**RE: TEMCO Industrial Stormwater General Permit (WAR-007651 )  
Level 3 Engineering Report Deadline Extension Request**

Melinda,

We are writing to request a two-month extension on the deadline for our Level 3 Report. In response to the COVID-19 national guidance for social distancing and related Washington State executive orders, our company is not allowing any outside personnel onsite. We have been working with an engineering firm to take stormwater samples to identify our pollutant sources and looking at options for optimizing and upgrading the existing treatment stormwater treatment.

To prepare the Level 3 design and engineering report we need to be able to have consultants on site to collaborate with us. Please approve this request to adjust our engineering report submittal schedule to have a due date of July 15, 2020. We still intend to submit our annual report for 2019 by May 15, 2020 according to the standard permit due date, but given the national pandemic, we need these additional two months to complete the Level 3 engineering report.

Sincerely,

June Moran  
TEMCO Industrial Stormwater Manager (Tacoma)
