

STATE OF WASHINGTON
DEPARTMENT OF ECOLOGY

15 West Yakima Avenue, Suite 200 • Yakima, Washington 98902-3452 • (509) 575-2490

October 1, 2007

Mr. Kevin Pearl, Principal
Washington Elementary School
1401 Washington Street
Wenatchee, Washington 98831

Dear Mr. Pearl:

Re: No Further Action Determination for:

- Name: Washington Elementary School
- Address: 1401 Washington Street, Wenatchee
- Facility/Site No.: 1104071

Enclosed is a copy of the Interim Action Report, prepared by our staff, which provides details of the cleanup conducted last summer. The Department of Ecology (Ecology) appreciated the opportunity to partner with you in keeping children safe. The lead and arsenic contaminated soil from prior pesticide use has been removed or reduced, and as such, no further action is required (under the Model Toxics Control Act, chapter 70.105D RCW) to protect human health and the environment.

Ecology will update its database to reflect this "No Further Action" determination. The school will not appear in future publications of the Confirmed & Suspected Contaminated Sites Report. Ecology will also initiate the process to remove the school from the Hazardous Sites List. This process does include a thirty (30) day public comment period.

Once again, we appreciate your commitment to human health and the environment. Should you have any questions, please feel free to contact Jeff Newschwander at 509-388-5223 or 509-454-7842.

Sincerely,

Don Abbott
Section Manager
Toxics Cleanup Program
Central Regional Office
