## 

## **INITIAL INVESTIGATION FIELD REPORT**

**ERTS Number:** 659781

Parcel #(s): 1977200330

Date Submitted: 1/4/2016

County: King FSID #: 18045 CSID #: 12982

SITE	INF	ORN	ΙΔΤΙ	ON

Investigator: Gayle Garbush / Priscilla Tomlinson

SITE INFORMATION	ט ו ו	#: 620	0267				
Site Name (Name over door): Pike Place Market PDA	ame (Name over door): Site Address (including City, State and Zip):						
Site Contact, Title, Business: Audrey McIvor PBS Engineering & Environmental	Site Contact Address (including City, State at 2517 Eastlake Ave E Seattle, WA 98102	Phone/email: 206-348-6317 Audrey.McIvor@ pbsenv.com					
Site Owner, Title, Business: Pike Place Market PDA	Site Owner Address (including City, State an 80 Pike St #500 Seattle, WA 98101	d Zip):	Phone/email:				
Site Owner Contact, Title, Business:	Site Owner Contact Address (including City,	State and Zip):	Phone/email:				
Previous Site Owner(s):	Additional Info:						
Alternate Site Name(s):	Additional Info:						
INSPECTION INFORMATION Inspection Conducted? Date/Tir Yes No  Photographs taken? Yes  Samples collected? Yes   RECOMMENDATION No Further Action (Check appropria	No Photos available in site report  No Data available in site reports  ate box below):	s	ed and Suspected				
No release or threatened release  Refer to program/agency (Name:							
Independent Cleanup Action Completed (contamination removed)							
garage. Reporting gasoline-contaminations  CURRENT SITE STATUS (Brief Sum	during excavation activities associated with cated soil from the UST.  Inmary of why Site is recommended for Listing use of the excavation were not detected for all elow its Method A CUL.	g or NFA):	-				

## **OBSERVATIONS**

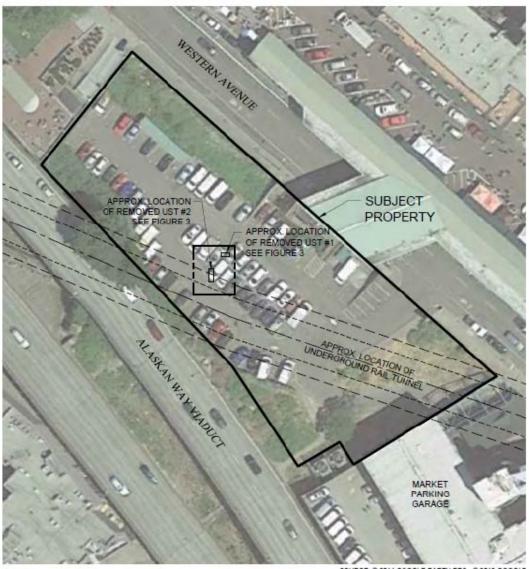

**Description** (If site visit made, please be sure to include the following: site observations, site features and cover, chronology of events, sources/past practices likely responsible for contamination, presence of water supply wells and other potential exposure pathways, etc.):

Documents reviewed: Remedial Investigation & Cleanup Action Report, Pike Place Market – 1901 Western Avenue. PBS Engineering & Environmental, Seattle, WA. December 17, 2015.

## Priscilla Tomlinson's comments:

I think this report supports a decision of NFA.

Soil CULs based on soil contact only (no leaching) were reported because ground water is expected to be 30 feet below the floor of the excavation. This argument was not supported by either ground water samples or soil samples collected over depth. However, it is a moot point because the final soil concentrations at the base of the excavation were not detected for all analytes (detection limits below Method A) except lead, which was detected below its Method A CUL.

(fill in contaminant matrix below with appropriate status choice from the key below the table)

CONTAMINANT GROUP	CONTAMINANT	SOIL	GROUNDWATER	SURFACE	AIR	BEDROCK	DESCRIPTION
	Phenolic Compounds						Compounds containing phenols (Examples: phenol; 4-methylphenol; 2-methylphenol)
	Non-Halogenated Solvents						Organic solvents, typically volatile or semi-volatile, not containing any halogens. To determine if a product has halogens, search HSDB (http://toxnet.nlm.nih.gov/cgibin/sis/htmlgen?HSDB) and look at the Chemical/Physical Properties, and Molecular Formula. If there is not a Cl, I, Br, F in the formula, it's not halogenated. (Examples: acetone, benzene, toluene, xylenes, methyl ethyl ketone, ethyl acetate, methanol, ethanol, isopropranol, formic acid, acetic acid, stoddard solvent, Naptha). Use this when TEX contaminants are present independently of gasoline.
	Polynuclear Aromatic Hydrocarbons (PAH)						Hydrocarbons composed of two or more benzene rings.
Non-Halogenated Organics	Tributyltin						The main active ingredients in biocides used to control a broad spectrum of organisms. Found in antifouling marine paint, antifungal action in textiles and industrial water systems. (Examples: Tributyltin; monobutyltin; dibutyltin)
	Methyl tertiary-butyl ether						MTBE is a volatile oxygen-containing organic compound that was formerly used as a gasoline additive to promote complete combustion and help reduce air pollution.
	Benzene	RB					Benzene
	Other Non-Halogenated Organics						TEX
	Petroleum Diesel	В					Petroleum Diesel
	Petroleum Gasoline	RB					Petroleum Gasoline
	Petroleum Other	В					Oil range organics
	PBDE						Polybrominated di-phenyl ether
	Other Halogenated Organics						Other organic compounds with halogens (chlorine, fluorine, bromine, iodine). search HSDB (http://toxnet.nlm.nih.gov/cgi-bin/sis/htmlgen?HSDB) and look at the Chemical/Physical Properties, and Molecular Formula. If there is a CI, I, Br, F in the formula, it is halogenated. (Examples: Hexachlorobutadiene; hexachlorobenzene; pentachlorophenol)
Halogenated Organics	Halogenated solvents						PCE, chloroform, EDB, EDC, MTBE
(see notes at bottom)	Polychlorinated Biphenyls (PCB)						Any of a family of industrial compounds produced by chlorination of biphenyl, noted primarily as an environmental pollutant that accumulates in animal tissue with resultant pathogenic and teratogenic effects
	Dioxin/dibenzofuran compounds (see notes at bottom)						A family of more than 70 compounds of chlorinated dioxins or furans. (Examples: Dioxin; Furan; Dioxin TEQ; PCDD; PCDF; TCDD; TCDF; OCDD; OCDF). Do not use for 'dibenzofuran', which is a non-chlorinated compound that is detected using the semivolatile organics analysis 8270
Metals	Metals - Other						Cr, Se, Ag, Ba, Cd
	Lead	В					Lead
	Mercury						Mercury
	Arsenic						Arsenic
Pesticides	Non-halogenated pesticides						Pesticides without halogens (Examples: parathion, malathion, diazinon, phosmet, carbaryl (sevin), fenoxycarb, aldicarb)
	Halogenated pesticides						Pesticides with halogens (Examples: DDT; DDE; Chlordane; Heptachlor; alpha-beta and delta BHC; Aldrin; Endosulfan, dieldrin, endrin)

CONTAMINANT GROUP	CONTAMINANT	SOIL	GROUNDWATER	SURFACE	AIR	BEDROCK	DESCRIPTION
Other Contaminants	Radioactive Wastes						Wastes that emit more than background levels of radiation.
	Conventional Contaminants, Organic						Unspecified organic matter that imposes an oxygen demand during its decomposition (Example: Total Organic Carbon)
	Conventional Contaminants, Inorganic						Non-metallic inorganic substances or indicator parameters that may indicate the existence of contamination if present at unusual levels (Examples: Sulfides, ammonia)
	Asbestos						All forms of Asbestos. Asbestos fibers have been used in products such as building materials, friction products and heat-resistant materials.
	Other Deleterious Substances						Other contaminants or substances that cause subtle or unexpected harm to sediments (Examples: Wood debris; garbage (e.g., dumped in sediments))
	Benthic Failures						Failures of the benthic analysis standards from the Sediment Management Standards.
	Bioassay Failures						For sediments, a failure to meet bioassay criteria from the Sediment Management Standards. For soils, a failure to meet TEE bioassay criteria for plant, animal or soil biota toxicity.
Reactive Wastes	Unexploded Ordinance						Weapons that failed to detonate or discarded shells containing volatile material.
	Other Reactive Wastes						Other Reactive Wastes (Examples: phosphorous, lithium metal, sodium metal)
	Corrosive Wastes						Corrosive wastes are acidic or alkaline (basic) wastes that can readily corrode or dissolve materials they come into contact with. Wastes that are highly corrosive as defined by the Dangerous Waste Regulation (WAC 173-303-090(6)). (Examples: Hydrochloric acid; sulfuric acid; caustic soda)

Status choices for contaminants	
Contaminant Status	Definition
B - Below Cleanup Levels (Confirmed)	The contaminant was tested and found to be below cleanup levels. (Generally, we would not enter each and every contaminant that was tested; for example if an SVOC analysis was done we would not enter each SVOC with a status of "below". We would use this for contaminants that were believed likely to be present but were found to be below standards when tested
S - Suspected	The contaminant is suspected to be present; based on some knowledge about the history of the site, knowledge of regional contaminants, or based on other contaminants known to be present
C - Confirmed Above Cleanup Levels	The contaminant is confirmed to be present above any cleanup level. For example - above MTCA method A, B, or C; above Sediment Quality Standards; or above a presumed site-specific cleanup level (such as human health criteria for a sediment contaminant).
RA - Remediated - Above	The contaminant was remediated, but remains on site above the cleanup standards (for example - capped area).
RB - Remediated - Below	The contaminant was remediated, and no area of the site contains this contaminant above cleanup standards (for example - complete removal of contaminated soils).

FOR ECOLOGY II REVIEWER USE ONLY (For Listing Sites):								
How did the Site come to be known:  Site Discovery (received a report): 9/30/15 (Date Report Received)  ERTS Complaint  Other (please explain):								
Does an Early Notice Letter need to be sent: ☐ Yes ☒ No If <i>No</i> , please explain why: NFA								
NAICS Code (if known): Otherwise, briefly explain how property is/was used (i.e., gas station, dry cleaner, paint shop, vacant land, etc.): 								
Site Unit(s) to be created (Unit Type): If multiple Units needed, please explain		Sediment						
Cleanup Process Type (for the Unit):		☐ Independent Action☐ Ecology-supervised or conducted						
Site Status:  Awaiting Cleanup  Construction Complete – Performance Monitoring  Cleanup Started  Cleanup Complete – Active O&M/Monitoring  No Further Action Required								
Site Manager (Default: Donna Musa): Donna Musa								
Specific confirmed contaminants inclu	Facility/Site ID No. (if known): 18045							
in Soil		Cleanup Site ID No. (if known): 12982						
in Groundwater								
in Other (specify r	matrix:)							

COUNTY ASSESSOR INFO: Please attach to this report a copy of the tax parcel/ownership information for each parcel associated with the site, as well as a parcel map illustrating the parcel boundary and location.
