RE: Noncompliance Notification for Sand and Gravel General National Pollutant Discharge Elimination System (NPDES) Permit No. WAG501096, Lynch Creek Quarry

Dear David Randles:

NPDES Permit No. WAG501096 requires that monitoring data obtained during each monitoring period shall be summarized, reported, and submitted on a Discharge Monitoring Report (DMR) form provided, or otherwise approved, or through our WQWebDMR. DMR forms shall be received/submitted no later than the 15th day of the month following the completed monitoring period, unless otherwise specified in this permit.

Your DMR for **2nd Quarter 2022** was due July 30, 2022 and was not submitted until September 20, 2022.

Your DMR for **3rd Quarter 2022** was due October 30, 2022 and was not submitted until November 28, 2022.

Reports which do not comply with permit limits and/or monitoring requirements are treated as a violation.

Compliance Assurance is the goal of the [Clean Water Act](#)'s self-monitoring program. The DMR is the principle tool used to enforce the self-monitoring program. Be aware of the importance Ecology places on complete and accurate DMRs and the legal implications they have for your facility. Noncompliance with the limits, monitoring requirements, terms, and/or conditions established in your permit may result in formal enforcement action by Ecology.

David Randles
