Hi Marissa and Julie,

I apologize for not getting back to you sooner.

Tamara Welty has completed her review, and her recommendation is to list the site on the Confirmed & Suspected Contaminated Sites (CSCS) List.

However, we may be able to reach an NFA if we had more groundwater information. If you could provide three groundwater samples down-gradient of the remediated soil we would re-evaluate. (Note that TPH-D and TPH-O results from groundwater samples must be added and compared to the Method A groundwater cleanup level of 0.5 mg/L.)

Please let me know if your client would approve this additional work, or if you'd like me to move forward with listing the site.

Let me know if you have questions!

Respectfully,

Donna Musa

Hi Donna,

I wanted to check in on this project and see if your determination letter is coming out soon?

Thanks,
Marissa

Hello!

Thank you for submitting the Independent Cleanup Action Report for Interbay Urban Storage.

Ecology will review this information through the initial investigation process and make a determination – either No Further Action (NFA) or to list on the Confirmed and Suspected Contaminated Sites (CSCS) List. By regulation we have 90 days to complete the initial investigation. If you have a specific time frame or schedule in mind, please let me know and I'll try to factor that in.

For now, the reference number is ERTS 683703. Please let me know if you have any questions about process!

Sincerely,

Donna Musa
