RE: Annual Discharge Monitoring Reports for The Dalles Fruit Co. and Underwood Fruit and Warehouse - Permit No(s). – WAG435290 (The Dalles Fruit Co) and WAG435043 (Underwood)

Dear Don:

The Department of Ecology (Ecology) has reviewed your 2017 Annual Discharge Monitoring Reports (DMR's). The tables below summarize the permit violations found. The purpose of this letter is to provide you an opportunity to review these violations and submit corrections if the records are not accurate.

The Dalles Fruit Co*

Outfall	Parameter	Date	Reported Value	Permit Limit
001	BOD, Chloride, Sulfate, Solids Residue (TSS), Chlorine Residuals, Ethoxyquin, SOPP, TBZ, and pH	2017	Missing Analysis	One per quarter is required

Underwood Fruit & Warehouse*

Outfall	Parameter	Date	Reported Value	Permit Limit
002	Application Area, Application Loading Rate, Chlorine Residuals, Captan, Pyrimethanil (Penbotec), Fludioxonil (Scholar)	2017	Missing Analysis	One per quarter is required

*There may be reporting errors on one or both of these facilities. If you did not discharge in any quarter you should enter code C; if you did not use some products for any quarter, you should use code M under the specific product. Please check your DMR's; correct the codes and resubmit them (the original date of submittal is maintained throughout this editing process). If you did discharge and missed samples, please adjust your sampling schedule in 2018 to include all discharges in monitoring programs.
