Tacoma, WA 98422-4106	City:	Tacoma
	County:	Pierce

RE: Industrial Stormwater General Permit Coverage Letter - Correction

Dear Marty Diklich:

The Washington Department of Ecology (Ecology) reissued the Industrial Stormwater General Permit (permit) on December 3, 2014. The permit coverage letter Ecology mailed to your facility did not include an accurate summary of the applicable monitoring requirements. Specifically, Ammonia was incorrectly added to the summary of your facility's ISGP monitoring requirements sheet. We apologize for this error and any confusion that occurred as a result. Please find a corrected summary of your facility's monitoring requirements enclosed.

If you believe there is a discrepancy between what the permit requires and the enclosed summary, please contact Ecology.

For Additional Information or Assistance

Ecology is committed to providing assistance to you. Please review our web page at <http://www.ecy.wa.gov/programs/wq/stormwater/industrial/index.html>. For questions about transfers, terminations, and other administrative issues, please contact Josh Klimek at josh.klimek@ecy.wa.gov, or (360) 407-7451

If you have questions regarding stormwater management issues at your facility, please contact Paul Stasch of Ecology's Southwest Regional Office in Lacey at paul.stasch@ecy.wa.gov, or (360) 407-6273

If you have questions regarding the permit, please contact Jeff Killelea at jeff.killelea@ecy.wa.gov or (360) 407-6127.

Sincerely,

Bill Moore, P.E., Manager
Program Development Services Section
Water Quality Program

Permit No. WAR000066

Facility Name: Jesse Engineering

Location: 5225 7th St E.

Tacoma, WA 98424-2708

Sic Code: 3541, 3599

Summary of Your Facility's ISGP Monitoring Requirements

This summary is based on the best information available to Ecology about your facility. If you believe there is a discrepancy between what the permit requires and the enclosed summary, please contact Ecology immediately. In the case of a difference between the permit as applied to your facility and the summary, the permit requirements take precedence.

Benchmarks and Sampling Requirements Applicable to All Facilities (Condition S5, Table 2)

<u>Parameter</u>	<u>Units</u>	<u>Benchmark Value</u>	<u>Analytical Method</u>	<u>Laboratory Quantitation Level¹</u>
Turbidity	NTU	25	EPA 180.1 Meter	0.5
pH	SU	Between 5.0 and 9.0	Meter/Paper	±0.5
Zinc, Total	µg/L	117	EPA 200.8	2.5
Oil Sheen	Yes/No	No visible oil sheen	N/A	N/A
Copper, Total	µg/L	Western WA: 14 Eastern WA: 32	EPA 200.8	2.0

Sampling and Effluent Limits Applicable to Discharges to 303(d)-listed Waters (Condition S6, Table 6)

<u>Parameter</u>	<u>Units</u>	<u>Maximum Daily²</u>	<u>Analytical Method³</u>	<u>Laboratory Quantitation Level</u>	<u>Impairment Type</u>
Fecal Coliform	#/100ml	Report Only	SM 9222D (MF)	20 CFU/100 ml	303(d)

¹ The Permittee shall ensure laboratory results comply with the quantitation level (QL) specified in the table. However, if an alternate method from 40 CFR Part 136 is sufficient to produce measurable results in the sample, the Permittee may use that method for analysis. If the Permittee uses an alternative method it must report the test method and QL on the discharge monitoring report.

² Maximum daily effluent limit means the highest allowable daily discharge. The daily discharge means the discharge of a pollutant measured during a calendar day. The daily discharge is the average measurement of the pollutant over the day; this does not apply to pH.

³ Or other equivalent method with the same reporting level.

Additional Sampling: Ecology may have established site-specific sampling requirements in addition to those contained in the ISGP (Administrative Order, permit modification, etc.). These additional requirements are not addressed in this summary.
