attempt to determine or identify year installed, size or capacity, material of construction (tanks and associated piping), age of material stored, corrosion protection method (tank and piping), leak detection method, presence or absence of overfill protection, containment facilities, and any evidence of more than deminimus leakage, spillage or staining. State whether the tank is empty or contains product. If not empty, identify the type of product and estimate quantity so contained. Consultant shall indicate whether registration/permitting of the tank is required by federal, state or local requirements and when the tank has been registered with the appropriate regulatory agency. Consultant shall identify whether the tanks meet current regulatory requirements and whether the tanks meet the December 1998 UST standards. Consultant shall review any registration documents, permits, tank test results, inventory reports, soil/groundwater assessments, tank closure reports, SPCC **Plan** if applicable, and any other relevant documents available. Consultant is authorized by Client to make a request to view such documents if they are not readily posted and available at the Site.

If tanks have been removed or abandoned in place, also include available information describing the removal or abandonment procedure, and soil analytical data, as well as date of removal or abandonment. If possible, determine through interviews or reviews of regulatory records, the date when any removed or abandoned tanks were last operated, the name of the last owner and operator, and when they were removed or otherwise abandoned or made inoperable. Consultant is also expected to opine on any suspected or known historical USTs.

The Report shall include locations of existing and former USTs and ASTs in the Site Drawing. A table (substantially similar to the sample table presented in Section IV of this SOW) shall be provided in the text section of the Report summarizing current and former on-site tanks.

k) Radiological Hazards. Consultant shall identify the use, storage, generation or disposal of any radiological substance or equipment not considered a Hazardous Substance. Indicate whether such use, storage, generation or disposal of the radiological substance appears to be within applicable federal or state statute and/or regulation.

l) Mold. For all building types, the Consultant will perform a limited inspection ("Mold Inspection") of interior building components to identify any visual and/or olfactory indications of mold growth or water damage only if Consultant is expressly directed to perform this survey by Client in the Agreement, Task Order or Exhibit A-1 of this Scope of Work (if applicable).

For residential properties, the inspection should minimally include ten percent (10%) of all units plus, minimally, ten percent (10%) of all common areas (hereinafter collectively the "Representative Areas").

For all other property types, the inspection shall minimally include ten percent (10%) of all areas (hereinafter collectively the "Representative Areas").

The Mold Inspection shall include the following:

(1) Visual and olfactory assessment for mold colonization and water-damaged areas [for multi-family properties, the following building components/areas in the representative number of units/common areas shall be inspected, at minimum: interior walls and ceilings (bathrooms, kitchens, and bedrooms); in-unit and common mechanical closets; areas under kitchen and bathroom sinks; flat roofs (for evidence of water ponding); and operative status of ventilation equipment (kitchen and bathroom fans). For all other property types, the following building components/areas in the representative areas shall be inspected, at minimum: interior walls and ceilings; mechanical rooms; and flat roofs (for evidence of water ponding)].

(2) Perform interviews with site personnel for information related to: water damage/intrusion, mold growth, and tenant complaints; maintenance responsibility and (outsourced or in-house staff) history of HVAC equipment, and whether any operational problems related to moisture accumulation have been identified.

(3) Document the location of all suspect mold growth or conditions conducive to mold growth.

(4) Photograph all affected areas observed.

(5) The Consultant shall prepare and present a written compilation of data, in tabular form, in the text section of the Report which provides the following information: 1) exact locations of all suspect mold growth; 2) type of building material impacted; 3) visual moisture assessment (dry, damp, moist, wet); 4) dimensions of area(s) impacted; 5) recommendations to be considered; and; 6) cost estimates for each recommendation requiring action.

m) Additional Hazard Observations. Note additional relevant observations indicating a REC not discussed above.

D. INTERVIEWS. Consultant shall conduct appropriate interviews with persons familiar with the Site, surrounding properties and the general areas.

1. Site. Interview individuals associated and/or familiar with the Site to determine the present and historical land use activities at the Site. Such individuals shall include, but are not limited to, present and former Site owners operators and occupants, employees, key onsite managers, and occupants. Identify possible Hazardous Substances used or released, waste streams and prior use and ownership of the Site and facilities. Maintain names, addresses and telephone numbers of all persons interviewed and include notes of such conversations in the Appendix to the Report.

2. Surrounding Area.

a) Interview persons at the immediate Site to determine the historical land use activities in the area surrounding the Site and to identify operations previously and currently conducted on properties in the vicinity of the Site.

b) Interview adjoining or hydrologically upgradient property owners (or other persons, such as occupants or key property managers having knowledge of the Site in question) within the surrounding area that may affect the Site (up to one mile) to obtain information about historic land use activities and conditions and to determine whether any RECs are known to have affected the Site in the past. The Consultant shall include the names, telephone numbers, and interview summary (including questions asked and interviewee's response) of the key persons interviewed.

3. Regulatory Agency Officials. Conduct inquiries by telephone, in writing or through visits with applicable municipal, county and state environmental regulatory agencies for information on existing and suspected RECs that were not available from the environmental database search and regulatory file review.

4. ADDITIONAL SERVICES: Consultant shall perform such additional services as defined on Exhibit "A-1 ", if any, attached to this Scope of Work or Task Order.

III. REPORT FORMAT. The Report shall discuss each component enumerated in Section II, "Environmental Site Assessment Procedures and Methods" of this Scope of Work in **EXACTLY THE FORMAT STATED BELOW**. For each component enumerated in Section II and summarized below, if the item is inapplicable or response information does not exist, the Report shall nevertheless enumerate that item and so state its inapplicability.

NOTE: The section content descriptions provided in this following report format are intended to be general descriptions only of the components required in Section II of the Scope of Work and not an exhaustive list of all required subcomponents. Consultant must ensure that all components required in Section II of the Scope of Work are discussed in the Report.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Performed on:

[Email Address of Primary Contact]

[Report Date]

1.0 INTRODUCTION.

1.1 Executive Summary.
[Describe the key findings and conclusions of the Report, significant potential liabilities emanating from environmental hazards or special resources identified, recommendations, and cost estimates].

1.2 Purpose.
[State the purpose of the investigation substantially in the same manner as provided in Section I,B of this Scope of Work].

1.3 Scope of Work.
[Include a brief discussion of the assumptions used in conducting the ESA in determining its scope, including any limitations or qualifications on the findings, conclusions or recommendations of the Report. Identify whether this report meets the current ASTM E 1527-05 standard.]

1.4 Investigation Requirements Not Satisfied
[Discuss any investigation requirement that was not satisfied or information on any resource that was not available and the reasons why the requirement was not satisfied or the information on any resource that was not available. Discuss all identified data gaps. For all outstanding/pending information requests, also provide a professional opinion as to the likelihood that the outstanding information, when received, would change the conclusions and recommendation based on the currently available information.]

2.0 USER PROVIDED INFORMATION.
[Discuss the results of inquiries with the Client regarding the following:

2.1 Title Records

2.2 Environmental Liens or Activity and Use Limitation

2.3 Specialized Knowledge

2.4 Valuation Reduction for Environmental Issues

2.5 Identification of Key Site Manager

3.0 SITE INFORMATION.

3.1 Site Name and Address.
[Identify Site name, address, city, county, state and zip code];

3.2 Loan Number.
[Identify Client's Loan Number (Use either "Asset Number" or "Loan Number" as appropriate)];

3.3 Legal Description
[Identify legal description];

3.4 Site Description
[Identify the Site type, size of Site, number of buildings, number of stories, square footage of buildings, number of units. Describe the Site improvements and year improvement(s) were constructed and substantively remodeled];

3.5 Current Uses of Site
[Identify current use(s) of Site];

3.6 Owners & Occupants of Site
[Identify the current owner(s) of the Site, and identify the current non-residential tenants/occupants and their use of the Site];

3.7 Recorded Land Title Records
[Discuss the results of your review of recorded land title records. Identify whether any environmentally related liens, easements, deed restrictions, etc. were identified. Identify the source of this information.];

4.0 RECORDS REVIEW.
[Include in the following subsections, an evaluation of all general public and government environmental records reviewed under Section II, B, and a summary of the results of all verbal and written inquiries of federal, state or local regulatory authorities, including:]

4.1 Physical Setting Sources

4.1.1 Topography
[Discuss Site elevation range, slope, and any significant features. If streams or rivers are discussed, identify direction of flow.];

4.1.2 Soils
[Discuss Site soils];

4.1.3 Geology
[Discuss Site geology, including unconsolidated materials, bedrock, and estimated depth to bedrock];

4.1.4 Hydrology
[Discuss Site hydrology including depth to shallow groundwater and groundwater flow direction; be sure to identify the source/basis of this information].

4.2 Historical Use Information

4.2.1 Prior Uses of Site
[Provide a detailed discussion and chronology of the history of the Site and its uses (this section should be compiled from all available information reviewed)];

4.2.2 Summary of Prior ESAs, and Environmental Checklists
[Discuss and summarize the findings, conclusions and recommendations of prior ESAs, environmental checklists, etc. provided to Consultant by Client].

4.2.3 Aerial Photographs
[Identify the source of the information. Discuss the findings of your review of historical aerial photographs for the Site, adjacent and surrounding properties.];

4.2.4 Fire Insurance Maps
[Discuss the findings of your review of historical fire insurance maps for the Site, adjacent and surrounding properties.];

4.2.5 City Directories
[Identify the source, and publisher. Discuss the findings of your review of historical city directories (provide a tabular report of findings where possible) for the Site and adjacent and nearby properties.];

4.2.6 Other Maps and Data
[Discuss the findings of your review of any other maps and data].

4.2.7 Chain of Title
[If performed, discuss the findings of your 50-year chain of title search. Else, indicate that a 50-year chain of title search was not required to be completed by the SOW.];

4.3 Properties and Areas Surrounding the Site.

4.3.1 Current Uses of Adjacent Properties
[Discuss the adjacent properties and their uses];

4.3.2 Past Uses of Adjacent Properties
[Discuss the past uses and occupants of all adjacent properties based on the findings from all sources of information reviewed. This section should a compilation and summary of all historical data for the adjacent properties.];

4.3.3 Current Uses of Surrounding Areas;
[Discuss the current uses of the surrounding areas up to one-quarter mile.];

4.3.4 Past Uses of Surrounding Areas
[Discuss the past uses of the surrounding areas. This section should be a compilation and summary of all historical data for the surrounding properties (up to one-quarter mile).];

4.4 Environmental Records Review and Interviews

4.4.1 Mapped Database Records Search
[Discuss the results of your mapped database records search. Be sure to provide conclusions as to the risk posed to the Site by the sites identified in this search. Also, for each site with documented environmental problems, please identify the name of the site, actual distance from the Site, and hydraulic gradient of the site relative to the Site. Include a table summarizing the findings which shall identify, for each database, all database listings found to apply to the Site, adjacent to the Site, one-eighth mile, one-quarter mile, one-half mile and one mile from the subject Site. Note – detailed discussion and analysis of sites with potential significant environmental concerns should be located in Section 3.4.2.];

4.4.2 Regulatory Agency Information
[Discuss the findings of your review of the regulatory records/files reviewed, and interviews with regulatory agency personnel.];

5.0 SITE RECONNAISSANCE AND INVESTIGATION.

[Identify the inspector, date of the Site reconnaissance, weather conditions, and person(s) accompanying the inspector. Identify all areas observed, all substantive areas not assessed and why; and any other limiting conditions.]

5.1 General Site Characteristics.

[Include an evaluation of the following characteristics of the Site as more explicitly set forth in Section II,C,1:]

5.1.1 Solid Waste Disposal

[Discuss Site's solid waste disposal practices];

5.1.2 Sewage Discharge & Disposal

[Discuss Site's current and historical sewage discharge and disposal practices];

5.1.3 Surface Water Drainage

[Discuss Site's surface water drainage];

5.1.4 Heating and Cooling

[Discuss Site's current and historical heating and cooling sources];

5.1.5 Wells and Cisterns

[Identify all wells and cisterns located at the Site. For all wells, identify type, use, status (active or abandoned), depth, and regulatory requirements (registration and closure)];

5.1.6 Wastewater

[Discuss any Site wastewater generation, treatment and disposal.]

5.1.7 Additional Site Observations

[Discuss any other significant Site observations not discussed elsewhere in the Report].

5.2 Environmental Hazards.

[Include an evaluation of the following environmental hazards of the Site as more explicitly set forth in Section II,C,2:]

5.2.1 Hazardous/Regulated Substances/Wastes and Petroleum Products Used or Stored at Site

[Identify and discuss hazardous/regulated substances and wastes, and petroleum products used at the Site in the following subsections.];

5.2.1.1 Labeled Containers and Drums

[Identify and discuss all labeled containers and drums at the Site; be sure to identify the quantities of each material];

5.2.1.2 Unlabeled Containers and Drums

[Identify and discuss all unlabeled containers and drums at the Site; be sure to identify the quantities of each material];

5.2.1.3 Disposal Locations of Regulated/Hazardous Wastes

[Discuss the disposal practices of hazardous substances/wastes and petroleum products/wastes used/generated at the Site];

5.2.2 Evidence of Releases

[Discuss any evidence of releases of hazardous substances and petroleum products];

5.2.3 Polychlorinated Biphenyls (PCBs)
[Identify and discuss any potentially PCB-containing equipment at the Site];

5.2.4 Asbestos Containing Materials (ACM)
[Discuss the findings of your ACM survey; be sure to include the ACM Inspection Results Table in this section];

5.2.5 Radon
[For residential properties or as required, discuss the radon potential of the Site and radon testing results (if testing performed)];

5.2.6 Lead-based Paint
[Discuss the findings of your LBP observations; be sure to discuss any LBP testing Results];

5.2.7 Lead in Drinking Water
[Identify the potable drinking water supplier to the Site, whether the supplier is in compliance with EPA's lead in drinking water standard, and drinking water testing results (if testing performed)];

5.2.8 Landfills
[Identify and discuss any evidence of on-site landfilling activities observed or discovered.];

5.2.9 Pits, Ponds, Lagoons, Sumps, Drywells and Catchbasins
[Identify and discuss all pits, ponds, lagoons, sumps, drywells and catchbasins at the Site];

5.2.10 On-site Aboveground and Underground Storage Tanks
[Identify and discuss all historical and current on-site tanks; be sure to include the on-site Tank Information Table in this section];

5.2.11 Radiological Hazards
[Identify and discuss any radiological hazards];

5.2.12 Limited Mold Inspection
[Discuss the limited mold inspection performed and its results. Present a written compilation of data, in tabular form, which provides the following information: 1) exact locations of all suspect mold growth; 2) type of building material impacted; 3) visual moisture assessment (dry, damp, moist, wet); 4) approximate dimensions of area(s) impacted; 5) recommendations to be considered; and; 6) cost estimates for each recommendation requiring action.]

5.2.13 Additional Hazard Observations
[Discuss any additional hazard observations not previously noted].

5.3 Interviews.
[Identify all persons interviewed and discuss significant interview findings.]

5.4 Additional Services
[Include a description of any Additional Services performed (if any, and such that there is not an appropriate report section to discuss such additional services) and the Consultant's results, conclusions and recommendations from such Additional Services.]

6.0 SUMMARY AND RECOMMENDATIONS

6.1 Findings and Conclusions

6.1.1 On-Site Environmental Concerns

[Based on the results of the assessment, identify whether there are any significant and material environmental hazards and RECs (as defined by the ASTM E 1527) associated with the Site including whether the Site contains or could contain any contamination above federal, state or local regulatory levels; actual or potential significant sources of liability; and actual or potential significant noncompliance issues with environmental laws, regulations or standards, including any potential impact on the future use of the Site. Discuss the findings and conclusions, focusing on on-site areas where there are potential or suspected environmental concerns, actual or potential sources of liability and non-compliance issues. All findings and conclusions must be supported by, and referenced to, the preceding content of the ESA. When applicable, the Consultant's findings shall include a statement of the exceeded threshold for each hazard, as defined by federal, state or local law.]

6.1.2 Off-Site Environmental Concerns

[Based on the results of the assessment, identify whether there are any significant and material environmental hazards and RECs (as defined by the ASTM E 1527) associated with adjacent and nearby properties which may impact the Site. Discuss the findings and conclusions, focusing on off-site areas where there are potential or suspected environmental concerns. All findings and conclusions must be supported by, and referenced to, the preceding content of the ESA. When applicable, the Consultant's findings shall include a statement of the exceeded threshold for each hazard, as defined by federal, state or local law.]

6.1.3 Previously Resolved Environmental Concerns

[Based on the result of the assessment, identify HRECs that are currently not considered an environmental concern to the Site (either on-site or off-site). Provide a detailed discussion and explanation of the resolution of each concern including specifically why Consultant considers the historical environmental condition resolved and requires no further action.]

6.2 Recommendations

6.2.1 Recommendations for Further Investigation

[Include recommendations for further investigations, testing or analysis, if necessary, to evaluate if contamination exists on the Site. The recommended further investigations shall be supported by the Report's findings and the professional opinions of the Consultant regarding the potential for environmental contamination, or hazards on the Site. The Consultant must present cost estimates for the recommended further investigations or response action(s) and the length of time required to complete the recommended further investigations or response action(s).]

6.2.2 Recommendations for Regulatory Reporting

[Include recommendations for regulatory reporting which may be required by results of this investigation, including: Name of the agency, contact individual, telephone number, facsimile number (if available), street and mailing address; Law or regulation which requires such reporting; Time periods during which such reports must be made; and copy of reporting forms.]

6.2.3 Recommendations for Any Other Actions

[Include recommendations on any other actions necessary to comply with any federal, state or local law, ordinance, regulation or permit requirements or restrictions that may be applicable to the Site in connection with identified environmental hazards (such as Operations and Maintenance Plans). The Consultant must present cost estimates for the recommended action(s) and the length of time required to complete the recommended response action(s).]

7.0 CONSULTANT INFORMATION

7.1 Project Personnel

[Include the names and titles of all persons who substantively worked on the ESA. Indicate which of these persons was the project manager for the study and Report].

7.2 Report Certification

[Include a statement by a licensed engineer or certified environmental professional with a degree in geology, chemistry, or industrial hygiene that the ESA was performed under his or her direct supervision, that he or she has reviewed and approved the Report, and that the methods and procedures employed in the development of the Report conform to minimum industry standards. The statement shall indicate: "[I, We} declare that, to the best of [my, our] professional knowledge and belief, [I, we] meet the definition of Environmental professional as defined in §312.10 of 40 CFR 312". And "[I, We] have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. [I,We] have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312." Include a signature block for this person to sign.]

7.3 Certification/Licensing

[Include a statement that the Consultant and all subcontractors are properly licensed and/or certified to do the work described herein where required.]

7.4 Report Reliance

[Include a statement identifying the parties who may rely on this report. If applicable, see Agreement or Task Order for required report reliance language.]

8.0 APPENDICES

[This Section shall include, but not be limited to, the following separately numbered documents and attachments:]

8.1 Site Background Attachments:

8.1.1 Photographs

[All copies of the Report must have color original or original-quality prints of photographs. At minimum, a photo of each side of the Site, each adjacent property and all potentially environmentally related issues/items shall be provided];

8.1.2 Site Drawing

[Site Drawing shall include the Site, all adjacent properties and north arrow; see Section II, C, 1, o for details];

8.1.3 Area Map

[Include map which shows major streets or roads (copy of street map with Site identified is acceptable) with north arrow];

8.1.4 Aerial Photographs
[All copies of the Report must have original, original-quality or legible copies with Site boundaries delineated and a north arrow];

8.1.5 Topographical Map
[Include a color copy of the USGS map with Site boundaries delineated, a north arrow, and scale];

8.1.6 Fire Insurance Maps
[Include copies of all fire insurance maps reviewed with Site boundaries delineated and a north arrow];

8.1.7 City Directories
[Include copies of representative city directories reviewed with the Site and adjacent property listings (or where the Site listing would appear if it were listed) highlighted. The year of each directory shall also be denoted. If copies are not allowed, notes taken during the course of the directory review shall be provided.];

8.1.8 Other Maps and Data
[Include copies of other maps and other data described in Section II,B,1,b,(1),(f)];

8.1.9 Title Search Records
[Include copies of the abstract of title or other written title search materials].

8.1.10 References
[Include a list of all references cited or otherwise utilized for the ESA].

8.2 Governmental Agency Records Attachments

8.2.1 General Public Records
[Attach general public records (including regulatory file review information) obtained and reviewed pursuant to Section II,B,1];

8.2.2 Mapped Database Report
[Attach Mapped Database Report];

8.2.3 Regulatory Agency Records
[Attach all regulatory agency related records and correspondence generated, obtained and/or reviewed. Include list of agencies contacted for records search and name of persons contacted.];

8.3 Interview Record Attachments
[Attach a record of communication (ROC) for each and all persons interviewed for this assessment. The ROCs should include the date of the conversation and identity of individuals present during the conversation, the relationship of each person to the Site, and the results of the interview (including all issues discussed and responses received)].

8.4 Site Reconnaissance and Investigation

8.4.1 Reporting/Notification Forms
[Attach reporting or completed notification/registration forms submitted to State or local regulatory authorities];

8.4.2 Permits
[Attach copies of permit applications or permits provided];

8.4.3 Asbestos Survey Results
[Attach results of all documentation such as laboratory test results, chain of custody forms, copies of previous asbestos testing results, etc.];

8.4.4 Lead-Based Paint Survey Results
[Attach results of all documentation such as laboratory test results, chain of custody forms, field notes, copies of previous lead-based paint testing results, etc.];

8.4.5 Radon Survey Results
[Attach results of all documentation such as laboratory test results, chain of custody forms, field notes, copies of previous radon testing results, etc.];

8.4.6 Lead in Drinking Water Survey Results
[Attach results of all documentation such as laboratory test results, chain of custody forms, field notes, copies of previous lead testing results, etc.];

8.4.7 AST & UST Tests
[Attach results of any available leak tests for AST and USTs, as well as inventory information];

8.4.8 Corrective Action Plans
[Attach copies of existing corrective action plans, communication or public interaction plans];

8.4.9 Reference Documents
[Attach copies of reference documents such as soil or water studies];

8.4.10 Other Information
[Attach list of references and copies of any other appropriate information or documentation including copies of prior ESAs and checklists].

8.5 Certifications.

8.5.1 Certification/Qualifications
[Attach copies of current certifications of all required licenses and certifications required of the Consultant and referenced above in Report Section 6; also attach copies of résumés of personnel conducting this ESA];

8.5.2 Sampling/Testing Certifications
[Attach current certifications of asbestos inspector, asbestos management planner, and current National Voluntary Laboratory Accreditation Program (NVLAP) certificates from the analytical laboratories, and any certifications required to perform any other testing or procedure set forth in this Scope of Work].

8.6 Scope of Work
[Attach ONLY a copy of this Scope of Work. Do NOT append the Services Agreement or the Site-specific Task Order].

IV. TABLES. The following contains sample tables to be included in the appropriate sections of the Report. The tables provided in the Report minimally must contain the information as presented in the following sample tables.

SAMPLE TABLE I

ASBESTOS INSPECTION RESULTS

SITE NAME:
SITE ADDRESS:

Type of Material	Location	Sample Number	Asbestos Content (Presumed or lab result)	Friability	Condition of Material	Potential for Disturbance	Estimated Quantity	Recommendation	Cost Estimate

SAMPLE TABLE II

LEAD-BASED PAINT TESTING RESULTS

Sample Number	Sample Location	Type of Substrate	Condition of Paint	Accessibility to Children	Approximate Quantity	Test Result	Recommendation	Cost Estimate

SAMPLE TABLE III

MOLD INSPECTION RESULTS

Location of Suspected Mold Growth	Type of Material Impacted	Condition of Impacted Material (intact or damaged)	Visual Moisture Assessment (dry, damp, moist, wet, etc)	Approximate Dimensions of Areas Impacted	Recommendation	Cost Estimate

SAMPLE TABLE IV

ON-SITE TANK INFORMATION

	Tank ID Number				
	1	2	3	4	5
Type of Tank (UST/AST)					
Year Tank Installed					
Tank Size/Capacity					
Tank and Associated Piping Construction Material					
Tank Status (Active, Inactive, Removed, or Abandoned)					
Corrosion Protection Method (Tank and Piping)					
Leak Detection Method					
Overfill Protection Method					
Containment Structure					
Evidence of Leakage, Spillage, or Staining					
Does Tank Contain Product?					
Type of Product					
Quantity of Product					
Registration/Closure Status
