For Ecology Use Only		Date Received:	
Form	Reviewed	Entered	Verified
ESAF			

1. Site Location Information

If you are applying for multiple facilities/permits, please include a list containing the site location information and permit numbers for all requested facilities/permits.

Site/Facility Name: King County South Treatment Plant
Site Location Address: 1200 Monster Road SW.
City/State/Zip: Renton/WA/98057
Permit Number: WAG994573

2. Electronic Signer Contact Information

Role: ☒ Facility Signer ☐ Facility Coordinator

Signature Account User Name: ButlerWTD
Full Name: Richard Butler
Work Mailing Address: 1200 Monster Road SW
City/State/Zip: Renton/WA/98057
Work Phone No. (Ext): 206-263 - 1751
Work Email Address: Rick.Butler@KingCounty.gov

3. Proof of Identity

Please include a copy of one of the following documents, with your name on the document, with your ESAF to prove your association with the facility-(ies):

- Your permit's letter of coverage;
- Your permit's cover sheet;
- A previously submitted DMR;
- A correspondence from Ecology that has both the facility name and permit number on the same page;
- Signature authority delegation letter signed by the permittee (responsible official).

4. Electronic Signature Agreement and Certification Statement

By completing and submitting this form to Ecology, I agree to follow the rules and procedures governing the Electronic Signature account. I also agree that the reports and documents I submit under my Electronic Signature will be used as the corresponding paper report would.

5. Clean Water Act Certification Statement

All submittals to the Department of Ecology under this WQWebPortal application are subject to the following certification, as required by federal and state regulations:

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. The information submitted is, to the best of my knowledge and belief, true, accurate, and complete and I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Subject: PSNGP NOI -Signed Certification forms for King County's four treatment plants

THIS EMAIL ORIGINATED FROM OUTSIDE THE WASHINGTON STATE EMAIL SYSTEM - Take caution not to open attachments or links unless you know the sender AND were expecting the attachment or the link

Good Morning Tricia.

Attached please find signed copies of the Notice of Intent (NOI) certification forms for King County's four treatment plants to be covered by the Puget Sound Nutrient General Permit (PSNGP). These forms were signed by Department Director Christie True and dated today. The four original signed certification forms will be post-mailed either later today or early next week.

The permit numbers for King County's four treatment plants to be covered by the PSNGP are as follows:

- ✓ WA0022527 - Vashon
- ✓ WA0029181 – West Point
- ✓ WA0029581 – South Treatment Plant
- ✓ WA0032247 - Brightwater

Please let us know if we need to do anything else or need to correct/change anything.

Have a great weekend.

Subject: Sanitary Sewer Overflow
Interurban Pump Station's Force Main – Nov. 26 2013
DOE ERTS No: 645470

On November 26, 2013, an estimated 20 gallons of sanitary sewage overflowed from one of two force mains that run from King County's Interurban Pump Station through Ft. Dent Park to the South Treatment Plant. The overflow lasted about 5 minutes, beginning round 1:15 pm. Fort Dent Park is located on Interurban Ave. S. in Tukwila, just north of I-405. The Interurban Pump Station is located at 13980 Interurban Avenue South, Tukwila, WA. 98168.

The overflow started from an air release valve on the west force main (Force Main No. 1). The air release valve is located at the south end of the bike bridge that crosses the Green River as part of the Interurban/Green River Bike Trail. Sewage flowed from the air release valve through the 2-inch vent line that carries foul air to an adjacent manhole designed to provide carbon scrubbing. The manhole subsequently filled with sewage and overflowed onto the paved trail and into the surrounding grounds. Clean up of the site included applying household bleach to the pavement and surrounding ground, and removal of sewage from the manhole using a vactor truck. No samples of the overflow or the river were collected since the overflow was limited and contained.

The overflow from the manhole started about 45 minutes after the air release valve had received preventive maintenance and was returned to service. The overflow was stopped when the shut off/isolation valve for the air release valve was closed, and flow through west force main was

stopped. An inspection of the air release valve indicated that it was in proper working order. So it was put back into service, along with the west force main, this time without any further overflow. Based on the available information, it appears the air release valve likely became stuck when it was first operated after the PM was completed. It has operated trouble free since that time. As a corrective action for future maintenance, staff will watch the manhole for any sewage flow through the vent line when putting the air release valve back in service. This will allow staff to isolate the air release valve and force main before any sewage overflows from the manhole.

If you have any questions about this overflow event, please feel free to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard A. Butt" followed by "For R.W." in a smaller, less legible script.

Robert Waddle, Manager
South Treatment Plant
