Dear James Kissler:

On September 10, 2019, the Department of Ecology (Ecology) sent you written notice of our preliminary determination that Kissler Enterprises Limited Partnership is a potentially liable person (PLP) for a release of hazardous substances at the WA UW Tacoma Branch (Site).

On October 15, 2019, Ecology received your written notice accepting your status as a PLP for the Site and waiving your opportunity to comment. In addition, you provided information regarding other parties who may be liable for the release. Ecology will review this information and name additional parties as PLPs if credible evidence exists indicating their potential liability.

Based on available information, Ecology finds that credible evidence exists that Kissler Enterprises Limited Partnership is liable for a release of hazardous substances at the Site. On the basis of this finding, Ecology has determined that Kissler Enterprises Limited Partnership is a PLP with regard to the Site.

The purpose of the [Model Toxics Control Act \(MTCA\)](#)<sup>1</sup> is to identify, investigate, and cleanup facilities where hazardous substances have been released. Liability for environmental contamination under MTCA is strict, joint and several (Revised Code of Washington [RCW] 70.105D.040(2)).

Ecology ensures that contaminated sites are investigated and cleaned up to the standards set forth in the MTCA statute and regulations. Ecology has determined that it is in the public interest for remedial actions to take place at this Site. Ecology will contact you regarding the actions necessary for the Kissler Enterprises Limited Partnership to bring about the prompt and thorough cleanup of hazardous substances at this Site.

Failure to cooperate with Ecology or comply with MTCA in this matter will result in Ecology employing enforcement tools as it deems necessary and appropriate. This includes, but is not limited to, the issuance of an administrative order. Failure to comply with such an order may result in a fine of up to \$25,000 per day and liability for up to three times the costs incurred by the state (RCW 70.105D.050(1)).

Your rights and responsibilities as a PLP are outlined in chapter 70.105D RCW, and chapters 173-340 and 173-204 Washington Administrative Code (WAC). Ecology's cleanup project manager for the Site is Thomas Middleton.

At this stage of the investigation, Ecology is requesting that you fill out and return the enclosed access agreement to allow Ecology and its contractors to conduct investigation activities on your property. These investigation activities will assist Ecology in defining the extent of contamination located on your property. These data will be used to finalize the Remedial Investigation/Feasibility Study at the Site and allow for proper selection of remedial alternatives. Ecology will be in contact with you regarding scheduling access to your property for the investigation work.

If you have any questions regarding this notice, please contact Thomas Middleton at (360) 407-7263 or [thomas.middleton@ecy.wa.gov](mailto:thomas.middleton@ecy.wa.gov).

Sincerely,

Rebecca S. Lawson, P.E., LHG
