Comments: A total of 8 (eight) samples were taken over the 2020 reporting session. Out of the 8 (eight) samples, 2 (two) of these exceeded the bench mark parameter for turbidity on 09/25/2020 and 12/08/2020. These were both due to excessive rain activity that washed sediment from offsite roadways that cross contaminated with the sample point on this site.
