

36 and 37 Annual Report Question

Continue to design and implement local development-related codes, rules, standards, or other enforceable documents to minimize impervious surfaces, native vegetation loss, and stormwater runoff, where feasible?
See S5.C.6.c.i. (Required **annually**)

S5.C.6.c.i.(a)

From the assessment described in S5.C.6.c.i.(a), did you identify any administrative or regulatory barriers to implementation of LID Principles or LID BMPs.

Yes or No?

Yes

Brief description of what we do:

King County's Design Manual is equivalent and exceeds Ecology requirements for LID. Work is ongoing to improve and clarify other King County local development-related codes, rules, standards, or other enforceable documents to help remove inconsistencies that might impede LID. King County continues update the King County Comprehensive Plan which also influences LID. Updates include errata to ensure clarity.

As part of Ecology's required review and approval of the local manuals and ordinances that was due July 1, 2020, King County reviewed its Surface Water Design Manual for barriers to LID and found no barriers that would otherwise result in additional LID BMP implementation.
