

# Pasco Landfill Cleanup

## Drum removal begins in October

The Washington Department of Ecology is notifying the community that preparation for removing hazardous waste from Zone A of the Pasco Landfill is starting. Cleanup activities are expected to take about 19 months to complete. The site is not accessible to the public, and many measures will be in place to ensure community safety.

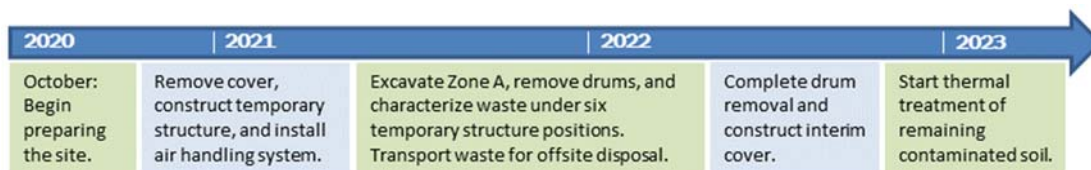

More information is available on our website, and we will continue to update the community by mail when milestones are reached.

### Pasco Landfill cleanup underway

This permanent solution will address an estimated 35,000 drums of industrial waste and prevent future releases of hazardous substances to air, soil, and groundwater.
