

NOTICE: ANNOUNCEMENT OF AVAILABILITY OF DRAFT WASTEWATER PERMIT

Permit No.: WA0020702

Facility: City of Langley
Wastewater Treatment Plant
4999 Coles Road
Langley, Island County

The City of Langley has reapplied for a National Pollutant Discharge Elimination System (NPDES) permit in accordance with the provisions of Chapter 90.48 Revised Code of Washington (RCW), Chapter 173-220 Washington Administrative Code (WAC), and the Federal Clean Water Act.

The Langley wastewater treatment plant currently operates a sequencing batch reactor (activated sludge) secondary treatment plant designed to handle a maximum month flow of 0.15 MGD. The wastewater, following treatment, must meet the requirements of the Washington State Water Pollution Control Act and applicable regulations for a permit to be issued. Following evaluation of the application and other available information, a draft permit has been developed which would allow the discharge of treated municipal effluent into Saratoga Passage – Puget Sound.

A tentative determination has been made on the effluent limitations and special permit conditions that will prevent and control pollution. A final determination will not be made until all timely comments received in response to this notice have been evaluated.

PUBLIC COMMENT AND INFORMATION
