

# Construction Stormwater General Permit Proposed New Discharge to an Impaired Waterbody

WATER QUALITY PROGRAM

SEP 07 2022

DEPARTMENT OF ECOLOGY

Ecology will not issue coverage under the Construction Stormwater General Permit (CSWGP) for new discharges to an impaired water body if the discharge will cause or contribute to a violation of water quality standards.

For Ecology to determine whether permit coverage is appropriate, and to assign appropriate monitoring limits to the discharge, the site operator (Permittee) must:

- Complete and sign this form.
- Attach the relevant portions of the site's Stormwater Pollution Prevention Plan (SWPPP) and, if necessary, attach related data and documentation.
- Email a copy of the completed form and attachments to [ecyrewqianol@ecy.wa.gov](mailto:ecyrewqianol@ecy.wa.gov) and mail us the signed original form.

<b>Part 1. Site Information</b>		
1a. Site or Project Name: VMRD		
1b. Site Address or Location Description: 425 NW Albion Drive	City: Pullman	County: Whitman
1c. Impaired Water Body: Missouri Creek		
1d. Impairment: <input type="checkbox"/> pH <input type="checkbox"/> Fine Sediment <input type="checkbox"/> Turbidity <input type="checkbox"/> Phosphorus <input checked="" type="checkbox"/> Other: Temperature/Dissolved Oxygen		
<b>Part 2. Discharge Certification*</b>		
<p>Select the one option below that most clearly applies to your site. The option must be true for all pollutants for which the water body is impaired. If any pollutant does not meet 2a or 2b, you must complete 2c. <b>You must submit the relevant portions of the SWPPP (Stormwater Pollution Prevention Plan) that support the chosen option.</b> If you have not yet developed the SWPPP, submit relevant documentation to be included in the SWPPP to justify the chosen option. See Section S8 of the CSWGP for sampling requirements applicable to discharges to impaired waterbodies.</p> <p>Go to <a href="http://www.ecology.wa.gov/constructionstormwaterpermit">www.ecology.wa.gov/constructionstormwaterpermit</a> to download the SWPPP template.</p> <p><b>*If none of the options apply to your site, your site will not be eligible for coverage under the permit.</b></p>		
<input type="checkbox"/> 2a. The pollutant(s) of concern is/are not on site. I have attached part of the SWPPP that states that this/these pollutant(s) will not be on site. Note: this option typically only applies to pH impairments.		

- ☐ 2b. The pollutant(s) of concern is/are on site but stormwater will not come into contact with the pollutant(s). I have attached part of the SWPPP that states how best management practices will be used to prevent stormwater from transporting pollutants.
- ☒ 2c. The pollutant(s) of concern is/are on site, will be exposed to stormwater, and may be discharged off site. I have attached part of the SWPPP that states how best management practices will be used in order to meet the in-stream water quality criteria for the receiving water body.

### Part 3. Signature

3a. *"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."*
