Dear Ms. Tran:

On behalf of Chevron Environmental Management Company (CEMC), Arcadis U.S., Inc. (Arcadis) requests an extension on the submittal date for the Treatment System Operating Plan required for National Pollutant Discharge Elimination System Waste Discharge Permit No. WA0991041.

The Treatment System Operating Plan (TSOP), required in section S4.A of the National Pollutant Discharge Elimination System Waste Discharge Permit, is currently due on November 30, 2021. Arcadis is requesting an extension due to having to postpone the remediation system installation.

The general contractor scheduled to complete the system installation sent notice in mid-2021 that their business would be dissolving in late 2021. This required Arcadis to acquire a new general contractor, pushing back the installation date. A bid has recently been accepted and system installation is now scheduled to occur in the first quarter of 2022. The system will not be operated and no discharge will occur until after installation is complete.

The proposed delivery date for the TSOP is April 29, 2022. This extension correlates to the timeline originally given between the issuance of the permit when the system was expected to be installed and the new installation date.

Should you have any questions regarding the enclosed or if Arcadis can be of further assistance please contact Melissa Caldwell at (503) 785-9381.
