Non-compliance notifications are required by your permit. You must submit this notice immediately. You have not submitted a notice of non-compliance or explained the cause of the violations on your November 2021 Discharge Monitoring Report (DMR), therefore you are in violation of your permit. You may refer to

permit section S3.E. for more information about what must be included in a written notice of non-compliance. You have complied with this permit requirement for July 2021 violations.

In addition, the lab report attached to your November 2021 DMR shows analysis of *E.coli* rather than fecal coliform while DMRs for all other months report fecal coliform (**permit section S1.A**). You must report the fecal coliform result (if it is available) and include an explanation on your notice of noncompliance for violations in November 2021.

The DMR is the principal tool used to evaluate compliance with permit requirements. The Department of Ecology (Ecology) places great importance on the **timely submittal of complete and accurate DMRs**. **Exceedance of Oil & Grease limits is a recurring issue for your facility.** Ecology recommends that you take action to prevent this violation in the future. If you fail to comply with the conditions of your permit, Ecology may take formal administrative enforcement action, including issuing orders and penalties. Ecology's enforcement authority for state waste discharge permits is governed by Chapter 173-216 of the Washington Administrative Code (WAC).

If you have any questions or concerns, please contact your permit manager Chris Martin at christopher.martin@ecy.wa.gov or (425) 577-3854.

Sincerely,
