Attn: Shara-Li Joy

Re: REC Silicon, Inc  
Permit # ST0008121

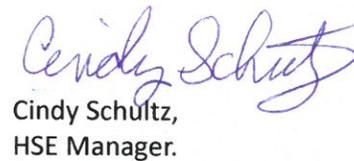

This letter is to inform you that REC has ceased production at its Moses Lake facility as announced on December 30, 2024. The plant will remain staffed with a small crew to keep the plant in a condition that will allow future production. The reduced staff will operate and monitor plant safety systems and vent systems as a level of process chemicals will remain onsite. The intent is to maintain routine reporting to agencies as required.

When a decision is made to restart production, we will communicate our intentions well in advance.

Sincerely,

Jeff Johnson,  
VP of Operations

Cindy Schultz,  
HSE Manager.
