**Re: Notice of Third Periodic Review Conducted at the following Hazardous Waste Site:**

- **Site Name:** Gailleon Park Site
- **Site Address:** 101 N 65th Ave, Yakima
- **Facility/Site ID:** 44832462
- **Cleanup Site ID:** 2859

Dear Ken Wilkinson:

Under the Model Toxics Control Act (MTCA), chapter 70.105D RCW, which governs the cleanup of hazardous waste sites in Washington State, the Department of Ecology (Ecology) must conduct a periodic review of all sites with institutional controls and environmental covenants every five years. This letter serves to inform you that a third periodic review has been conducted at the Gailleon Park Site.

The periodic review process includes the following steps: confirmation that the environmental covenant (if used) is still active and recorded with the title to the property, a review of any monitoring data collected since the cleanup was completed or since the last review was conducted, and a site visit to confirm the institutional controls and conditions of the environmental covenant are being followed.

Based on the information collected during this periodic review, the Gailleon Park Site appears to meet the requirements of Chapter 173-340 WAC, and the selected remedy continues to be protective of human health and the environment.

A periodic review will continue to be required every five years as long as institutional controls and/or an environmental covenant are required to protect human health and the environment. The next periodic review will be due in January 2024.
