

## **CHEMI-CON MATERIALS CORPORATION**

Rob,

I took over the DMR March 2023, with very little training, it has been on the job learning for me. I've reached out to Pat Hallinan a few times for clarity and thought there were no other issues at hand as I thought everyone was aware we receive our testing data after the due date. I would like to have a meeting with you to clarify our sample/due date times.

- 1.) DMR sample results are not received until after the due date.
- 2.) We have discussed with our vendor to see about adjusting the sample dates/times to meet the submittal due date.

Looking forward to discussing this with you and getting it resolved. Please let me know your earliest availability and convenience.

Thank you,

Michael Montemayor  
Environmental Supervisor
