

Construction Stormwater General Permit Proposed New Discharge to an Impaired Water Body

DEPARTMENT OF ECOLOGY

Part 1. Site Information

NOV 16 2017

1a. Site or Project Name: **WAR305950**

WATER QUALITY PROGRAM

1b. Site Address or Location Description:
US 97 milepost 159.5

City:
Cle Elum

County:
Kittitas

1c. Impaired Water Body: **Lower Yakima Watershed TMDL**

1d. Impairment Pollutant(s): **Turbidity**

Part 2. Discharge Certification

Ecology will not grant coverage under the Construction Stormwater General Permit for new discharges to an impaired (303(d)-listed) water body if the discharge will cause or contribute to a violation of water quality standards. For Ecology to determine whether permit coverage is appropriate, the site operator (Permittee) must select one of the three options below, complete this form, and provide the required documentation to Ecology.

Select the one option below that most clearly applies to your site. **Additionally, submit the relevant portions of the SWPPP (Stormwater Pollution Prevention Plan) that support the chosen option. If you have not yet developed the SWPPP, submit relevant documentation to be included in the SWPPP to justify the chosen option.**

☐ 2a. The pollutant(s) for which the water body is impaired is/are not present on the site. Documentation of this finding is contained within the SWPPP. (If the water body is impaired for more than one pollutant, check this box only if NONE of the impairment pollutants are present on site).

☐ 2b. Stormwater will not be exposed to the pollutant(s) for which the water body is impaired, and the SWPPP details procedures taken to prevent exposure on site. (This statement must be true for all pollutants for which the water body is impaired. If any impairment pollutant does not meet 2a or 2b, you must complete 2c).

☒ 2c. You don't expect the discharge to cause or contribute to an exceedance of a water quality standard. Provide Ecology with data to support this statement, and retain such data on site with the SWPPP. The operator must provide data and other technical information to Ecology that sufficiently demonstrates one of the following:

- i. For discharges to waters without an EPA-approved or established TMDL (water cleanup plan), the discharge of the impairment pollutant(s) will meet in-stream water quality criteria at the point of discharge to the water body.
- ii. For discharges to waters with an EPA-approved or established TMDL, there is sufficient remaining wasteload allocation in the TMDL to allow the construction stormwater discharge and that existing dischargers to the water body are subject to compliance schedules designed to bring the water body into attainment with water quality standards.

**If none of the options above apply to your site, your site will not be eligible for coverage under the permit.*

Part 3. Signature

3a. "I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

DAN LEWIS / WSDOT

Printed Name / Company (Operator/Permittee only)

Dan Lewis

Signature of Operator/Permittee*

Project Engineer

Title

11/6/2017

Date

* Signature of Operator/Permittee requirements:

- A. For a corporation: by a responsible corporate officer.
- B. For a partnership or sole proprietorship: by a general partner or the proprietor, respectively.
- C. For a municipality, state, federal, or other public facility: by either a principal executive officer or ranking elected official.
