Section B: Facility Data

Name and Location of Facility Inspected (For industrial users discharging to POTW, also include POTW name and NPDES permit number) Pacific Fishermen 351-24 <sup>th</sup> Ave NW Seattle, WA 98107	Entry Time/Date 10:00 AM 12/11/15	Permit Effective Date 11/01/14
	Exit Time / Date 11:45 AM 12/11/15	Permit Expiration Date 10/31/2019

Name(s) of On-Site Representative(s)/Title(s)/Phone and Fax Number(s) Cherie Berg, Environmental/Health Mgr, 206-784-2562 Larry Ward, Facilities and Maintenance Coordinator Tyler Adams, Safety and Environmental Compliance Mgr.
Name, Address of Responsible Official/Title/Phone and Fax Number. Doug Dixon 351 - 24 <sup>th</sup> Ave NW Seattle, WA 98107
Phone Number 206-784-2562 Fax 206-784-1986 Contacted? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

Other Facility Data

Section C: Areas Evaluated During Inspection (Check only those areas evaluated)

<input checked="" type="checkbox"/> Permit	<input type="checkbox"/> Flow Measurement	<input type="checkbox"/> Operations&Maint.	<input type="checkbox"/> CSO/SSO (Sewer Overflow)
<input checked="" type="checkbox"/> Records/Reports	<input type="checkbox"/> Self-Monitoring Program	<input type="checkbox"/> Sludge Handling/Disposal	<input checked="" type="checkbox"/> Pollution Prevention
<input checked="" type="checkbox"/> Facility Site Review	<input checked="" type="checkbox"/> Compliance Schedules	<input type="checkbox"/> Pretreatment	<input type="checkbox"/> Multimedia
<input type="checkbox"/> Effluent/Receiving water	<input type="checkbox"/> Laboratory	<input checked="" type="checkbox"/> Storm Water	<input type="checkbox"/> other

Section D: Summary of Findings/Comments

Arrived onsite at 10am, and were met in the yard by Tyler, who walked us to the office and met Cherie and Larry. We walked through the shop and along the north boundary of the property. The weather was dry after several days of torrential rain. The solid waste dumpster had leaked some material which was in the process of being shoveled up. All process water is pumped to and collected in a 10,000 gal tank and two 8000 gal tanks, which are located in the northwest corner of the facility, next to the road. All process water is discharged to King County Metro sewer. The screwlift drydock was in use with a large ship being prepared for hull stripping and repainting. We were shown the paint storage, paint mixing room, and the new sand blast booth and painting booth. Observed the Aquip Stormwater Rx unit and the catchbasins and vault that collect stormwater prior to treatment. The Marine Railway 2 had a large ship that was being painted with rollers, and observed the winch (refurbished high-line logging winch). Overall the site looked great and was generally very clean, swept and orderly.

In the office, Cherie showed us the DMRs and lab results, and presented documentation of the pollution prevention training record that is required of all employees. We discussed the pH excursions that the facility had experienced and reviewed the pH rainfall data the site had collected. pH does not seem to be a problem any longer so the rainfall pH monitoring had been suspended. We discussed the upcoming permit report submittals and noted that all submittal requirements were covered in their 10-1-15 letter.

Overall the facility appears to be well managed and maintained. We left the site at 11:45am.
