

MEMO ADDRESSING QUESTION 58, pertaining to S5.C.8.a-d

Attach a summary of actions taken to implement the source control program per S5.C.8.a-d

In 2022 Clyde Hill adopted revisions to its municipal code which included inspection and progressive enforcement programs consistent with the requirements of S5.C.8.

The City has developed a list of all publicly and privately owned institutional, commercial and industrial sites which have the potential to generate pollutants. The inventory consists of two commercial businesses and four schools.

The City has developed an inspection program patterned after materials and training from the Washington Stormwater Center. All staff have undertaken the source control inspection training.
