Re: CSO 33-A Regulating Location Eliminated

Dear Ms. Washington:

This report is to notify Ecology of the elimination of the 33-A regulating leaping-weir which was located at 5<sup>th</sup> Avenue & Arthur. The elimination of this regulator is part of the construction of the CSO 33-1 Control Facility. The regulator for this facility will be within the new tank at Liberty Park south of 3<sup>rd</sup> Avenue and will outfall to the same location which is .15 miles upstream of the J. Keefe Bridge.

As appropriate, please amend the CSO table in your records to reflect this change in the current and proposed NPDES permits.

Having an opportunity to review this table prior to the new permit, could reflect an accurate and up-to-date table considering all the changes that have occurred since the issuance of the 2011 permit to the regulators and outfalls.

Thank you for your assistance and if you have any questions, please call me at 626-7909.

Sincerely,

Raylene L. Gennett, Superintendent  
Wastewater Management
