**RE: Request for Amendment of Agreed Order No. DE 9476**

Dear Barry:

Thank you for your and the rest of the Department of Ecology Port Gardner Team's time over the last few months discussing the Port of Everett's ("Port") recent purchase and future actions at the Kimberly-Clark Worldwide Site ("Site").

Pursuant to our recent discussions, this letter serves as the Port's formal request to amend Agreed Order No. DE 9476 ("Agreed Order") to make the Port a party to the Agreed Order, including the implementation of an interim action to construct a low-permeability cap at the Site and other potential actions.

Please don't hesitate to contact me if you have any questions about this request.

Sincerely,

Erik Gerking
