<p>As a small commercial plant nursery/greenhouse operation from the 1950s until 2008, the site was developed with several greenhouses and outdoor sales areas. The release of the pesticides is believed to have been a result of the legal use/application of the pesticides as a routine part of the nursery operation from the 1950's and until as late as 1972 (for DDT and consequently DDD and DDE, which are DDT manufacturing derived contaminates), 1974 (for Dieldrin; still permitted for termite control until 1987) and 1988 (for Chlordane; banned for food crops in 1978 but still allowed for dipping the roots/tops of non-food plants until 1988) when the pesticides identified on the site were banned or partially banned in the USA. No specific information regarding the historical use/storage of the pesticides has been identified or reported to the current property owner.</p>
