

**Whole Effluent Toxicity Test Report  
Anacortes WWTP**

February 2020

Report date: February 18, 2020

Submitted to:

**City of Anacortes WWTP**  
P.O. Box 547/500 T Ave  
Anacortes, WA 98221

5013 Pacific Hwy East  
Suite 20  
Tacoma, WA 98424

## **1.0 INTRODUCTION**

An acute toxicity test was conducted using an effluent sample collected from the City of Anacortes Wastewater Treatment Plant in February 2020. The bioassay was conducted using the test organism *Ceriodaphnia dubia* (*Ceriodaphnia*). Testing was performed at Rainier Environmental Laboratory located in Tacoma, Washington.

## **2.0 METHODS**

### **2.1 Sample Collection and Transport**

City of Anacortes personnel collected a 24-hr. composite effluent sample in an LDPE cubitainer. The sample was packed in a cooler containing ice and shipped overnight to Rainier Environmental. Appropriate chain-of-custody procedures were employed during collection and transport.

### **2.2 Sample Receipt**

Upon arrival at Rainier Environmental, the cooler was opened, the sample inspected, and the contents verified against information on the chain-of-custody form. Receipt temperature was measured and recorded on the chain-of-custody form. Standard water quality parameters were measured and recorded in the sample check-in sheet (Appendix B). The sample was stored at 4°C in the dark until used for testing.

### **2.3 Test Methods**

An acute toxicity test was conducted according to procedures presented by USEPA (2002) and is summarized in Table 1.

**Table 1. Summary of methods for the 48h *Ceriodaphnia* acute survival test.**

Test initiation date and time	2/5/2020; 1340h
Test termination date and time	2/7/2020; 1315h
Test organism	<i>Ceriodaphnia dubia</i>
Test organism source	In-house cultures
Test organism age	< 24 hours
Test duration	48 hours
Feeding	50:50 mixture YTC:algal suspension during organism holding time. No feeding during test.
Test chamber	30 mL plastic cup
Test solution volume	15 mL
Test temperature	20 ± 1°C
Dilution water	Moderately Hard Synthetic Water
Test concentrations (% sample)	100, 50, 25, 12.5, 2.6, laboratory control
Number of organisms/chamber	5
Number of replicates	4
Photoperiod	16 hours light/8 hours dark
Aeration	None
Test protocol	EPA-821-R-02-012
Test acceptability criterion for controls	≥ 90% survival
Reference toxicant	Copper sulfate

### 3.0 RESULTS

Details of standard water quality measurements conducted upon receipt of sample are provided in Table 2.

**Table 2. Sample information.**

Sample ID	Final Effluent
Rainier Environmental Log-In Number	20-019
Collection date; time	2/4/2020; 0740h
Receipt date; time	2/5/2020; 1030h
Receipt temperature (°C)	0.5
Dissolved oxygen (mg/L)	9.0
pH	7.35
Conductivity (µS/cm)	454
Hardness (mg/L CaCO <sub>3</sub> )	124
Alkalinity (mg/L CaCO <sub>3</sub> )	100
Total Chlorine (mg/L)	<0.03
Total Ammonia (mg/L)	8.2

Survival was evaluated in the *Ceriodaphnia* acute toxicity test after 48 hours of exposure. Results are summarized in Table 3. Mean survival was 100 percent in 100 percent effluent. There was no statistically significant difference between the control and the acute critical effluent concentration (ACEC) of 2.6 percent sample.

**Table 3. Summary of results for the acute toxicity test.**

Species	Concentration (%)	Survival (%)	NOEC <sup>a</sup> (% effluent)	LOEC <sup>b</sup> (% effluent)	LC <sub>50</sub> <sup>c</sup> (% effluent)
<i>Ceriodaphnia</i>	0.0	100	100	>100	>100
	2.6	100			
	12.5	100			
	25	100			
	50	100			
	100	100			

<sup>a</sup> No Observed Effect Concentration, <sup>b</sup> Lowest Observed Effect Concentration, <sup>c</sup> Predicted lethal concentration for 50% of test organisms

Statistical summary for the test and a copy of the laboratory bench sheet and a copy of the chain-of-custody form are provided in Appendices A and C.

#### 4.0 QA/QC

The sample was received in good condition and within the temperature range specified by WDOE (2016). The toxicity test met acceptability criteria for performance of control organisms. There were no deviations from the protocol and water quality parameters remained within the ranges specified in the corresponding test method throughout the test.

Results for the reference toxicant test used to monitor laboratory performance and test organism sensitivity are summarized in Table 4. The results for the reference toxicant test fell within the acceptable range of mean  $\pm$  two standard deviations of historical test results, indicating that the test organisms were of an appropriate degree of sensitivity. The coefficient of variation (CV) for the test is also shown in the table.

**Table 4. Reference toxicant test results.**

Species	Date initiated	Endpoint	LC <sub>50</sub> (g/L NaCl)	Acceptable Range (g/L NaCl)	CV (%)
<i>Ceriodaphnia</i>	1/23/2020	48h survival	14.4	10.0 - 24.1	24.5
