RE: Liberty Lake Sewer and Water District - NPDES Permit No. WA0045144
Supply of Goods and Special Services for Membrane Filtration System Bid and Contract
Document Approval

Dear Mr. Adams:

The Department of Ecology (Ecology) APPROVES the package provided by Liberty Lake Sewer and Water District (LLSWD) on the Supply of Goods and Special Services for Membrane Filtration System Bid and Contract Document received in our office on May 19, 2015. This document also covers subsequent addenda received via email on June 18, 2015, and June 26, 2015. The approval of the revisions meets expectations for a complete project and is in accordance with RCW 90.48 and Chapter 173-240 WAC.

LLSWD must notify this office immediately of any proposed changes or revisions to the approved documents. The City of Liberty Lake must also provide changes or revisions in the form of addenda, technical appendices, or supplemental reports to the original approved package of documents to Ecology for review and approval. Additionally, LLSWD must maintain copies of the approved engineering report, operations and maintenance manual, permit, and Discharge Monitoring Reports (DMRs) on-site at your facility in Spokane County, Washington.

Ecology's review and approval of these documents only assures compliance and consistency with the appropriate rules, regulations, guidelines, planning and design criteria, terms of any loan agreement, and/or other similar documents and is not a quality control check. LLSWD should not consider this approval as satisfying other applicable federal, state, or local statutes, ordinances, or regulations.

Please contact Ellie Key at (509) 329-3519 if you have any questions or need additional information.

Sincerely,

James M. Bellatty
Section Manager
Water Quality Program
