**RE: Application for Renewal of National Pollutant Discharge Elimination System (NPDES)
Permit No. WA0052078 for Darigold - Sunnyside**

Dear Mr. Phillips:

Thank you for your October 29, 2015 application for the renewal of NPDES Permit for Darigold - Sunnyside. The application was deemed to be incomplete. The following deficiencies are noted:

1. An Application for a State Waste Discharge Permit to Discharge Industrial Wastewater to a Publicly-Owned Treatment Works (POTW) must be included as part of the application package.
2. The State Waste Discharge Permit Application referenced above must include a signature from the Port of Sunnyside Industrial Wastewater Treatment Facility (IWWTF) responsible official. The signature is needed in the application's Section J Certifications.
3. The application package does not need old DMRs. Lab reports prior to the current permit's effective date are also not needed. The application wastewater characterization sections (both NPDES & State) need to summarize wastewater monitoring data from the current permit term (2012 to present).
4. A characterization of Darigold's Outfall 3 wastewater – discharged to Darigold's west side facilities, must be included in the application package. This wastewater must be characterized for Flow, COD, TSS, TDS, FDS, Chloride, Ammonia, Conductivity, & pH.

Please complete the application and resubmit by **February 1, 2016** to: Cindy Huwe, Permit Coordinator, Department of Ecology, Central Regional Office, 1250 West Alder Street, Union Gap, WA 98903-0009.

If you have any questions concerning this letter, please contact Sanjay Barik at 509/454-4247 or by email at sanjay.barik@ecy.wa.gov.

Sincerely,

Cindy Huwe
Permit Coordinator
Water Quality Program
