Mr. David Garwood
Garwood RK Co, Inc.
PO Box 96
Bingen, WA 98605

Dear Mr. Garwood:

RE: Early Notice Letter Regarding the Release of Hazardous Substances on Unocal Bulk Plant #0046, located at 217 E Steuben Street, Bingen, UST ID # 8382, F/SID # 61834259

Under Chapter 70.105D Revised Code of Washington (RCW), upon receiving a report of a release or threatened release of a hazardous substance that may pose a threat to human health or the environment, the Department of Ecology (Ecology) is required to conduct an Initial Investigation. The II is based upon the following documents:

1. Report of Remedial Actions, Underground Storage Tank Removal, Bulk Plant 0046, by GeoEngineers, dated June 28, 1989.
2. Environmental Site Characterization, Bulk Plant 0046, by GeoEngineers, dated August 27, 1990.
3. Report of Groundwater Monitoring and Supplemental Subsurface Exploration, Unocal Bulk Plant 0046, by GeoEngineers, dated July 1, 1994.
4. Report of additional Subsurface Exploration, Unocal Bulk Plant 0046, by GeoEngineers, dated October 20, 1994.
5. Report of Remedial Excavation Monitoring, Unocal Bulk Plant 0046, by GeoEngineers, dated March 18, 1996.

Our records indicate the above-reference property had multiple underground storage tanks (UST's) removed and several investigations revealing soil contaminated with diesel and heavy oils above the Model Toxics Control Act (MTCA) Method A cleanup levels. These reports also show minimal groundwater contamination as well. To date our records indicate no cleanup actions have been conducted at this site.

Under the Model Toxics Control Act (MTCA), Ecology maintains a statewide database of confirmed or suspected contaminated sites. This database is made available to the public upon request and online at <http://www.ecy.wa.gov/programs/tcp/cscs/CSCSpage.HTM>. It is Ecology's decision that the above-referenced property will be added to this database because of diesel and oil contaminated soil and groundwater.

Mr. David Garwood

Please note that inclusion in the database does **not** mean that Ecology has made a determination regarding the identification of any potentially liable person(s) under the Model Toxics Control Act (administered under Chapter 173-340 WAC).

It is the policy of the Department of Ecology to work cooperatively with persons to accomplish prompt and effective site cleanups. Ecology prefers to achieve site cleanup cooperatively through independent cleanup actions (WAC 173-340-510). Cooperating with Ecology in planning or conducting remedial actions is not an admission of guilt or liability.

In proceeding with an independent cleanup, please be aware that there are requirements in state law which must be adhered to. In particular, WAC 173-340-300(4) requires a report of independent actions. To the extent known, the report shall include:

1. identification and location of the hazardous substance(s)
2. circumstances of the release and discovery
3. remedial actions planned, completed, or underway

More requirements of independent cleanup actions are discussed in WAC 173-340-120(8)(b). Ecology will use the appropriate requirements contained throughout this chapter in its evaluation of the adequacy of any independent remedial actions performed.

You are encouraged to contact Ecology for limited informal advice and assistance. For technical assistance you are advised to hire an environmental consultant with the appropriate expertise. A copy of Chapter 70.105D RCW, the Model Toxics Control Act, and the implementing regulation Chapter 173-340 WAC, which details the requirements of the Act, is enclosed.

If you would like Ecology to review the independent cleanup actions conducted and determine if the site warrants **no further action**, you are encouraged to participate in the Voluntary Cleanup Program. Information about the Voluntary Cleanup Program (VCP) is available online at <http://www.ecy.wa.gov/programs/tcp/vcp/Vcpmain.htm>, or you may contact Mark Dunbar, CRO VCP Coordinator, at (509) 454-7836.

If you have any questions regarding this letter, please feel free to contact me at (509) 454-7290.

Sincerely,

Brian Deeken
Site Manager/Initial Investigations
Toxics Cleanup Program
