Ms. Tricia Miller
Water Quality Permit Coordinator
Northwest Regional Office
Washington Department of Ecology
3190 160th AVE SE
Bellevue WA 98008-5452

RE: NPDES permit extension for WA0030830 issued to Pacific Coast Coal Company (PCCC)

Dear Ms. Miller:

We received your letter dated January 24, 2018 informing us that DOE has determined that we must reapply for a new NPDES permit because we've not engaged in coal mining operations since 1999. You listed several premises for making this determination. As shown below, most of these are without basis.

Premise Number 1: You claim that in 2014 PCCC was neither operating nor in a condition to operate without significant improvements. This is not true. In fact, the overwhelming body of evidence is that we were ready to operate but could not because the Office of Surface Mining Reclamation and Enforcement (OSMRE) had not approved our federal permit renewal and revision applications. It is a mystery to us what "significant improvements" you are referring to? Mr. Gerald Shervey, P.E. and Monika Kannadaguli from DOE inspected the mine site on August 12, 2014 and noted that while PCCC was not mining at the time, it expected to mine coal within the next five years. DOE's inspection report erroneously stated that PCCC did not have any contracts for mining or processing of coal. This is not correct. PCCC did have a contract to sell coal to Lehigh Cement Company. The facts will show that except for renewal of PCCC's federal permit all other key permits were in effect and that PCCC would have been able to start producing coal within a month of receiving permit renewal and revision approval from OSMRE in 2014.

Premise Number 2: You state that resuming mining operations will possibly result in more exposed soil and changes to the discharge quality. This conclusion is without basis and contrary to conclusions expressed in the NEPA Environmental Assessment (EA). DOE participated in the EA review process. The NPDES and subsequent renewals were based on a mining and reclamation plan that disturbed over 300 acres and mined 250,000 tons per year of coal. Our revised plan only disturbs 29.7 new

acres through the remaining mine life resulting in 302.9 total acres of disturbed ground (EA p 19). New ground disturbed to produce only 84,000 tons per year is within the footprint of the operating pit. Water in that area is fully captured in the pit before being pumped into one of the existing sediment control ponds. OSMRE concludes (EA p 30, 31):

Although the potential effects of the Proposed Action Alternative on surface water quality will be greater compared to the recent period of inactivity, impacts are anticipated to be less than those experienced during prior periods of active mining. Reduced impacts are expected due to the small area of additional disturbance (29.7 acres), and to additional measures being implemented to control and treat surface water runoff.

Impacts to surface water quantity, as a result of previous mining and reclamation operations, have been minor. The dewatering of mine pits and pumping of water throughout the mine site impacts discharge into the Mud Lake Creek and Ginder Creek sub-watersheds. Both of these sub-watersheds discharge into Ginder Creek, which in turn discharges into Rock Creek and Lake Sawyer. The large-scale effects of runoff variations at the John Henry No. 1 Mine in the 1993-2015 dataset are minimal when evaluated against their effect in the local area. Consequently, the Proposed Action Alternative will result in a similar surface water quantity impact observed during the previous mining period and constitutes a minor and short-term impact.

OSMRE determined that our 2011 application was a significant permit revision due to changes in coal production and resumption of blasting. You failed to note that the reason given also included "high public interest in the operation, likely public interest in the revision." Those are the real reasons that OSMRE deemed it significant and subject to NEPA review. If it was just the change in coal production from zero to 84,000 tons per year and the resumption of blasting OSMRE would not likely have deemed it significant and subject to NEPA review. At 84,000 tons per year we are the smallest coal mine located west of the Mississippi and hardly deemed significant by industry standards. As OSMRE notes (EA p 31):

Because the amount of coal being hauled under the Proposed Action Alternative is small (approximately 84,000 tons per year). Negligible indirect impacts to surface water resources are anticipated.

Premise Number 3: DOE claims this is a new advancement in project status and that has limited facility operations information available to it. At the same time, you admit to participating in the EA review process. That process began in 2011 and OSMRE has been careful to keep DOE apprised of the project process throughout their extended review. The EA contains extensive operational information that DOE has reviewed. DOE also periodically inspects the mine and receives monthly OSMRE inspection reports.

DOE also claims not to be aware of any reclamation work done at the facility in the past two decades. Again, the EA is clear that much of the previously disturbed ground has been covered with topsoil and planted with Douglas fir. OSMRE also confirmed that considerable backfilling of overburden from Spoil Pile 2 was completed in 2010-11 (EA p6):

.....and in the fourth quarter of 2010 and January 2011 PCCC reclaimed a portion of Spoil Pile 2 by backfilling 572,000 CY of fill into Pits 1 and 2.

Premise Number 4: DOE is requesting specific project plans, treatment plans and wastewater characterization to re-evaluate the impacts of the newly proposed project on groundwater and surface water. Your premise that this is a newly proposed project is false. It is also somewhat puzzling how DOE can reach this conclusion given the fact that you participated in the EA review process. Throughout the EA, it is made clear that this is not a newly proposed project but simply the extension of the same project that DOE has been monitoring since mining began in 1986.

Contrary to DOE's apparent assumption, the mine plan has not changed since the permit was issued in 2008. It is the same basic mine plan for Pit 2 that has been in place since completion of the NEPA and SEPA EIS's in 1985 and DOE's review and issuance of a new permit in 2008. We do not intend to change the mining and reclamation plan nor change any facilities. It is the same plan that DOE has been reviewing for the past 30 years.

In April 2009 OSMRE issued a permit revision order that required PCCC to resume mining or move into final reclamation efforts. They also required that PCCC obtain a contract to sell coal. In April 2010 PCCC began mining but did not have a contract to sell the coal as it was to be sold on the spot market. This was not consistent with OSMRE's 2009 revision order. OSMRE thus ordered the cessation of mining and further ordered that the permit application package (PAP) be revised to eliminate coal mining and initiate final reclamation. This change in the mining plan was done under duress in May 2010. PCCC completed some final reclamation in 2010 and 2011 by dozing approximately 600,000 cubic yards of dirt from exterior spoil stockpile 2 into Pits 1 and 2. In April 2011 Pacific obtained a contract to sell coal. With direction from OSMRE, Pacific submitted a permit revision request to revert to the identical mining and reclamation plan in effect prior to their order to stop mining. Even though the plan remained the same and the annual production rate was substantially less than approved previously, OSMRE decided that this was a significant permit revision that triggered an EA. That EA was published in April 2014 and resulted in extensive comments. OSMRE decided to improve their first EA. This resulted in the revised EA being published in September 2017. OSMRE is in the process of reviewing comments on the new EA including those submitted by DOE. It expects a decision, regarding permit renewal and revision, during the next few months.

Conclusion

As noted above, your rationale for requiring a new permit is without basis. Nonetheless we are submitting the required application forms 1 and 2C. This includes tabulated water quality monitoring data and statistical analyses through December 31, 2017. We'll continue to monitor and operate in accordance with the current permit while DOE processes the new application.

We've also included (in electronic format) a copy of the recently completed Technical Information (Engineering) Report that was recently completed by ESM Consulting Engineers. This report was also requested by King County.

Respectfully submitted,

David J. Morris, P.E.

I. Outfall Location

For this outfall, list the latitude and longitude, (degrees, min.xxxx) and name of the receiving water(s)

Outfall Number (list)	Latitude		Longitude		Receiving Water (name)
	Deg	Min	Deg	Min	
					See accompanying site map and coordinate list
					for outfall and monitoring point locations
					and coordinates.

II. Flows, Sources of Pollution, and Treatment Technologies

- A. Attach a line drawing showing the water flow through the facility. Indicate sources of intake water, operations contributing wastewater to the effluent, and treatment units labeled to correspond to the more detailed description in Item B. Construct a water balance on the line drawing by showing average flows between intakes, operations, treatment units, and outfalls. If a water balance cannot be determined (e.g., for certain mining activities), provide a pictorial description of the nature and amount of any sources of water and any collection or treatment measures.
- B. For each outfall, provide a description of (1) All operations contributing wastewater to the effluent, including process wastewater, sanitary wastewater, cooling water, and storm water runoff; (2) The average flow contributed by each operation; and (3) The treatment received by the wastewater. Continue on additional sheets if necessary.

CONTINUED FROM THE FRONT

C. Except for storm runoff, leaks, or spills, are any of the discharges described in Items II-A or B intermittent or seasonal?

YES (complete the following table)

NO (go to Section III)

III. PRODUCTION

A. Does an effluent guideline limitation promulgated by EPA under Section 304 of the Clean Water Act apply to your facility? Yes No

YES (complete Item III-B)

NO (go to Section IV)

B. Are the limitations in the applicable effluent guideline expressed in terms of production (or other measure of operation)?

YES (complete Item III-C)

NO (go to Section IV)

C. If you answered "yes" to Item III-B, list the quantity which represents an actual measurement of your level of production, expressed in the terms and units used in the applicable effluent guideline, and indicate the affected outfalls.

1. AVERAGE DAILY PRODUCTION

IV. IMPROVEMENTS

A. Are you now required by any Federal, State, or local authority to meet any implementation schedule for the construction, upgrading, or operation of wastewater treatment equipment or practices or any other environmental programs which may affect the discharges described in this application? This includes, but is not limited to, permit conditions, administrative or enforcement orders, enforcement compliance schedule letters, stipulations, court orders, and grant or loan conditions.

YES (complete the following table)

NO (go to Item IV-B)

B. OPTIONAL: You may attach additional sheets describing any additional water pollution control programs (*or other environmental projects which may affect your discharges*) you now have underway or which you plan. Indicate whether each program is now underway or planned, and indicate your actual or planned schedules for construction.

MARK "X" IF DESCRIPTION OF ADDITIONAL CONTROL PROGRAM IS ATTACHED

EPA ID Number (*Copy from Item 1 of Form 1*)

CONTINUED FROM PAGE 2

V. INTAKE AND EFFLUENT CHARACTERISTICS

A, B, & C: See instructions before proceeding - Complete one set of tables or each outfall - Annotate the outfall number in the space provided.

NOTE: Tables V-A, V-B, and V-C are included on separate sheets number V-1 through V-9.

D: Use the space below to list any of the pollutants listed in Tables 2c-3 of the instructions, which you know or have reason to believe is discharged or may be discharged from any outfall. For every pollutant you list, briefly describe the reasons you believe it to be present and report any analytical data in your possession.

VI. POTENTIAL DISCHARGES NOT COVERED BY ANALYSIS

Is any pollutant listed in Item V-C a substance or a component of a substance which you currently use or manufacture as an intermediate or final product or byproduct?

YES (list all such pollutants below)

NO (go to Item VI-B)

CONTINUED FROM THE FRONT

VII. BIOLOGICAL TOXICITY TESTING DATA

Do you have any knowledge or reason to believe that any biological test for acute or chronic toxicity has been made on any of your discharges or on a receiving water in relation to your discharge within the last 3 years?

YES (identify the test(s) and describe their purpose below)

NO (go to Section VIII)

VIII. CONTRACT ANALYSIS INFORMATION

Were any of the analyses reported in Item V performed by a contract laboratory or consulting firm?

YES (list the name, address, and telephone number of, and pollutants analyzed by, each such laboratory or firm below) NO (go to Section IX)

IX. CERTIFICATION

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

EPA I.D. NUMBER (copy from Item 1 of Form 1) **VA-003083-0**

OUTFALL NUMBER
All

PART C - If you are a primary industry and this outfall contains process wastewater, refer to Table 2c-2 in the instructions to determine which of the GC/MS fractions you must test for. Mark "X" in column 2-a for all such GC/MS fractions; mark "X" in column 2-b for each pollutant you know or have reason to believe is present. Mark "X" in column 2-c for each pollutant you believe is absent. If you are not required to mark column 2-a (secondary industries, nonprocess wastewater outfalls, and non-required GC/MS provide the results of at least one analysis for that pollutant. If you mark column 2a for any pollutant, you must provide the results of at least one analysis for that pollutant. If you know or have reason to believe it will be discharged in concentrations of 10 ppb or greater. If you mark column 2b for acrolein, acrylonitrile, 2,4 dinitrophenol, or 2-methyl-4, 6 dinitrophenol, you must provide the results of at least one analysis for each of these pollutants which you know or have reason to believe that you discharge in concentrations of 100 ppb or greater. Otherwise, for pollutants for which you mark column 2b, you must either submit at least one analysis or briefly describe the reasons the pollutant is expected to be discharged. Note that there are 7 pages to this part; please review each carefully. Complete one table (all 7 pages) for each outfall. See instructions for additional details and requirements.

Small Business Regulatory Enforcement Fairness Act (SBREFA) Your Comments Are Important

The Small Business and Agriculture Regulatory Enforcement Ombudsman and 10 Regional Fairness Boards were established to receive comments from small businesses about Federal agency enforcement actions. The Ombudsman will annually evaluate the enforcement activities and rate each agency's responsiveness to small business. If you are a small business (a business with 500 or fewer employees including those of affiliates) and wish to comment on the enforcement or compliance activities of OSM, call 1-888-REG-FAIR (1-888-734-3247)

Mine Site Inspection

Mine Name: John Henry No. 1 Mine

Operator: Pacific Coast Coal Company (PCCC)

Permit Number: WA-0007-D

Permit Status: Active, no mining

Total Acres Permitted: 480

Total Acres Disturbed: 315

Inspection Date: August 12, 2014

Inspection Type: Federal Complete Inspection

Weather Conditions: Partly cloudy, upper 70's

OSM Inspector: Christy Hulsman (#532)

Participants: Mike Conaboy, PCCC

Monica Kannadaguli, WA DOE

Jerry Shervey, WA DOE

Inspection Narrative

A. Administrative

OSM conducted a complete inspection of the John Henry No. 1 Mine operated by Pacific Coast Coal Co. (PCCC) on Tuesday, August 12, 2014; the inspection lasted from 12:00pm to 5:00pm. Mike Conaboy was PCCC's representative for the field inspection. Monika Kannadaguli and Jerry Shervey from the Washington Department of Ecology (WA DOE) also participated in the inspection. WA DOE issues and monitors the NPDES permit for the mine. PCCC is continuing to prepare the site for mining and reclamation activities in anticipation of OSMRE's decision on their significant permit revision.

PCCC has not had a dumpster delivered to the site, but continues to add material to the trash disposal pile adjacent to the truck scale.

B. Hydrologic Balance (Ponds and Impoundments)

Pit 1: PCCC shut off the Pit 1 pump at the beginning of the month and does not anticipate running it again till mining activities are more imminent.

Pit 2: The water level within the main pit remains low. PCCC has suspended pumping from this cell till mining activities are more imminent.

A Pond: No issues were noted at the outfall of this pond.

A' Pond: The gravel pack needs to be placed back around the riser pipe. The embankment has been cleared and the knotweed along the access has been cut back.

B Pond: The sump and both cells were inspected. Some of the vegetation had been cleared from around the emergency spillway; a few alders had been left that still may impede inspection and functionality – these need to be removed as well. PCCC also needs to remove the cat-tails adjacent to the discharge riser pipe.

G Pond: The embankment of this pond has been mowed for the season. WADOE is alright with the cat-tails in the bottom of the pond as they will aid in filtering water, as long as they don't affect the designed capacity of the sediment pond.

H2 Pond: The embankments have been mowed for the season. There was no noticeable discharge at the pond outfall.

I Pond: Since Pit 1 is not being drawn down and discharged into I-pond, the pool elevation remains below the discharge threshold of the slotted riser pipe. I discussed vegetation on the embankments and within the pond cells with WA DOE. WA DOE does not discourage vegetation within the ponds as it acts as an addition buffer for sediment. I expressed my concerns with larger vegetation on the constructed embankments of the pond cells.

C. Topsoil

No topsoil salvage or spreading activities have occurred since the last inspection.

D. Backfilling and Grading

No backfilling or grading activities have occurred since the last inspection.

E. Spoil Piles & Excess Spoil Disposal

No issues were noted for Spoil Piles 2, 3N or 3S.

F. Coal Mine Waste

Any coal mine waste generated during mining will be disposed of in Pit 1. No mining is occurring, therefore, no coal mine waste is being generated.

G. Blasting

Blasting signs as required by 30 CFR 816.66(a) should be posted at each entrance to the permit area from a public road. PCCC does have a sign posted at the back gate (just off the county road, adjacent to the H2- pond and Spoil Pile 3N) meeting the requirements of this section. However, there is not one posted at the main gate. A sign must be posted prior to PCCC resuming blasting activities at the mine.

H. Subsidence Control

Underground mining has not occurred, therefore, no subsidence control plan is required.

I. Roads

The main access road continues to have issues with potholes; PCCC has been blading them out as time and weather conditions permit.

J. Signs and Markers

Permit boundary signs have been placed along the last few sections of the boundary that needed signage. PCCC will need to place a blasting warning sign at the main gate prior to the use of explosives.

K. Distance Prohibitions

No disturbance in prohibited areas was noted in this inspection.

L. Revegetation

No new areas have been seeded since the previous inspection.

M. Postmining Land Use

The postmining land use is fish & wildlife habitat and forestry. Compliance with post mining land use was not evaluated as part of this inspection due to the fact that there were no pending bond release applications.
