***Receiving Water Analysis:*** Effluent limits for some pollutants are dependent upon the concentration already present in the receiving water. Submit any available information on the background concentrations of pollutants at the point of discharge.

**Biosolids:** You may also be responsible for compliance with Chapter 173-308 WAC, *Biosolids Management*, and the statewide *General Permit for Biosolids Management*. Please contact Amber Corfman, Biosolids Coordinator, NWRO Solid Waste Management Program at (360)255-4406 to obtain specific information about your obligations to apply for coverage or visit the biosolids web page at <https://ecology.wa.gov/Regulations-Permits/Guidance-technical-assistance/Biosolids-permits-forms>

**Solid Waste Handling:** You may also be responsible for compliance with Chapter 173-350 WAC, *Solid Waste Handling Standards*, for the management of solid wastes. Please contact your local health jurisdiction with any specific questions.

**Reclaimed Water Use:** Reclaimed water permits are issued in combination with any required NPDES wastewater discharge permit. Please contact your permit manager for the current application form.

### Signature Delegation

The application must be signed by a principal executive officer or ranking elected official (Chapter 173-220-040 WAC). Signature authority for submittals required by the permit, such as monthly discharge monitoring reports, may be delegated to a specific individual or to a position which is expected to be filled by a qualified individual.
