**Re: Warning Letter – Once Per Permit Cycle Effluent Characterization Sampling**

Dear Ms. Fuentes:

The Washington State Department of Ecology (Ecology) is issuing this warning letter to Solvay Chemicals for the violation of Special Condition S3.A. of State Waste Discharge Permit (SWDP) Number ST0006070. Special Condition S3.A. of ST0006070 required Solvay Chemicals to report the results of the final effluent characterization sampling (included in Special Condition S2.A.) to Ecology by December 31, 2015. These results have not been submitted to Ecology as of September 14, 2018.

**Solvay Chemicals must collect the required samples and submit the results of the final effluent characterization sampling to Ecology by April 1, 2019.**

After an Ecology review of the incident, no formal enforcement action is being pursued. If you have any questions regarding this letter, please contact me at (360) 407-6355 or [kelsey.holbrook@ecy.wa.gov](mailto:kelsey.holbrook@ecy.wa.gov).

Sincerely,

Kelsey Holbrook  
Industrial Section  
Solid Waste Management Program
