December 3, 2014

Todd Weishaupt  
President  
Harris Rebar Auburn  
3512 B St NW  
Auburn, WA 98001-1731

**Facility Name:** Harris Rebar - Auburn  
**Location:** 3512 B ST NW  
Auburn, WA 98001  
**Permit No:** WAR012484  
**County:** King

**RE: Reissuance of Coverage under the Industrial Stormwater General Permit**

Dear Todd Weishaupt:

The Washington Department of Ecology (Ecology) has reissued the Industrial Stormwater General Permit (permit). A copy of your new permit is enclosed. **Retain this letter with your permit and Stormwater Pollution Prevention Plan. It is the official record of permit coverage for your facility.** Ecology issued the final permit December 3, 2014 and it becomes effective January 2, 2015.

**Permit Overview**

The new permit has a number of changes. The most significant changes are summarized in the enclosed "Summary of Changes" table. You can find more information on Ecology's website at: <http://www.ecy.wa.gov/programs/wq/stormwater/industrial/index.html>. Please contact Ecology if you have any questions.

**New Reporting Requirements**

Beginning in 2015, you must submit Discharge Monitoring Reports and Annual Reports electronically, using Ecology's Water Quality Permitting Portal– Permit Submittals application, unless a waiver from electronic reporting has been granted. You can find more information regarding Ecology's Water Quality Permitting Portal on our website at: <http://www.ecy.wa.gov/programs/wq/permits/paris/webdmr.html>.

If you have technical questions regarding Ecology's Water Quality Permitting Portal, please contact the portal staff at (800) 633-6193/option 3 or email [WQWebPortal@ecy.wa.gov](mailto:WQWebPortal@ecy.wa.gov).

**Site Specific Monitoring Requirements**

Enclosed is a summary of the monitoring requirements for your facility. This summary is based on the best information available to Ecology about your facility. If you believe there is a discrepancy between what the permit requires and the enclosed summary, please contact Ecology immediately. In the case of a difference between the permit as applied to your facility and the summary, the permit requirements take precedence.

### **Your Right to Appeal the Permit**

You have a right to appeal the terms and conditions of this general permit to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this permit issuance notice. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal you must do the following within 30 days of the date of receipt of this notice:

- File your appeal and a copy of this notice with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this notice on Ecology in paper form - by mail or in person. (See addresses below.) E-mail is not accepted.

### **Address and Location Information**

<b>Street Addresses</b>	<b>Mailing Addresses</b>
<b>Department of Ecology</b> Attn: Appeals Processing Desk 300 Desmond Drive SE Lacey, WA 98503	<b>Department of Ecology</b> Attn: Appeals Processing Desk PO Box 47608 Olympia, WA 98504-7608
<b>Pollution Control Hearings Board</b> 1111 Israel Road SW, Suite 301 Tumwater, WA 98501	<b>Pollution Control Hearings Board</b> PO Box 40903 Olympia, WA 98504-0903

### **For Additional Information or Assistance**

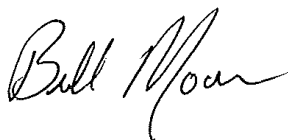

Ecology is committed to providing assistance to you. Please review our web page at <http://www.ecy.wa.gov/programs/wq/stormwater/industrial/index.html>. For questions about transfers, terminations, and other administrative issues, please contact Clay Keown at [ckeo461@ecy.wa.gov](mailto:ckeo461@ecy.wa.gov) or (360) 407-6048.

If you have questions regarding stormwater management issues at your site, please contact Greg Stegman at [GSTE461@ecy.wa.gov](mailto:GSTE461@ecy.wa.gov) or (425) 649-7019.

### **Questions**

If you have questions regarding the permit, please contact Jeff Killelea at [jeff.killelea@ecy.wa.gov](mailto:jeff.killelea@ecy.wa.gov) or (360) 407-6127.

Sincerely,

Bill Moore, P.E., Manager  
Program Development Services Section  
Water Quality Program

## Summary of Your Facility's ISGP Monitoring Requirements

This summary is based on the best information available to Ecology about your facility. If you believe there is a discrepancy between what the permit requires and the enclosed summary, please contact Ecology immediately. In the case of a difference between the permit as applied to your facility and the summary, the permit requirements take precedence.

### Benchmarks and Sampling Requirements Applicable to All Facilities (Condition S5, Table 2)

Parameter	Units	Benchmark Value	Analytical Method	Laboratory Quantitation Level <sup>1</sup>
Turbidity	NTU	25	EPA 180.1 Meter	0.5
pH	SU	Between 5.0 - 9.0	Meter/Paper <sup>2</sup>	±0.5
Oil Sheen	Yes/No	No visible oil sheen	N/A	N/A
Copper, Total	µg/L	Western WA: 14 Eastern WA: 32	EPA 200.8	2.0
Zinc, Total	µg/L	117	EPA 200.8	2.5
<sup>1</sup> The Permittee shall ensure laboratory results comply with the quantitation level (QL) specified in the table. However, if an alternate method from 40 CFR Part 136 is sufficient to produce measurable results in the sample, the Permittee may use that method for analysis. If the Permittee uses an alternative method it must report the test method and QL on the discharge monitoring report. <sup>2</sup> Permittees shall use either a calibrated pH meter or narrow-range pH indicator paper with a resolution not greater than ± 0.5 Standard Units.				

### Industry-Specific Benchmarks and Sampling Requirements (Condition S5, Table 3)

Parameter	Units	Benchmark Value	Analytical Method	Laboratory Quantitation Level <sup>1</sup>
Lead, Total	µg/L	81.6	EPA 200.8	0.5
Petroleum Hydrocarbons	mg/L	10	ECY NWTPH Dx	0.1
<sup>1</sup> The Permittee shall ensure laboratory results comply with the quantitation level (QL) specified in the table. However, if an alternate method from 40 CFR Part 136 is sufficient to produce measurable results in the sample, the Permittee may use that method for analysis. If the Permittee uses an alternative method it must report the test method and QL on the discharge monitoring report.				

**Sampling and Effluent Limits Applicable to Discharges to 303(d)-listed Waters (Condition S6, Table 6)**

Parameter	Units	Maximum Daily <sup>1</sup>	Analytical Method <sup>2</sup>	Laboratory Quantitation Level <sup>3</sup>	Impairment Type
Fecal Coliform	#/100ml	Report Only	SM 9222 D (MF)	20 CFU/100 mL	
<sup>1</sup> Maximum daily effluent limit means the highest allowable daily discharge. The daily discharge means the discharge of a pollutant measured during a calendar day. The daily discharge is the average measurement of the pollutant over the day; this does not apply to pH. <sup>2</sup> Or other equivalent method with the same reporting level. <sup>3</sup> The Permittee shall ensure laboratory results comply with the quantitation level (QL) specified in the table. However, if an alternate method from 40 CFR Part 136 is sufficient to produce measurable results in the sample, the Permittee may use that method for analysis. If the Permittee uses an alternative method it must report the test method and QL on the discharge monitoring report.					

**Additional Sampling**

Ecology may have established site-specific sampling requirements in addition to those contained in the ISGP (Administrative Order, permit modification, etc.). These additional requirements are not addressed in this summary.
