DEPARTMENT OF ECOLOGY

15 West Yakima Avenue, Suite 200 • Yakima, Washington 98902-3452 • (509) 575-2490

October 3, 2007

Mr. Alfonso Lopez, Principal  
Lewis and Clark Elementary School  
1130 Princeton Street  
Wenatchee, Washington 98831

**Re: No Further Action Determination for:**

- Name: Lewis and Clark Elementary School
- Address: 1130 Princeton Street, Wenatchee
- Facility/Site No.: 5045747

Dear Mr. Lopez:

Enclosed is a copy of the Interim Action Report, prepared by our staff, which provides details of the cleanup conducted last summer. The Department of Ecology (Ecology) appreciated the opportunity to partner with you in keeping children safe. The lead and arsenic contaminated soil from prior pesticide use has been removed or reduced, and as such, no further action is required (under the Model Toxics Control Act, chapter 70.105D RCW) to protect human health and the environment.

Ecology will initiate the process to remove the school from the Hazardous Sites List. This process does include a 30-day public comment period. Upon completion of the public comment process, Ecology will update its database to reflect this "No Further Action" determination. At that time, the school will no longer appear in future publications of the Confirmed & Suspected Contaminated Sites Report.

Once again, we appreciate your commitment to human health and the environment. Should you have any questions, please feel free to contact Jeff Newschwander at (509) 454-7842 or (509) 388-5223.

Sincerely,

Don Abbott  
Section Manager  
Toxics Cleanup Program  
Central Regional Office
