Re: Go East Woodwaste Landfill (aka, Go East Corp Landfill), Solid Waste Facility Permit No. PT0004938 (SW-027), Approval of Final Design Drawings, Construction Specifications, and Construction Quality Assurance Plan

Mr. Penhallegon:

The Snohomish Health District (SHD) is providing written approval of the:

- Go East Landfill Closure, Land Disturbance Activity – LDA #1, July 2020 (aka, design drawings and construction specifications) and
- Construction Quality Assurance Plan in Support of LDA for Go East

based on SHD's review and the Washington State Department of Ecology's review and recommended approval of these documents. The revised plans revert the pond compaction specifications to dynamic compaction, as planned in the Go East Landfill Closure Plan (January 2018), and update the waste screening table in Sheet 9.

With the approval of these documents, SHD authorizes P&GE, LLC to proceed with the Go East Landfill Closure Plan, dated January 2018, subject to:

- Snohomish County Planning and Development Service's issuance of a Land Disrupting Activity permit for initial/rough grading at the Site.
- The Department of Ecology's notification to proceed with an interim action work plan.

Sincerely,

Megan Engebretson
Environmental Health Specialist
