Re: November 2016 Monthly Feed, Biomass and Disease Control Use Report for Cooke Aquaculture Net Pen NPDES Permits

Dear sirs-

Please find the end of month biomass, feed and disease control chemical use summary report for November 2016. As of December the Hope Island site received the next generation of smolts. The Port Angles facility was harvested out by the beginning of December and will remain fallow until March before the next population of smolts are entered. If there is any further information you need please feel free to call me anytime.

Best regards,

Kevin Bright, Permit Coordinator
Cooke Aquaculture Pacific, LLC
