

The Holmes Harbor Sewer District (HHSD) processed 22.6 million gallons of wastewater into Class A Reclaimed Water in 2023.

19 million gallons was distributed to the Holmes Harbor Golf Course in 2023 (HHGC).

HHSD is the sole authorized user of the reclaimed water.

The water was transferred regularly to the Holmes Harbor Golf Course irrigation ponds between the months of May to October, per the Irrigation management plan of 2013. Ecology granted an extension for the month of October due to favorable weather conditions.
