Effective June 19, 2017, Ecology has determined that no further action is necessary (at the Initial Investigation stage) due to independent remediation.

Snohomish Health District received evidence of cleanup:

- Action Report, Lowe's #061, Arlington, WA. Stericycle Environmental Services. March 2, 2016.
- Analytical Data, Project 102103. OnSite Environmental Inc., Redmond, WA. March 11, 2016.

The above documentation provides sufficient evidence that this cleanup was conducted to MTCA Method A cleanup levels for unrestricted land use. Mike Young, Snohomish Health District, has recommended no further action at this site, and Ecology concurs.
