PERMIT NUMBER: WAR000191

**RE: Industrial Stormwater General Permit Letter Dated May 15, 2012**

Dear Industrial Stormwater Permittee:

On May 15, 2012, Ecology mailed letters to several sites in error, incorrectly stating the site required no corrective action levels. If you're receiving this letter, we have identified the site listed above as one of those sites. You also received a letter stating your site's actual exceedances and corrective action levels triggered for your site. Please follow the permit requirements for the corrective actions necessary. I sincerely apologize for this error.

For information on the specific requirements for Level 2 or 3 corrective actions, please refer to your Permit (Pages 35-36). You can download the Permit and other useful documents from Ecology's website: [www.ecy.wa.gov/programs/wq/stormwater/industrial/index.html](http://www.ecy.wa.gov/programs/wq/stormwater/industrial/index.html).

If you have questions or concerns, please contact me at [charles.gilman@ecy.wa.gov](mailto:charles.gilman@ecy.wa.gov), or (360) 407-6437.

Sincerely,

Charles Gilman  
Enforcement Coordinator  
Water Quality Program
