

Addendum to the Fact Sheet for State Waste Discharge Permit ST0005370 Asotin County Regional Landfill

1. General Information

Facility: Asotin County Regional Landfill
2901 6th Avenue
Clarkston, WA 99403

2. Application and Compliance Review

Asotin County Regional Landfill submitted an application to Ecology on December 8, 2014 for permit reissuance, and Ecology accepted it on August 17, 2015. Ecology reviewed inspections and assessed compliance of the facility's discharge with the terms and conditions in the previous permit. Ecology has sufficiently reviewed the application, discharge monitoring reports, and other facility information in enough detail to ensure that:

1. Asotin County Regional Landfill has complied with most of the terms, conditions, requirements and schedules of compliance of the expired permit.
2. Ecology has up-to date information on the facility's waste treatment practices, and the nature, content, volume, and frequency of its discharge.
3. The discharge meets applicable effluent standards and limits, ground water quality standards (local limits), and other legally applicable requirements.

Since the issuance of the current permit, Ecology has not received any additional information, which indicates that environmental impacts from the discharge warrant a complete renewal of the permit. Therefore, Ecology chose to reauthorize this permit.

3. Permit Reauthorization

When Ecology reauthorizes a discharge permit it essentially reissues the permit with the existing limits, terms and conditions. Alternatively, when Ecology renews a permit it re-evaluates the impact of the discharge on the publicly owned treatment plant, which may lead to changes in the limits, terms and conditions of the permit.

The permit reauthorization process, along with the renewal of high priority permits, allows Ecology to reissue permits in a timely manner and minimize the number of active permits that have passed their expiration dates. Ecology assesses each permit that is expiring and due for reissuance and compares it with other permits due for reissuance when it plans its workload for the upcoming year.

This fact sheet addendum accompanies the permit, which Ecology proposes to reauthorize for the discharge of wastewater to the City of Clarkston Wastewater Treatment Plant. The previous fact sheet explains the basis for the discharge limits and conditions of the reauthorized permit and remains as part of the administrative record.

4. Permit Limits and Conditions

The reauthorized permit is virtually identical to the previous permit issued on April 6, 2010 with a few exceptions identified below. Ecology removed the completed report requirements that do not require additional or continued assessment. The proposed reauthorized permit includes:

1. The discharge limits and conditions in effect at the time of expiration of the previous permit.
2. Changes to the submittal dates for reports from those in the previous permit.
3. Adjusted dates for the other necessary compliance and submittal requirements carried over from the past permit.
4. A new requirement, Appendix A, which identifies the required test methods, detection levels and quantitation levels for the monitoring required in the proposed permit. Ecology added this requirement to ensure that facilities use test methods with detection levels that will detect pollutants at levels necessary to evaluate compliance with local limits.
5. Per the City of Clarkston's June 2015 revised Pretreatment Ordinance, the permit limits for Oil & Grease (Non Polar and Total), Cyanide (Free and Total), Molybdenum, Mercury and Selenium have been updated in Section S1 and Cyanide. Oil & Grease were also updated in the monitoring requirements of Section S2. All other limits and monitoring requirements remain the same.

5. Public Process

There is no change in the quality or quantity of the discharge, nor were there significant changes since the current permit was issued, the therefore Ecology is not required to place a Public Notice of Draft in the local newspaper to inform the public and to invite comment on the proposed draft State Waste Discharge Permit and Fact Sheet; WAC 173-216-090.

6. Permit Appeal Process

Appendix A describes the permit appeal process.

7. Recommendation for Permit Issuance

Ecology proposes to reissue this permit for 5 years.

Appendix A - Your Right to Appeal

You have a right to appeal this permit to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of the final permit. The appeal process is governed by chapter 43.21B RCW and chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2) (see glossary).

To appeal you must do the following within 30 days of the date of receipt of this permit:

- File your appeal and a copy of this permit with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this permit on Ecology in paper form - by mail or in person. (See addresses below.) E-mail is not accepted.

You must also comply with other applicable requirements in chapter 43.21B RCW and chapter 371-08 WAC.
