

**2020 CONSENT FOR ACCESS TO PROPERTY
FOR MAPPING AND SAMPLING ACTIVITIES**

The undersigned Owner hereby gives consent to the Department of Ecology (Ecology), and its agents, employees, contractors and subcontractors, to have access to enter the property at the below location(s) for the purpose of:

- A. Mapping the yard areas and landscape features on the property.
- B. Collecting soil samples to determine if a cleanup is necessary.
- C. Other actions related to the collection of soil samples (e.g. removal and replacement of a portion of a fence for equipment access).
- D. Entrance to your property from either the public right-of-way or an adjacent property for the purposes described above.

Mapping and sampling for each individual property should take one day for each activity – one for mapping features and one for sampling. The total time we will need access to your property will most likely be a couple of days, depending on the size of your property.

The activities listed above will take place between 8 a.m. and 5 p.m. The property owner and, if possible, the tenant will be notified by Ecology at least seven (7) calendar days in advance of accessing your property. If you give Ecology your tenant's contact information, your tenants will be contacted by Ecology one week before activities will take place on the property. If we do not have this information, however, it is the responsibility of the property owner to notify tenants of Ecology's activities on the property.

Sampling results will be mailed to the property owner when they are available. Sampling results will also become part of a database and will be available to the public for review.

Owner's Signature: _____

Owner Name (Please Print): _____

Property Address: _____

Owner Mailing Address: _____
