Good Morning:

You should fill out what you have and submit it. Leave blank those missing parameters that the lab has not delivered yet (it will create violations but don't worry about that). Make a note in the over all dmr notes and reference this email.

Then when you receive the results, go into the DMR's, use edit and fill in the missing data. Then resubmit it. The original date of submission will carry forward. I will make a note in the communication log of your electronic file and attach this email.

If you have any questions give me a call or email; otherwise there is no need to call.

Kind Regards,

Subject: WA0991018 - 2023 March DMR - Lab Results Delayed

Hello Marcia,

The lab we use to get our water samples analyzed is backed up and has indicated they may not be able to get us the results in time to submit the March DMR by April 15th. Would it be possible to submit the March 2023 DMR a little later than usual? If I also need to call and make this request, please let me know. If not, can you please let us know by email? Alternatively, we can submit the results we have to date (all but the last two weeks of March) – however, I think once we submit the DMR, it may be locked from further entry. So, please advise how best to proceed here.

Thank you.

Pradeep
