**RE: Groundwater Sampling – Goodwill City of Yakima, FSID: 555**

Dear Mark Kunkler:

The Washington Department of Ecology (Ecology) is continuing the Yakima Railroad Area groundwater-monitoring project. As part of this investigation, Ecology's Environmental Assessment Program will be conducting groundwater sampling for the Yakima Railroad Area between November 16, 2020 and November 20, 2020. Please note – the sampling will only involve the well(s) accessible from the street and will not require entry into the building.

Samples will be analyzed for tetrachloroethylene, breakdown products, and general water quality parameters. Results will be available to you once Ecology receives them, upon your request. Please consider this letter to be a formal property access notice for an Ecology representative.

If you have any questions, please contact me at (509) 454-7833.

Sincerely,

Kyle Parker  
Site Manager  
Toxics Cleanup Program  
Central Regional Office
