**Subject:   Reminder of Monthly Monitoring of Total and Dissolved Arsenic**  
**Permit Number: WAG641006**

Dear Scott Higgins:

Your Water Treatment Plant General Permit requires you to monitor for total and dissolved arsenic in your discharge at least once monthly from September 2016 through August 2017.

See Conditions S-5.2 and S-5.3 in your permit for more information about sampling and analysis methods, required quantitation levels, and laboratory accreditation. Failure to report results for total and dissolved arsenic is a permit violation.

**From your permit:**

“Monitoring for total and dissolved arsenic is required for only the 12 monitoring periods of the third year of this permit term, i.e., from September 2016 through August 2017 for existing and covered Permittees, or for the first 12 months of coverage for new Permittees whose coverage begins after September 2016.

“Based on the results of arsenic monitoring, Ecology may modify this permit by extending the term when monitoring for arsenic is required; adding one or more effluent limits for arsenic or other parameters; adding monitoring requirements for other parameters; adding monitoring requirements for other environmental matrices, such as raw water sources and receiving waters; or changing the activities, discharges, and facilities that require this permit or are excluded from coverage under this permit.”

If you have questions, please contact your regional permit manager:
