RE: Permit ST-9263, Mercer Wine Estates Discharge Monitoring Monthly (March 2022)

Dear Monica,

On March 15th, 2022, Mercer Estates had a high pH violation. We have reviewed our production records and cannot definitively identify the source or cause of the high pH value. We recognize the importance of remaining within the established values and will continue to monitor our practices to ensure we avoid future violations.

Please feel free to reach out to me with any questions or concerns about this high pH violation.

Sincerely,

Sean Kendall
General Manager
