Re: National Pollutant Discharge Elimination System (NPDES) Permit Modification
Birch Bay Water and Sewer District; Permit No. WA0029556

Dear Dan Eisses:

The permit issued for your facility on January 29, 2021 is being modified effective April 6, 2022 to make the following changes:

- Remove monitoring and reporting requirements related to total nitrogen as nutrients are now regulated under the Puget Sound Nutrient General Permit.
- Update Ecology Northwest Regional Office address and telephone numbers.
- Correct a typographical error in footnote "b" of Table 9 (monitoring for permit renewal application) to clarify that quarterly monitoring must begin January 1st, 2024 instead of 2025.

Enclosed is the modified permit and addendum to the fact sheet. Please replace your existing permit with the enclosed modified permit. If you have questions regarding the modification, please contact Steve Hood at (360) 255-4396 or by email at steve.hood@ecy.wa.gov.

Sincerely,

A handwritten signature in black ink that reads "Rachel McCrea".

Rachel McCrea
Water Quality Section Manager
Northwest Regional Office
